COMMENTS:

Municipality not CRA.

Although references check PEBBS highly recommends, proposal lacked demonstrated description of similar work satisfactorily completed within the last three (3) years, the location of the services, effective date, and end date of the agreement/contract.

No specifics on the type of communication devices that will be utilized, type of real-time incident software tracking system used, and the method and frequency of reports (include a sample report) that will be provided to CRA staff type of communication devices that will be utilized.

Pricing section in proposal lacks detail regarding a description of the types and qualities of service that would be provided, cost for each of the major services provided, along with the estimated number of expected work hours for each qualified staff member.

Note: Proposal elaborates on transitioning phases
