The diagram illustrates a two-stage, two-dimensional, multi-processor architecture. It features a central processing unit (CPU) at the top, which is connected to a memory unit (MEM) and a bus system (BUS). The CPU is divided into two main sections: a control section and a data section. The control section includes a control unit (CU) and a control register (CR). The data section includes a data register (DR) and a data unit (DU). The memory unit (MEM) is connected to the bus system (BUS) and the data unit (DU). The bus system (BUS) is a multi-processor architecture that allows for parallel processing of data. The diagram also shows a flow of data from the CPU to the memory unit and back.
