**Re: Festival Flea Market (Pompano Beach)
Parking Demand Analysis
Parcel ID 4842-21-07-0010**

JFO Group Inc. has been retained to determine the peak parking demand at the Festival Flea Market property. The site is located at the southwest corner of Sample Road (SR-834) and NW 27th Avenue in the City of Pompano Beach, Florida. Figure 1 shows the project location in relation to the transportation network.

In order to determine peak parking demand on the subject site, field parking counts were collected on 30-minute increments on Thursday 07/28 from 10AM to 5PM and on Saturday 7/30 from 10AM to 6PM. Parking demand was then adjusted based on the 2019 F-DOT Peak Season Factor applicable to the project area.

Figure 2 summarizes the field data collection corrected for off-peak season conditions compared to existing and required parking supply. Exhibit 1 includes a summary of the field data and peak season factors.

This analysis shows that the calculated peak seasonal parking demand for the site is 592 parking spaces where 1,528 parking spaces are required by Code and 1,441 parking spaces are currently being provided.

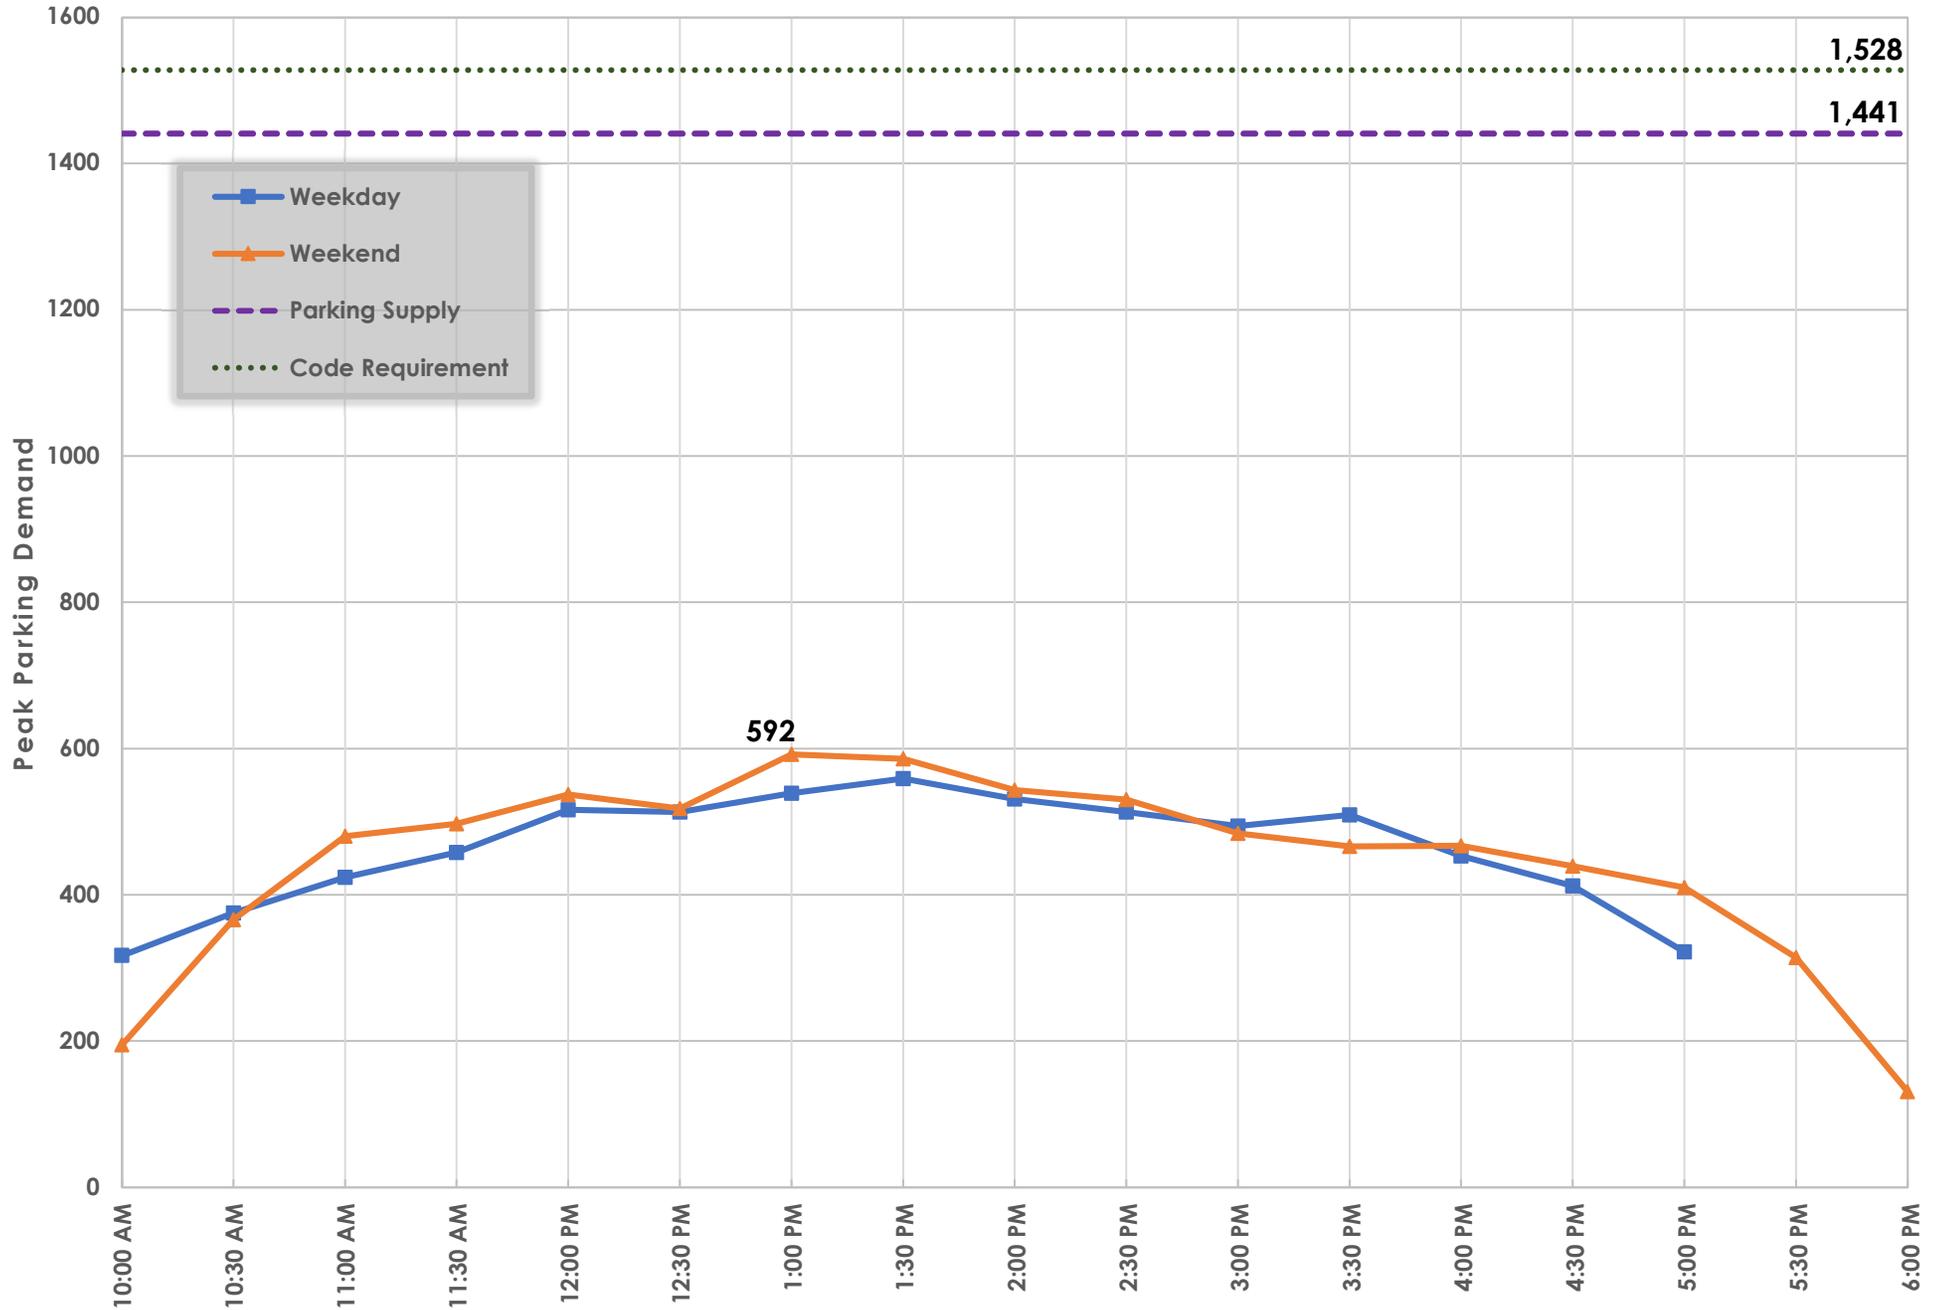

Therefore, there are enough parking spaces on site to meet the peak hour demand of 592 vehicles. It is important to note that the calculated parking demand includes several vehicles parked overnight that sometimes are left throughout the day. Exhibit 2 includes site pictures taken about 30 minutes before the Festival Flea Market opened to the public on Saturday July 30, 2022. As can be seen in Exhibit 2, these are not passenger cars of Festival Flea Market costumers, but actually commercial vehicles being stored on site.

In summary, the Festival Flea Market property will have enough parking supply to accommodate its peak parking demand on site.
