(D) *Criteria for listing on the local register.*

(1) Any site, building, structure, object or district which is listed on the National Register of Historic Places shall be automatically nominated by the Historic Preservation Committee for the local register pursuant to subsection (c) above.

(2) A site, building, structure, object, or district must meet the following criteria before it may be listed on the local register.

(a) It possesses integrity of location, design setting, materials, workmanship, and ambiance; and

(b) It is associated with events that have made a significant contribution to the broad patterns of our history; or is associated with

the lives of persons significant to our past; or embodies the distinctive characteristics of a type, period, or method of construction, or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction; or have yielded or may be likely to yield information important to history or prehistory.

(3) A property located in a district shall be designated as contributing to that district if the property is one which, by its location, design, setting, materials, workmanship, and ambiance adds to the district's sense of time and place and historical development.

(4) A property should be considered noncontributing if the property's integrity of location, design, setting materials, workmanship, and ambiance have been so altered that the overall integrity of the property has been irretrievably lost; or the property was built within the past 50 years, unless a strong justification concerning its historical or architectural merit is given or the historical attributes of the district are considered to be less than 50 years old.

(E) *Effect of listing on the local register.*

(1) The City Manager is authorized to issue and place official markers identifying designated historic properties and districts.

(2) Structures and buildings listed individually on the local register or judged as contributing to the character of a district listed on the local register shall be deemed historic and entitled to modified enforcement of the South Florida Building Code as provided by Section 104.9.

(3) No demolition, alteration, relocation or construction activities may take place on designated historic properties or within the boundaries of designated historic districts except as provided below.

§ 159.15 CERTIFICATES OF APPROPRIATENESS.

(A) *When required.*

(1) A certificate of appropriateness shall be required for any of the following activities on properties that are contributing structures within the historic register:

(a) Any material change or alteration in the exterior appearance of existing buildings, objects or structures.

(b) Demolition of any building, object or structure.

(c) The movement or relocation of any building object or structure.

(d) Any new construction of principal or accessory buildings or structures.

(e) Disturbance of an archaeological site.

(f) Division of a tract or parcel or land into two or more lots.

(2) Upon designation of a historic district or individual historic property, the designating ordinance shall prescribe those architectural features considered significant to the district or property and the type of regulated work items other than those requiring a City permit, that should be reviewed for appropriateness.

(3) For each of the regulated work items listed in the designating ordinance, the following applies:

(a) *Ordinary maintenance.* If the work constitutes "ordinary maintenance" as defined in this part, the work may be done without a certificate of appropriateness.

(b) *Committee approval.* If the work is not "ordinary maintenance" and will not result in preserving the "original appearance", a certificate of appropriateness must be obtained from the Historic Preservation Committee before the work may be done.

(4) A certificate of appropriateness shall be a prerequisite to the issuance of any other permits required by law. The issuance of a certificate of appropriateness shall not relieve the applicant from obtaining other permits or approvals required by the City. A building permit or other municipal permit shall be invalid if it is obtained without a certificate of appropriateness required for the proposed work.

(B) *Criteria for issuing.*

(1) The decision on all certificates of appropriateness, except those for demolition, shall be guided by the Secretary of the Interior's General Standards for Preservation Projects and Specific Standards for Rehabilitation stated as follows:

(a) Every reasonable effort shall be made to provide a compatible use for a property which requires minimal alteration of the building,

structure, or site and its environment, or to use a property for its originally intended purpose.

(b) The distinguishing original qualities or character of a building, structure, or site and its environment should not be destroyed. The removal or alteration of any historic material or distinctive architectural features should be avoided when possible.

(c) All buildings, structures, and sites shall be recognized as products of their own time. Alterations that have no historical basis and which seek to create an earlier appearance shall be discouraged.

(d) Changes that took place in the course of time are evidence of the history and development of a building, structure, or site and its environment. These changes may have acquired significance in their own right, and this significance shall be recognized and respected.

(e) Distinctive stylistic features or examples of skilled craftsmanship which characterize a building, structure, or site shall be treated with sensitivity.

(f) Deteriorated architectural features should be repaired rather than replaced, wherever possible. In the event replacement is necessary, the new material shall wherever possible match the material being replaced in composition, design, color, texture, and other visual qualities. Repair or replacement of missing architectural features shall wherever possible be based on accurate duplication of features, substantiated by historic, physical, or pictorial evidence rather than on conjectural designs or the availability of different architectural elements from other buildings or structures.

(g) The surface cleaning of structure shall be undertaken with the gentlest means possible. Sandblasting and other cleaning methods that will damage the historic building materials should be avoided.

(h) Every reasonable effort should be made to protect and preserve archaeological resources affected by, or adjacent to any acquisition, protection, stabilization, preservation, demolition, rehabilitation, restoration, or reconstruction project.

(i) Contemporary design for alterations and additions to existing properties shall not be discouraged when such alterations and additions do not destroy significant historical, architectural or cultural material, and such design is compatible with the size, scale, color, material, and character of the property, neighborhood or environment.

(j) Wherever possible, new additions or alteration to structures shall be done in such a manner that if such additions or alterations were to be removed in the future, the essential form and integrity of the structure would be impaired.

(2) In recommending approval or denial of an application for a certificate of appropriateness for new construction, the Committee shall require the following features of the proposed building be visually compatible with the existing contributing structures in a designated historic district:

- (a) Height
- (b) Scale
- (c) Massing
- (d) Setbacks
- (e) Fenestration
- (f) Roof shape
- (g) Use of materials
- (h) Directional expression
- (i) Style
- (j) Site plan.

(3) In addition to the guidelines provided in paragraph (1) above, issuance of certificates of appropriateness for relocations shall be guided by the following factors:

- (a) The historic character and aesthetic interest the building, structure, or object contributes to its present setting;
- (b) Whether there are definite plans for the area to be vacated and the effect of those plans on the character of the surrounding area;
- (c) Whether the building, structure, or object can be moved without significant damage to its physical integrity; and
- (d) Whether the proposed relocation area is compatible with the historical and architectural character of the building, structure or object.

(4) Issuance of certificates of appropriateness for demolitions shall be guided by the following guidelines:

(a) The historic or architectural significance of the building, structure or object;

(b) The importance of the building, structure, or object to the ambience of a district;

(c) The difficulty or the impossibility of reproducing such a building, structure or object because of its design, texture, material, detail, or unique location;

(d) Whether the building, structure, or object is one of the last remaining examples of its kind in the neighborhood, the county or the region;

(e) Whether there are definite plans for reuse of the property if the proposed demolition is carried out, and the effect of those plans on the character of the surrounding area;

(f) Whether reasonable measures can be taken to save the building, structure, or object from collapse; and

(g) Whether the building, structure, or object is capable of earning reasonable economic return on its value.

(5) Issuance of a certificate of appropriateness for any division of a tract or parcel of land into two or more lots shall be guided by these criteria:

(a) To what extent the proposed division will disrupt the historic pattern of development;

(b) The intended use of the proposed division;

(c) The compatibility of the use of the proposed division with the surrounding historic district; and

(d) To what extent the owner of the property will experience an economic hardship if the request is denied.

(6) At no time shall an owner's rights of ownership with any other legal entitlement to repair, paint, alter, sell or raze their property be denied.

(7) No decision of the Committee shall result in undue economic hardship for the property owner. The Committee shall have authority to

determine the existence of such hardship in accordance with the procedure established in §159.16.

(C) *Procedure.*

(1) A person wishing to undertake any of the action specified in (A) above shall file an application for a certificate of appropriateness and supporting documents, with the Department of Development Services.

(2) The prospective applicant shall confer with the Department of Development Services concerning the nature of the proposed action and requirements related to it. The Department of Development Services shall advise the applicant of the nature and detail of the plans, designs, photographs, reports or other exhibits required to be submitted with the application. Such advice shall not preclude the Historic Preservation Committee from requiring additional material prior to making its determination in the case. Following the conference with the Department of Development Services, a pre-application conference shall be held with the Historic Preservation Committee if requested by the applicant.

(3) Upon receipt of a completed application and all required submittals and fees, the Department of Development Services shall place the application on the next regularly scheduled meeting of the Historic Preservation Committee allowing for notice as required herein. The Committee shall act upon an application within 60 days of receipt of the completed application. Applications for certificates of appropriateness may be heard at specially called meetings of the Historic Preservation Committee provided all notice requirements are met. Upon mutual agreement between the applicant and the Department of Development Services, the application may be set for hearing at a meeting later than the next regularly scheduled meeting.

(4) No less than ten days, but not more than thirty (30) days, prior to the meeting at which the application is to be heard, the Department of Development Services shall give the following notice:

(a) Written notice of the time and place of the meeting shall be sent to the applicant and all persons or organizations filing written requests with the Department of Development Services.

(b) One advertised notice in a newspaper of general circulation, or a notice posted upon the property for which the certificate of appropriateness has been applied. Such posted notice shall be at least 11 inches by 17 inches in size, and shall be posted within ten feet of the right-of-way and be visible from the right-of-way. One notice shall be posted for each 200 feet of road frontage along all roadways bordering the property.

(5) The hearing shall be held at the time and place indicated in the notice. The decision of the Historic Preservation Committee shall be made at the hearing.

(6) The Historic Preservation Committee shall use the criteria set forth in (b) above to review the completed application and accompanying submittals. After completing the review of the application and fulfilling the public notice and hearing requirements set forth above, the Committee shall take one of the following actions:

(a) Grant the certificate of appropriateness with an immediate effective date;

(b) Grant the certificate of appropriateness with special modifications and conditions;

(c) Delay granting the certificate of appropriateness for a demolition for a period of not less than thirty (30) days nor more than sixty (60) days; unless a shorter period is deemed appropriate by the Building Official;

(d) Deny the certificate of appropriateness.

(7) The Historic Preservation Committee shall make written findings and conclusions that specifically relate the criteria for granting certificates of appropriateness. All parties shall be given the opportunity to present evidence through documents, exhibits, testimony, or other means. All parties shall be given the opportunity to rebut evidence through cross-examination or other means.

(8) The secretary to the Committee shall record and keep records of all meetings. The records shall include the vote, absence, or abstention of each member upon each question, all official actions of the Historic Preservation Committee, and the findings and conclusions of the Committee. All minutes shall be filed in the Office of the City Clerk.

(9) Any person aggrieved by a decision reached by the Historic Preservation Committee may appeal the decision to the City Commission by filing a written notice of appeal with the city Manager within 10 days of the decision and shall state the reasons for the appeal. The decision of the Committee shall be stayed until such time as the appeal is decided. The City Commission shall hold a public hearing and approve, approve with modifications or disapprove the application within 60 days after receiving the appeal. The City Commission shall follow all applicable ordinances in arriving at its decision, may receive new evidence and shall not be bound by the strict rules of evidence. A decision to reverse a Commission decision shall be by a majority vote.

(10) No work for which a certificate of appropriateness is required may be undertaken unless a certificate of appropriateness authorizing the work is conspicuously posted on the property where the work is to be performed.

(11) Notwithstanding any prior provisions of this division to the contrary, only owners who have agreed in writing that their property(ies) be identified as having historic significance should conform to the requirements of this division.

(12) The Committee may grant a certificate of appropriateness as requested by a property owner, for demolition that may provide for a delayed effective date. The effective date of the certificate will be determined by the Committee based on the relative significance of the structure and the probable time required to arrange a possible alternative to demolition.

(13) During the demolition delay period, the Committee may take such steps as it deems necessary to preserve the structure concerned. Such steps may include, but are not limited to, consultation with community groups, public agencies, and interested citizens, recommendations for acquisition of property by public or private bodies, or agencies, and exploration of the possibility of moving one or more structures or other features.

(14) The Committee may, with the consent of the property owner, request that the owner, at the owner's expense, salvage and preserve specified classes of building materials, architectural details and ornaments, fixtures, and the like for reuse in the restoration of the other historic properties. The Committee may, with the consent of the property owner, request that the Pompano Beach Historical Society, or the owner, at the owner's expense, record the architectural details for archival purposes prior to demolition. The recording may include, but shall not be limited to photographs, documents, and scaled architectural drawings. At the Committee's option, and with the property owner's consent, the Committee or the Pompano Beach Historical Society may salvage and preserve building materials, architectural details, and ornaments, textures, and the like at their expense, respectively.

§ 159.16 UNDUE ECONOMIC HARDSHIP.
