FROM: A. Randolph Brown, Utilities Director

SUBJECT: Emergency Utility Deep Well - Design and Construction Management Services- Stantec

During the past year we have tried unsuccessfully to reline our deep well and the well had to be abandoned. On our upcoming Commission agenda October 23, 2018 we have proposed emergency construction of a new deep well for the Utilities Water Membrane Treatment Plant with Youngquest Brothers, Inc. Engineering design, permitting and Construction Management Services will be required for this work. Our current consultant Stantec has all the information necessary to begin work immediately on the design and expedited permitting. The total cost for will be \$777,523.68

Funding is available in the Utility Reserves for this expenditure.
