MEMORANDUM

TO: Peter McGinnis, Fire Marshall
FROM: Phil Gonot
DATE: July 22, 2021
SUBJECT: Fire Fees for Building Permits

The difference from the regular Building Permits is that the percentage is applied for all four disciplines, rather than for Fire Prevention for one discipline. Each discipline for the regular Building Permits charge a percentage rate for each work item. The Fire Prevention needs to charge the percentage rate for the entire Construction Value which includes the four disciplines (Structural, mechanical, Electrical and Plumbing).

The language in the ordinance should read the percentage rate for the entire Construction Value including all disciplines.
