Marty,

As verification, this site is not a jurisdictional wetland?  
And if not can you reissue your survey to us indicating the area as a retention area?

Many thanks,

**DRC**

Good morning Tim,

This is just a colloquial wetland area.

**Thank you,**

Thanks for looking into this.

Attached is a quick .pdf of the survey with your title block, which should help you find this in your files.  
The question is about the wetland – and whether the word is used as an environmental scientist would call it or just the colloquial ‘wetland’ – a place covered by water.

Let me know if you need anything else.

Thanks,

-tim
