

Sign Criteria for McNab Self Storage Shops

950 E McNab Rd. Pompano Beach Florida

Master Sign Program

The tenant Signage Criteria has been established to be a comprehensive set of guidelines in order to ensure uniformity and visibility.

All Signs must follow this criteria and must be approved through the review process of the Landlord. Landlord approvals and City Permits are required prior to signage installation.

1A. Drawing Review Process

All Signage documents must be received by the Landlord or representative to conform to the standards in the criteria. The Landlord's written approval is required prior to submitting any permits to the City of Boynton Beach.

1B. Application for Landlord Approval

Application for signage approval must be made by the tenant or assigned representative to the Landlord for final approval.

Once approved, production designs must be signed and sealed by a Florida Licensed Engineer. Each Applicant must include the following information in order to be considered for approval:

- 1) The design and layout proposed, including the total area of the sign, size, character, color, lines and symbols.
- 2) Method of Illumination, if any.
- 3) The precise location of the sign in relation to the building and property.
- 4) Detail production drawings showing construction, erection and attachment per current building codes.
