**D R C**

Students generated are based on the student generation rates contained in the currently adopted Broward County Land Development Code. Information contained herein is current as of the date of review. A traditional cohort survival methodology is used to project school-by-school District traditional school enrollment out over the next five years, and a proportional share of charter school enrollment is used to project future charter school enrollment by school level Districtwide. For more information: <http://www.broward.k12.fl.us/dsa/EnrollmentProjections.html>. The annual benchmark enrollment is taken on the first Monday following Labor Day and is used to apply individual charter school enrollment impacts against school facility review processes.

\*This number represents the higher of: 100% gross capacity or 110% permanent capacity. \*\*The first Monday following Labor Day. \*\*\*Greater than 100% exceeds the adopted Level of Service (LOS).

### PLANNED AND FUNDED CAPACITY ADDITIONS IN THE ADOPTED DISTRICT EDUCATIONAL FACILITIES PLAN

| School(s)            | Description of Improvements   |
|----------------------|---|
| Cypress Elementary   | There are no classroom additions scheduled in the ADEFP that will increase the reflected FISH capacity. |
| Pompano Beach Middle | There are no classroom additions scheduled in the ADEFP that will increase the reflected FISH capacity. |
| Blanche Ely High     | There are no classroom additions scheduled in the ADEFP that will increase the reflected FISH capacity. |

Students generated are based on the student generation rates contained in the currently adopted Broward County Land Development Code. Information contained herein is current as of the date of review. A traditional cohort survival methodology is used to project school-by-school District traditional school enrollment out over the next five years, and a proportional share of charter school enrollment is used to project future charter school enrollment by school level Districtwide. For more information: <http://www.broward.k12.fl.us/dsa/EnrollmentProcess.html>. The benchmark enrollment count taken on the first Monday following Labor Day is used to apply individual charter school enrollment impacts against school facility review processes.

## Comments

The application proposes 99 (72 one bedroom and 27 two or more bedroom) mid-rise units, which is anticipated to generate 5 (1 elementary, 1 middle and 3 high school) students.

The school Concurrency Service Areas (CSA) serving the project site in the 2021/22 school year include Cypress Elementary, Pompano Beach Middle and Blanche Ely High Schools. Based on the Public School Concurrency Planning Document (PSCPD), the impacted schools are currently operating below the Level of Service Standard (LOS), which is established as the higher of: 100% gross capacity or 110% permanent capacity. Incorporating the cumulative students anticipated from this project and approved and vested developments anticipated to be built within the next three years (2021/22- 2023/24), these schools are expected to maintain their current status through the 2023/24 school year. Additionally, the school capacity or Florida Inventory of School Houses (FISH) for the impacted schools reflects compliance with the class size constitutional amendment.

The charter schools located within a two-mile radius of the site in the 2021/22 school year and associated data is depicted above. Students returning, attending or anticipated to attend charter schools are factored into the five-year student enrollment projections for District schools. Enrollment projections are adjusted for all elementary, middle and high schools impacted by a charter school until the charter school reaches full enrollment status.

To ensure maximum utilization of the impacted CSA, the Board may utilize school boundary changes to accommodate students generated from developments in the County.

Capital Improvements scheduled in the currently Adopted District Educational Facilities Plan (DEFP), Fiscal Years 2021/22 to 2025/26 regarding pertinent impacted schools are depicted above.

This application satisfies public school concurrency on the basis that there is adequate school capacity anticipated to be available to support the project as proposed. This preliminary determination shall be valid for 180 days for a maximum of 99 (72 one bedroom and 27 two or more bedroom) mid-rise units and conditioned upon final approval by the applicable governmental body. As such, this Preliminary School Capacity Availability Determination (SCAD) Letter will expire on December 12, 2022. This preliminary school concurrency determination shall be deemed to be void unless prior to the referenced expiration of the preliminary SCAD, notification of final approval to the District has been provided and/or an extension of this preliminary SCAD has been requested in writing and granted by the School District. Please be advised that expiration of the SCAD will require a submission of a new application and fee for a new public school concurrency determination. Upon the District's receipt of sufficient evidence of final approval which shall minimally specify the number, type and bedroom mix for the approved residential units, the District will issue and provide a final SCAD letter for the approved units, which shall ratify and commence the vesting period for the approved residential project.

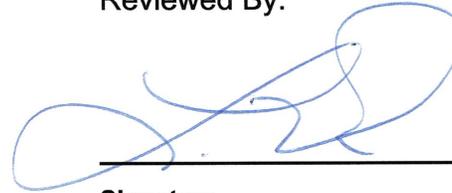

Please be advised that if a change is proposed to the development, which increases the number of students generated by the project, the additional students will not be considered vested for public school concurrency.
