RE: CPTED Narrative for Big Tree BBQ Site Plan @ N POWERLINE RD POMPANO BEACH FL 33069 (Folios [484233020220](#); [484233020230](#); [484233020550](#); [484233020560](#); [484233040770](#))

Dear members of the Development Review Committee (DRC),

PLANW3ST is representing the POMPANO BEACH COMMUNITY REDEVELOPMENT AGENCY in pursuit of CPTED Security Plan approval for a Site Plan proposed at the above-referenced property. The subject property is 21,416 sq. ft. (0.49 acres), and is located west of Powerline Road, between NW 4th CT and NW 5th ST in Pompano Beach (refer to **Exhibit "A"** included with this narrative). Currently, the property (5 separate tax folios) is vacant and the prospective owner intends to develop the property with a new 1,484 sq. ft. restaurant and related site and landscape modifications.

A CrimeCast report was generated by CAP Index, Inc. (refer to **Exhibit "B"** included with this narrative; <https://capindex.com/>) utilizing 2024 crime data and 2023 census data, and provides CAP scores that designate levels of crime risk, as well as several maps that show specified levels of crime in the area of the proposed project. Scores and maps are provided for a maximum of 1-, 3-, 6-, and 12-mile radius from the project. This report identifies the different types of crimes that correspond to the CAP score for each max radius study area. A summary of the CAP Index scores is provided below, by study area radius.

2024 CAP INDEX SCORE SUMMARY	
MAX-1 (1-mile radius)	341 (3.41 times the national average of 100)
MAX-3 (3-mile radius)	436 (4.36 times the national average of 100)
MAX-6 (6-mile radius)	426 (4.26 times the national average of 100)
MAX-12 (12-mile radius)	462 (4.62 times the national average of 100)

Within Broward County's Max-1 (1-mile), Max-3 (3-mile), and Max-6 (6-mile) study areas, Crimes Against Persons indicate to be the most currently-reported of all crimes. For the and Max-12 (12-mile) study area, Crimes Against Property indicate to be most reported. Please see below for a Broward County "Top Crimes" breakdown by study area radius.

BROWARD COUNTY TOP CRIMES COMMITTED, PER STUDY AREA							
MAX-1		MAX-3		MAX-6		MAX-12	
Crimes Against Persons (homicide, rape, robbery, aggravated assault)		Crimes Against Persons (homicide, rape, robbery, aggravated assault)		Crimes Against Persons (homicide, rape, robbery, aggravated assault)		Crimes Against Property (burglary, larceny, motor vehicle theft)	
279 median		322 median		306 median		476 median	

The report summarizes the following for Broward County:

- Within the Max-1 (1-mile) study area, homicide is currently the most reported.
- Within the Max-3 (3-mile) study area, robbery (theft using violence) is currently the most reported.
- Within the Max-6 (6-mile radius) study area, robbery is currently the most reported.
- Within the Max-12 (12-mile radius) study area, larceny (theft) is currently the most reported.

The report also provides 2029 projections of crime based on past trends for the county, which will likely affect this project. Below is a summary of these projections for Broward County.

PROJECTIONS IN CAP INDEX FOR BROWARD COUNTY, PER STUDY AREA (median)				
CRIME CATEGORIES	MAX-1	MAX-3	MAX-6	MAX-12
<i>Crimes Against Persons</i>	Increase from 279 to 281	Decrease from 322 to 316	Decrease from 306 to 300	Increase from 415 to 429
<i>Crimes Against Property</i>	Increase from 259 to 271	Increase from 307 to 308	Decrease from 301 to 294	Increase from 476 to 481
<i>Simple Assault</i>	Increase from 273 to 293	Increase from 307 to 318	Decrease from 363 to 336	Decrease from 442 to 431
<i>Vandalism</i>	Increase from 283 to 298	Increase from 333 to 339	Decrease from 309 to 308	Decrease from 464 to 429

The projections indicate that Crimes Against Persons will increase 1-3 miles, and 12+ miles of this property. Crimes Against Property, Simple Assault, and Vandalism will also increase 1-6 miles of this property. Within 3 miles of this project alone, increase in future Crimes Against Property are highest for motor vehicle theft. Increase in future Crimes Against Persons are highest for Homicide. Simple Assault and vandalism will also increase within 3 miles of this property.

These projections make CPTED a necessity for the success of this project. A CPTED plan has been drafted to incorporate several CPTED principles and techniques to deter crime, utilizing the icons shown in this narrative for each principle. The icons correspond to a location on the plan where the principle and technique is being applied.

The following CPTED Principles are addressed in the proposed Public Safety Security (CPTED) Plan, sheets PS-1 and PS-2. For more detail, refer to these drawings.

PRINCIPLE #1 – NATURAL SURVEILLANCE (See and Be Seen)

- Site has been arranged with numerous light poles and wall-mounted fixtures so that patrons can always maintain visibility of their surroundings.
- Lighting must comply with the Illuminating Engineering Society of North America “IESNA” G-1- 2022 “Guide for Security Lighting for People, Property, and Critical Infrastructure.
- Some parking spaces are naturally surveilled by building windows and naturally surveilled by visitors and public activity.

AAC

PZ25- 12000012
02/03/2026

- 180-degree wide angle peephole door viewers are included in all doors leading to the exterior.
- Install vandal proof/ resistant motion-sensor security alert lights over all exterior unit doors and overhangs, including main and storage doors. Security lighting should be primarily concentrated at gateways, doorways & windows.
- Use carefully-focused bright soft lights with shielded fixtures.
- Bottom gate clearance for dumpster must be 8 inches above the ground.
- Maintain 2- to 2.5-foot maximum height for all hedges, bushes, low plants, and ground cover.
- All solid exterior doors must have a see-through reinforced security window, or an audible/ video intercom pager system including service doors.
- The placement of a window within a door must not facilitate the easy reach of the door's locking mechanisms (i.e. deadbolts, lockable doorknobs, slide locks, etc.)

PRINCIPLE #2 – ACCESS CONTROL

- Install hard-wired burglar security alarms and safes, and/ or wherever valuables of any kind are stored.
- Include a robust locking mechanism such as a throw bolt with a robust shielded padlock, rather than only a vulnerable chain and non-shielded padlock for dumpster enclosure.
- Entrances to the site are designed to be defined with paving changes, landscape, and signage.
- Low hedges and shrubs are to be maintained at a maximum height of 2.5 feet in front of buildings.
- Lighting will be installed and maintained to avoid obstruction by landscaping, fencing, and other site elements. This is to be formally coordinated with Broward Sheriff's Office (BSO) during construction.
- Maintain an 8-foot clearance for canopy trees and tall plants without any obstructive limbs or foliage hanging down below 8 feet that would in the present or future obstruct Natural &/ or Electronic Surveillance.
- Lighting locations will avoid shrub and tree shading.
- Landscaping around site edges within picket openings is designed to avoid conflict with natural surveillance from public streets or any buildings.
- Security and Access Control System will be installed at building entrances (<https://csivideo.com/>).
- Wayfinding & Instructional Signage must be prominently displayed & posted where necessary.
- All exterior doors must have non-removable door hinge pins.
- Areas designated for employee & customer transactions such as a reception desk, should be designed with a clear boundary delineation and/or enclosure separating public from private areas.
- Any keys, key fobs, key card devices &/or similar devices that are stored on-site must be secured with access control or with an alarm and robust mechanical locking system.
- Dumpster area is located in an area properly lit, and covered by both natural and electronic surveillance.

- Fences should not have easily accessible horizontal bars that could be used to facilitate climbing over & breaching any security fencing. Use narrow spacing between vertical bars to prevent providing footholds.
- Management office door shall be equipped with a wide-angle security viewer (door scope/peephole) for access control and occupant safety. Installation shall comply with Owner's security requirements.
- Gates are proposed at the north and south entrance of the driveways to help prevent trespass opportunities and pass through traffic after hours. Entry gates will be equipped with the Click 2 Enter (C2E) Universal Access System thereby providing Fire Rescue & Law Enforcement the ability to immediate access the site.

PRINCIPLE #3 – TERRITORIAL REINFORCEMENT (Sphere of Influence)

- Smoker shall be secured by means of an 8-foot-high enclosure fence.
- Main entrances to parking areas are delineated by different pavement treatment, signage and striping.
- Property will subscribe to the Broward Sherriff's No Trespass Program. Refer to CPTED Plan for signage locations.
 - Post BSO No Trespass signs prominently with bottom edge of sign at approximately a minimum of 6' to 7' feet in height from ground level for clear unobstructed viewing throughout property and from the site perimeter lines.
 - Secure robustly using sturdy fasteners at all corners to help prevent vandalism.
- Lights will be provided near unit doorways and site lighting will cover exterior door areas.
- Reinforced hurricane windows and doors are used.
- 180-degree wide angle viewers are included for all exterior doors.
- Building entrances will be enhanced with architectural elements, walkways, lighting and signage.
- Buildings will be identified using street numbers that are a minimum of 5 inches high and light during nighttime hours. Numbers will be unobstructed by landscaping or other external features. This is to be formally coordinated with (BSO) during construction.
- Parking spaces will be clearly and individually marked and assigned for authorized use only.
- Tow away and unauthorized signage will be provided in the parking areas.
- Install convex security mirrors to increase visibility around blind corners, ramps & any points of intersection between vehicle lanes of travel & pedestrian pathways.
- Solid walls (if any) and elevated platform features used in design elements (other than retaining walls), specifically those used as perimeter / privacy boundaries, should not have a flat top, and should be designed with an angled, beveled, curved, or otherwise shaped top to deter easy climbing over which is a potential trespassing/ breaching vulnerability, and/ or to deter sitting and loitering upon which could also be a potential fall and injury hazard. Signage prohibiting trespass or sitting upon walls should be included in the design as necessary.

PRINCIPLE #4 –MAINTENANCE (Broken Window Theory)

- Impact glass is used for all exterior windows.
- All areas will be maintained to high standards, including entrances, signage, swales, and parking areas. Trash will be removed and landscaping will be maintained.
- Trees and shrubs will be pruned away from windows, doors, and walkways.
- Exterior lighting will be maintained in full function at all times.
- Rules will be strictly enforced regarding junk vehicles, inappropriate outdoor storage, and dumping.
- Exterior wall surfaces along the building perimeter must be treated with a graffiti resistant resin up to 8 feet to prevent vandalism.
- All publicly accessible exterior electrical power outlets have a lockable metal cover and easily-accessible secure internal cutoff switch.
- Ensure all publicly accessible exterior water outlet spigots have a nearby easily accessible secure-locking cap.
- Costly equipment such as ground floor exterior air conditioning units (if any) must be clearly and permanently marked with serial numbers and images of equipment and serial numbers stored for criminal investigation.
- The number address signage must be unobstructed by landscaping or external features, provide good color contrast, be visible from the roadway & preferably be reflective for instant recognition by law enforcement & EMS when responding to emergency calls for service.
- Install a fixed concealed silent panic duress alarm at main entrance AND a provide a portable activator for redundancy in the event the fixed alarm is compromised due to the fixed alarm post being vacant, or for any serious incident such as an active killer or other emergency. Additional portable duress alarm activators must be provided to employees that are assigned to work on the exterior of business such as drive-thru lanes, curbside service, exterior dining, maintenance, etc.
- Outdoor smoker shall be enclosed by a secure, lockable gate to prevent unauthorized access.
- Air conditioning units are proposed to be roof mounted to avoid ground level placement and reduce risk of vandalism, theft or misuse of any kind.

PRINCIPLE #5 – ACTIVITY SUPPORT

- Walkway placement is adjacent to parking, which increases visibility in these areas.
- Building is oriented to face parking area for further visibility.
- Bike racks are located close to the main building access doors.
- Exterior bench seating (if any) for public use should be CPTED orientated to include spacers / dividers / arm rests or preferably use a single seat design.
- All lightweight, non-permanently secured exterior furniture will be clearly labeled as property of Big Tree BBQ and easily identifiable. Furniture is intended to be secured or stored indoors after restaurant closing hours or when not in use.

- Ensure toilet rooms are provided with secured motion sensor (occupancy) lighting systems that meet requested illumination and recommended lighting level.

ELECTRONIC SURVEILLANCE:

- Any potentially vulnerable areas that cannot be observed through Natural Surveillance must be covered by electronic surveillance monitoring. Such areas can include, but are not limited to: meeting rooms, employee breakrooms, customer waiting rooms, interior & exterior common areas, etc.
- Cameras will be vandal-proof and bullet-style. CPTED plan shows camera locations with 100-degree horizontal field of view (see UniFi <https://ui.com/us/en/camera-security/bullet>).
- Building-mounted electronic surveillance is used to capture full coverage of parking areas parking lot, narrow alley east of the building, ingress and egress of the site, and dumpster area.
- Surveillance monitors depicting real time security camera views must be strategically located for maximum overlapping active and passive observation.
- Site entrance has camera locations oriented to capture the front and rear of vehicles entering and exiting.
- Cameras will be monitored by management or security personnel. Monitors to be located in lobbies or reception areas, visible to visitors.
- All cameras will be strategically placed so they will not be obstructed by the growth of existing or future landscaping, as well as light poles. This is to be formally coordinated with (BSO) during construction.
- Key security office / room / key storage closet must be covered by electronic surveillance.
- If the building/property has a Wi-Fi system, it needs to be encrypted and password protected. If Wi-Fi is offered as a complimentary service by a business, then it should be disabled when the business is closed to the public.

Thank you for the opportunity and please do not hesitate to contact me with any questions.

CRIMECAST® PREMIUM PLUS REPORT

CRIMECAST® Reports indicate the likelihood of crime and loss occurring at any address in the United States, Canada, Mexico, and the United Kingdom. Each report includes CAP Scores designating the risk of crime as well as detailed maps depicting those risks within a defined radius around each location.

2024 CAP INDEX® SCORES

REPORT COMPONENTS

SCORING METHODOLOGY

This area indicates the scoring methodology being used. Reference the Appendix page for an explanation of the various methodologies.

CAP SCORES

The **National CAP Index® Score** indicates the overall risk of crime at the address.

The report also includes nine specific CAP Scores pertaining to **Crimes Against Persons** and **Crimes Against Property**, along with two **Supplemental Scores**.

CRIMECAST® MAPS

The **Site Map** shows the **Block Group Score** for each "neighborhood" surrounding a given location. The Site Map helps depict the potential origin of criminal activity occurring at the location.

Every 10 years, the Census Bureau designates block groups in the United States. With the 2023 database release, the number of block groups increased from roughly 217,000 to over 239,000.

The CAP Index Scoring System assigns a numeric risk score and a corresponding risk shading to each block group.

	Rape		340	Larceny		458	Vandalism		514
	Robbery		467	Motor Vehicle Theft		496			
	Aggravated Assault		400						

CAP SCORE SCALE

The **Heat Map** provides an alternative view of the risk of crime within the map window. CRIMECAST® Heat Maps are developed by calculating the CAP Index® Scores for every point on the map and then shading its corresponding risk level.

CAP SCORE SCALE

CAP Scores range from 0 to 2000, with 0 representing the lowest risk and 2000 the highest; 100 is average. A score of 600 is 6 times the National Average, and a score of 25 indicates a risk that is 1/4 of the National Average.

ABOUT CRIMECAST SCORING

THE CAP INDEX® SCORING SYSTEM

The CAP Index® Scoring System uses sophisticated forecasting techniques that combine demographic and business statistics with crime and loss data to calculate crime risk. The foundation of our forecasting approach is the “Social Disorganization Theory,” which asserts that higher degrees of social discord in a neighborhood tend to correlate with higher levels of crime.

SCORING METHODOLOGIES

CAP Scores for a specific business application are generated using one of four CAP Index® Scoring Methodologies. These scoring methodologies account for the fact that perpetrators often travel varying distances to commit crimes (the “journey to crime”) depending on the target. The scoring methodologies also consider the nature and attractiveness of different types of targets for different types of crimes. Each methodology designates a progressively larger “sphere of influence” that is used to assess the risk of crime. Each sphere is defined by a maximum geographic radius or a population threshold. These spheres have different components that drive the overall crime risk score. The inner part of the sphere focuses on the nearest neighborhoods and receives the higher percentage of the weight. The outer part of the sphere considers more distant avenues of vulnerability and receives the remaining percentage of the weight.

Scoring Methodology	Outer Ring / Population for Assessment	Weight	Inner Ring / Population for Assessment	Weight
MAX-1	1 mile (1.6 km.) or 25,000 people	N/A	1 mile (1.6 km.) or 25,000 people	100%
MAX-3	3 miles (4.8 km.) or 100,000 people	20%	1 mile (1.6 km.) or 25,000 people	80%
MAX-6	6 miles (9.7 km.) or 400,000 people	20%	2 miles (3.2 km.) or 100,000 people	80%
MAX-12	12 miles (19.3 km.) or 1,600,000 people	33%	4 miles (6.4 km.) or 400,000 people	67%

CAP SCORE SCALE

CAP Scores range from 0 to 2000, with 0 representing the lowest risk and 2000 the highest; 100 is average. A score of 600 is 6 times the National Average, and a score of 25 indicates a risk that is 1/4 of the National Average.

THE LEADERS IN CRIME RISK FORECASTING

CAP Index empowers organizations to make better-informed decisions throughout the security planning and security management cycle. Whether you are opening a new location, planning security measures for your existing locations, or conducting services off-site, our validated crime risk intelligence will help you create impactful security solutions to protect your customers, employees, assets, and your bottom line.

CRIMECAST® DATA & REPORTS

Quantify and visualize your risk with our detailed, industry-leading, site-specific crime risk reports.

RISK CONSULTING & ANALYTICS

Elevate your security program by having our team of consultants produce a crime risk scoring system tailored to your organization's needs.

TECHNOLOGY, PLATFORMS & MODULES

Manage your security planning process and loss prevention program from one dashboard.

HOW WE HELP: ASSESS YOUR RISK AND OUTSMART CRIME®

Make your customers, employees, and assets safer

Optimize the return from your security investment

Reduce litigation and avoid adverse judgments

Reduce crime, loss, and claims

Ensure compliance with industry standards

Protect your brand
