Location Map

✦ Special Exception / Conceptual Site Plan

Site Zoning: B-3 General Business

- City determined proposed free-standing emergency room ("FSER") is considered a "Specialty Hospital" under City's Code
- Specialty Hospital facilities are permitted with special exception approval
- Outpatient Treatment
- No Inpatient Beds
- No Overnight Stays

Differences Explained: FSER - Urgent Care - Specialty Hospital

Free Standing Emergency Room

- Physicians on staff and present 24 hours, 7 days a week vs a P.A. or nurse practitioner at urgent cares
- Equipped with the imaging and laboratory resources needed to diagnose and deliver care for severe and life-threatening situations
- Hospital owned and operated- patient will be transported if they require inpatient admission and/or higher level of care

Urgent Care

- Medical care provided for illnesses or injuries which require prompt attention but are typically not of such seriousness as to require the services of an emergency room
- Typically staffed with physician assistants, nurse practitioners and nurses
- Can provide basic labs and imaging to assist with diagnosis and treatment plans

Specialty Hospital

- Services a specialized population (*i.e. womens, childrens, cardiac, oncology, psychiatric*)
- Can admit patient overnight at the existing location
- Do not treat all types of patients vs a “general hospital” which remains the source of care for more severely ill patients, patients who may need additional services, or patients facing an emergency health event

✦ A FSER delivers better access to fast quality care, resulting in shorter wait times for the community
