Variance Application

1. There is an exceptional condition on my property. That is a concern to me and my family. It is due to the distance from the pool to the back fence and the right-side fence. The distance is 6 feet to the back fence and 3 feet to the right-side fence. As you can see from the property survey and the photos that I have submitted to you it will show you what I have to deal with everyday for cleaning, fighting off mosquitos and picking out frogs from the skimmer.
2. The pool location is not the result of any construction that I had any part of. The home was built in 1969 and the pool is part of the home design and added features.
3. Under no circumstance dose the pool prohibits, restrict or cause any undue hardship to any of my neighbors.
4. Under no circumstance dose the pool confers any special privilege that would not allow to any of my neighbors.
5. This variance permit is necessary for me and my family to have the maximum use of our property. With this variance it will allow us to build an encloser that will help us control the environment. In the photos that you will see we have a problem with tree leaves, frog and frog eggs, flies, bugs in and out if the water but the most of all mosquitoes all day and late into the night. There is no time or place for us to sit outside that we will not be able to sit longer than 15-20 min before we must go back inside because of the mosquitos. Without an enclosure me and my family will be exposed, and we will not have the ability to enjoy our home. Without this enclosure we will have to resort to using pesticides to combat the problem.

We don't feel comfortable in doing this because we have a two-year-old in the home as well as our dog Princes which is 14 years old. We don't feel comfortable with decision like that when we are starting a new family.

6. Our pool enclosure will be in harmony with the general purpose and the intent of the code and reserve the spirit. The environment that we want to create for our home has taken careful planning with safety issues a top priority. We will follow the city, state, and federal codes and the most of all to make it hurricane proof. Our encloser will fit in harmony with our home.
7. This variance permit will only make improvements to our neighborhood. It will not adversity affect the health or be detrimental or cause injury to anyone in the home or in the neighborhood.
8. This variance will have a comprehensive plan as we have consulted and studied various plans and designs that we know will fit into our home and neighborhood.

Two handwritten signatures are present. The top signature is written in blue ink and appears to be 'Kenny Bush'. The bottom signature is written in black ink and is more stylized, possibly reading 'Laney'.
