

MEMORANDUM NO. 25-42

DATE: June 30, 2025

TO: Mayor, Vice Mayor, City Commission

FROM: Dr. Tammy Good, PMP, Capital Improvement Plan Manager *TG*

SUBJECT: Approval to Award Work Authorization (WA) to Synalovski Romanik Saye, LLC (SRS), for design services of the Emergency Operation Center (EOC)

On July 9, 2019, the City Commission approved Ordinance No. 2019-76 in response to Solicitation No. P-54-18, authorizing Professional Engineering Services for the development of a new Fire/Emergency Operations Center (EOC). Following this approval, the Engineering Department has undertaken extensive feasibility studies and conceptual site planning to determine the most suitable location for the facility.

After careful analysis, the project team has selected 2121 NW 3rd Avenue, adjacent to the existing Fire Station 61, as the preferred site. This location offers several strategic advantages, including a more centralized position within the city and higher ground elevation, both of which enhance its viability for housing the Emergency Operations Center, Fire Administration, and Fire Logistics functions.

Accordingly, we are seeking approval for the issuance of a design Work Authorization in the amount of \$1,084,518.13 to Synalovski Romanik Saye, LLC (SRS). This authorization will enable SRS to complete the facility's design and deliver fully permit-ready construction documents.
