## Clay artwork samples for the sidewalk mosaics by the beach

Sealife theme  
Materials: colored clay  
Dimensions: 6", 8", 10", 12" diameter  
Scope: 100 pc

\*Approximately 100 circles (6", 8", 10", 12" diameter, in varying sizes), would to be cut into the existing sidewalk, and then inlayed with mosaic images with an ocean theme.

\*The existing concrete would be cut by a licensed contractor, with expertise in concrete core drilling.

\*Apprentices would design and assemble sea themed mosaics of various materials, suitable for exterior flooring.

\*The "bubbles" will range in size from 6" to approximately 12" in diameter and lead pedestrians on a fun path of discovery.

\*Approved designs will repeat along the path, with changes in color, materials, direction, etc.

\*Like the Trail of Honey Bees, a scavenger hunt type of program could be developed to accompany the images with educational and conservational information for the visitors.

This type of mosaic will enhance the beach experience for the visitors and local community. It will create visual and education benefits for people of all ages and interests.
