Re: Arborist Findings at 200 Park Central Boulevard, Pompano Beach, FL

To Whom It May Concern,

I visited the above-mentioned property on Saturday, February 4th, 2023 to evaluate +/- 121 trees, take photographs (Specimen sized trees only), perform relocation evaluations, calculate appraisal values (Rule 14-10 2020), and note any defects.

Overview

Please see attached tree table with data collected in the field including species, height, width, diameter at breast height (dbh), clear trunk (CT), health condition, health condition percentage, Rule 14-10 (2020) appraisal values, relocation evaluations, and pertinent notes.

Note all trees were evaluated from the ground only, no aerial inspections, soil excavations or penetrations were performed. The performed reviews were 360-degree visual assessments only. Health condition ratings are in accordance with the CTLA 10th Edition Guide for Plant Appraisal.

A total of 80 trees and 41 palms were evaluated. Please find additional details, comments, and photographs (Specimen Sized trees only) below.
