Atwell demonstrates extensive municipal utility experience across water, wastewater, reuse, and stormwater systems, including potable watermain design, rehabilitation, and replacement; gravity sewer extensions and septic-to-sewer conversions; reclaimed/reuse watermain installation (including prior work for the City of Pompano Beach); and comprehensive stormwater drainage analysis and detention modeling.

Their team has supported multiple Florida municipalities and utilities with design, permitting (including SFWMD and FDOT coordination), utility relocations, and construction administration services, delivering infrastructure improvements that address aging systems, regulatory compliance, and capacity upgrades. This background reflects strong technical depth in distribution and collection systems, hydraulic modeling, and integrated utility coordination within roadway and municipal capital improvement projects.

COMMENTS:

National firm with strong regional office presence and broad multidisciplinary capabilities. ~~Demonstrates solid technical competency and experience delivering complex development and infrastructure projects.~~ While the firm's portfolio includes a significant amount of private-sector work, this experience translates well to efficient project delivery, coordination, and schedule control. CIP ~~Fit: Well-positioned to support municipal capital programs, particularly roadway improvements, site development, drainage, and infrastructure rehabilitation assignments.~~ Brings scalable resources and flexibility to assist with peak workload demands and specialized task orders. Best suited for: Targeted capital improvement projects, redevelopment initiatives, and support roles within larger City CIP programs. Closest Office: Boca Raton, FL.

Fort Lauderdale. Excellent technical approach. Provided
their recent, current, & projected workloads, along
with staff availability. I have prior experience
with them and they are multi-disciplinary (surveying,
hydraulic modeling, civil, env., & structural).
Assembled a great team of subs. Overall
very impressed with submittal & they reviewed our CIP.
