INLET: GASKETED BELL - SDR-35 PVC

Base Coating is ASTM A-48 Class 30 Cast Iron
(Various Coatings available to fit 6.272" - 30.00" O.D. Main)
PVC Adapter is an ASTM D3034, SDR-35 Gasketed Bell
Coatings and Adapter cemented permanently in place
with two-part urethane adhesive
Base of Saddle dip-coated in Waterbased
Blumorous Coating
Strap is 24 ga. X 2.5" wide Type 304 Stainless Steel
Strap Pins are .75" dia. Type 303 Stainless Steel
T-Bolts are .375" - 16 Type 304 Stainless Steel
Nuts and Washers are Type 18-8 Stainless Steel
O-Ring is ASTM C-361-77 Tubular Polyisoprene
4" inlet requires a 4" x 6.50" oval top in the Sewer Main
6" inlet requires a 6" x 9.25" oval top in the Sewer Main
(Sewer Main must be at least 8" dia.)
Note: This Dwg. supercedes Dwg. No. R-3157-D1

WYE GRAVITY SEWER SADDLE

TO BE USED WHEN A SEWER MAIN HAS BEEN LINED
WITH A CURED IN PLACE MATERIAL.

Adjustable Repair Coupling

NOTES

- Synthetic rubber gasket is strong, durable and resilient to ultraviolet rays, ozone, fungus growth and normal sewer gases. More pliable and easier to install in cold weather applications than an Elastomeric PVC gasket.
- Sealing "O" rings under the clamp prevent pipe slippage and create a more positive seal.
- More transition couplings for dissimilar pipe types and sizes are comprised of a one-piece transition gasket, eliminating the use of bushings that are difficult to install and easy to lose on the job site.
- Surgical Grade 316 stainless steel Nut & Bolt clamps are corrosion resistant, providing outstanding protection in severe environments such as marine applications, poorly aerated or moist soils, contaminated ground conditions (particularly industrial fill sites) and where the ground water contains chloride, sulfates or bicarbonates. Increased band tension of the Nut & Bolt clamp ensures a leak-proof, root-proof seal that is resistant to both infiltration and exfiltration.
- Series 300 stainless steel shear band is the heaviest in the industry, over 33% thicker than the competition.
- Broadest range of couplings on the market in sizes ranging from 1 1/2" to 96" in diameter. Used for the alteration and rehabilitation of gravity-flow sewage pipes made of clay, cast iron, plastic, concrete, ductile iron, asbestos cement, fiber cement and truss pipe.

Specification:
Furnish and install stainless steel shielded sewer couplings, as manufactured by Mission Rubber Company. Coupling to meet ASTM C 1173. Gasket to meet ASTM C 425 Table 2, to be rubber and be environmentally certified. Series 300 stainless steel shear band with a minimum thickness of .012", surgical grade 316 stainless steel clamps with nut & bolt take up, shear ring and clamps to meet all requirements of ASTM A 240. All stainless steel parts and clamping mechanisms to be manufactured in the U.S.A. Transitional sizes to utilize a one piece gasket.
