

This is the side of the property where the shed would go. As you can see, having a 15 foot restriction from the fence makes this area virtually unusable for anything substantial.

This is the other side of the fence in the picture above. As you can see, there is a large area between the property line and the street (15 feet), so if this application is approved, the shed would be very far away from the street.

These are the other sides of the property. As you can see, we have a lot of vegetation, including but not limited to an avocado tree, multiple ferns, 2 banana trees, a crape myrtle, birds of paradise, a plumeria, and other assorted plants. We would not consider using this side of the property as these plants are not only great for our home, but also for the environment and all of our neighbors.
