

MEMORANDUM

TO: City of Pompano Beach Commission

FROM: Russell Ketchem, Director of Solid Waste Services 

COPY: Greg Harrison, City Manager

SUBJECT: Approval of Purchase of Underground Container Service Vehicle

DATE: 10 March 2021

The Solid Waste Services department is seeking approval to purchase the service vehicle needed for the Underground Refuse Systems pilot program. This program provides for the placement of underground garbage containers. The service truck and containers for this program are proprietary to Underground Refuse Systems Inc. which is the exclusive North American licensee for the Nord Engineering patented Underground Solid Waste Containment and Collection system.

The vehicle is an Autocar Diesel ACX-R chassis fully outfitted and operational to collect the underground solid waste containers at an estimated cost of \$479,347.00.

The container vehicle is listed in the previously approved Master Equipment Lease/Purchase Agreement, Resolution 2021-59.
