**Subject: Report of Phase I Environmental Site Assessment
Denny's Restaurant
2671 N Federal Highway
Pompano Beach, Broward County, Florida
E Sciences Project Number 2-0965-019**

Dear Mr. Sfiropoulos,

E Sciences, Incorporated (E Sciences) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above referenced site. A summary of findings is provided in the Executive Summary. Please read the report in its entirety for a comprehensive understanding of the items contained in the Executive Summary.

This report is intended for the use of our Client only, subject to the terms and conditions of our agreement. If other parties wish to rely on this report, please have them contact E Sciences so that a mutual understanding and agreement of the terms and conditions for E Sciences' services can be established via a Secondary Client Agreement prior to their reliance of this information.

We appreciate the opportunity to perform these services for you. Please contact us at 954-484-8500 if you have questions regarding this information.

Sincerely,

E SCIENCES, INCORPORATED

SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312. I have the specific qualifications based on education, training, and experience to assess a Site of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Nadia G. Locke, P.E.
Associate

EXECUTIVE SUMMARY

Report of Phase I Environmental Site Assessment 2671 N Federal Highway Pompano Beach, Broward County, Florida E Sciences Project Number 2-0965-019

This Phase I Environmental Site Assessment (ESA) was performed in general accordance with the Work Authorization issued by the City of Pompano Beach on October 16, 2018 and in general accordance with the consensus document known as ASTM International (ASTM), *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, Designation E 1527-13. Deviations from this standard are described in Section 1.4 of this report.

The purpose of the Phase I ESA was to identify potential sources of environmental contamination that constitute recognized environmental conditions (RECs), as defined by ASTM, by reviewing regulatory information and historical data, and by visual observations of the site (Site) and surrounding area. The definition of a REC is included in Section 11.0 of this report. E Sciences also conducted a Tier 1 and non-invasive Tier 2 vapor encroachment screening (VES) in general accordance with the *ASTM Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (Designation E2600-15). The purpose of the VES was to screen the Site for a vapor encroachment condition (VEC) using the information collected during the course of conducting the Phase I ESA. We note that an asbestos survey was also conducted and that report is provided under separate cover. A cursory summary of findings is as follows:

- The Site has an area of approximately 42,385 square feet and is developed with a restaurant building and parking lot and is currently vacant. The Site is being considered for purchase by the City of Pompano Beach for potential redevelopment.
- The Site was developed with two larger buildings located on the west portion of the Site as early as 1947. The eastern portion of the Site was undeveloped at that time. The two buildings remained onsite through 1973 and were no longer present in 1976. A third building had been constructed in the center of the Site in the 1958 historic aerial photograph and was no longer present in 1976. The current building and associated parking lot were observed in the 1976 aerial photograph. Broward County property appraiser records indicate the existing building was constructed circa 1975. Based upon review of city directories available between 1958 and 2014, the Site was occupied by Hillsboro Motel as early as 1958. Denny's Restaurant was listed at the site's address between 1980 and 2005. A Restaurant and building materials supply company were listed at this address in 2010 and 2014.
- The Site is located in an area historically occupied by commercial and businesses.. Adjacent to the north of the Site is a car dealership with a large parking area, a car wash area and an office building. The dealership parking lot extends to the south of the Site.

The lot adjacent south of the Site is currently under construction. Federal Highway is located along the eastern boundary of the Site followed by commercial buildings.

- Based on review of regulatory and historical records, several regulated facilities were identified within the vicinity of the Site. We did not identify indications of releases or discharges of petroleum products or hazardous substances associated with the Site or adjacent facilities that may have affected the Site.
- A Phase I ESA was previously performed for the Site in 2006 by URS. The report recommended a Phase II investigation be performed to identify potential impacts to Site based on a historic open petroleum discharge documented on the property located at 2800 N Federal Highway (Sheenan Pontiac GMC Trucks/Sheenan Autoplex). Based on regulatory review conducted during this current Phase I ESA, we determined that the groundwater contamination is delineated within the facility boundaries and has not migrated in the direction of the Site. Based on this updated information, it is our opinion that this facility is not likely to have impacted the Site.

This assessment has revealed no evidence of RECs or VECs.

1.0 INTRODUCTION

1.1 Location and Legal Description

The Site is comprised of one parcel of land located at 2671 North Federal Highway (Folio ID 484319250010), in Pompano Beach, Broward County, Florida. The Site location is depicted on **Figure 1**, which is included in **Appendix A**.

The Site has an area of approximately 42,385 square feet and is occupied by a vacant restaurant facility. The Site is located in an area primarily developed with commercial properties.

A United States Geological Survey (USGS) topographic map was used to help evaluate topographic information (**Figure 2**) and **Figure 3** provides aerial coverage for the Site and surrounding properties. These figures can be found in **Appendix A**.

1.2 Purpose

E Sciences, Incorporated (E Sciences) was engaged by the City of Pompano Beach (our Client) to perform a Phase I Environmental Site Assessment (ESA) of the Site. The purpose of E Sciences' services was to review environmental conditions based on reasonably ascertainable and practically reviewable public records and site observations to identify recognized environmental conditions (RECs), if present, to support our client's ability to qualify for landowner liability protections (LLPs) to Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability. The goal of conducting a Vapor Encroachment Screening (VES) was to identify a vapor encroachment condition (VEC), if it exists, at the Site. A VEC is the presence or likely presence of chemicals of concern (COC) vapors in the vadose zone of the Site caused by the release of vapors from contaminated soil and/or groundwater either on or near the Site.

1.3 Scope of Services and Special Terms and Conditions

Our Client authorized our services on October 16, 2018 and our services were performed in accordance with Work Authorization issued by the City and in general conformance with the ASTM International (ASTM) document titled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, Designation E 1527-13. Please refer to our Work Authorization for a description of our scope of services, and special terms and conditions that may apply to this project.

This report is covered by the limitations as set forth herein, and is for the exclusive use of our Client. No other use of this report, in whole or in part, except as directed by legal jurisdiction, is

allowed without written approval of our Client and E Sciences. Use by any unauthorized parties is at the sole risk of the user.

1.4 Limitations, Deviations, Exceptions and Assumptions

Although this assessment has attempted to identify RECs associated with the Site, potential sources of information that may have been germane to this finding may have escaped detection due to a variety of circumstances including the following:

- the limited scope of this assessment;
- the inaccuracy and availability of public records;
- the presence of undetected or unreported environmental incidents;
- inaccessible areas; or
- concealment of detrimental information by others.

It was not the purpose of this study to determine the actual presence, degree or extent of contamination, if any, at the Site. This could require additional exploratory work, including sampling and laboratory analysis.

Due to the limited nature of a Phase I ESA, there is a possibility that conditions may exist which were not apparent at the time of report preparation. It is also possible that the methodologies employed at the time of the report may later be superseded by other methodologies or standards. The description, type, and composition of what are commonly referred to as “hazardous substances” or “petroleum products” can also change over time. E Sciences does not accept responsibility for changes in the state of the art, nor for changes in the definitions of hazardous substances, petroleum or conditions. E Sciences believes that the findings and conclusions provided in this report are reasonable. However, no other warranties are implied or expressed.

There were no deviations from the ASTM Standard Practice E1527-13 for this Phase I ESA. There were no significant assumptions made by E Sciences during the performance of this Phase I ESA.

2.0 USER PROVIDED INFORMATION

The “All Appropriate Inquiries” Final Rule (40 CFR Part 312) requires that the below considerations be performed by or on behalf of the “User” (who is seeking to qualify for a LLP to CERCLA liability). These items should be provided to the environmental professional as such information can assist in identifying RECs. Information to complete this section was requested of our Client in the form of a User Questionnaire attached to our proposal. Based upon our understanding of the project, the City of Pompano Beach will be the “User” of this document. Mr. John Sfiropoulos, City Engineer, has provided information on behalf of the user for this project.

2.1 Title Records

Historic land title records were not reviewed as part of our scope of services. E Sciences obtained the following information from the Broward County Property Appraiser’s web-based property search:

- The Site is currently owned by National Retail Properties, LP.
- The existing building was constructed circa 1975.
- The property’s land use is listed as restaurant/cafeteria.

2.2 Environmental Liens

According to the User, they did not identify environmental liens filed or recorded against the Site under federal, tribal, state or local law.

2.3 Activity and Use Limitations

E Sciences researched the Florida Department of Environmental Protection (FDEP) Institutional Controls Registry website and the Site was not listed. According to the User, they did not identify activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls filed or recorded against the Site under federal, tribal state or local law.

2.4 Specialized Knowledge or Experience

The User indicated that he did not have any specialized knowledge or experience related to the Site or nearby properties.

2.5 Relationship of Purchase Price to the Fair Market Value

According to the User, the purchase price of the Site reasonably reflects the fair market value of the Site if the property were not contaminated. The potential connection between the price and the fair market value and whether the lower purchase price is because contamination is known or believed to be present at the Site should be considered by a potential purchaser.

2.6 Commonly Known or Reasonably Ascertainable Information

The User indicated that the property was previously occupied by a Denny's restaurant. The User indicated that he was not aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases.

2.7 Degree of Obviousness of the Presence or Likely Presence of Contamination

The User did not state knowledge or experience related to the Site that indicated that there were obvious indicators that point to the presence or likely presence of releases at the Site.

2.8 Provided Reports

Previous environmental or geotechnical reports for the Site were requested from the Client. The Client provided a copy of a Phase I ESA prepared by URS dated May 23, 2006 for the Site. The report documented the following findings:

- The Site was occupied by a Denny's restaurant at that time.
- The Site was vacant in 1950 and occupied by a commercial building by 1962. Based on the historic review conducted, the Site was occupied by a hotel prior to the Denny's restaurant. The hotel operations ceased between 1958 and 1975 when the current operations of the Denny's restaurant began. Reportedly, the site remained vacant land between the end of the hotel operations and the construction of Denny's in 1975.
- The Phase I ESA identified the Sheehan Autoplex facility as an REC noting that the facility was adjacent to the subject property. Specific information regarding an open petroleum discharge recorded at this facility was not available for review during the 2006 Phase I ESA. The facility was addressed at 2800 North Federal Highway.
- The report recommended a Phase II investigation be performed to identify potential impacts to the subject site from this above referenced off site facility.
- The report recommended assessment of the existing building for the presence of asbestos containing materials (ACMs) and lead-based paint prior to any renovation or demolition activities.

3.0 RECORDS REVIEW

3.1 Standard Environmental Record Sources

E Sciences has performed a review of selected environmental database information published by federal and state regulatory agencies to evaluate if the Site or nearby properties are listed as having a past or present record of actual or potential adverse environmental impacts, or are under investigation for potential adverse environmental impacts. This review may have also included county or local records, if reasonably ascertainable and determined to be useful.

An E Sciences subcontractor prepared the database information utilized herein. A copy of the database report is provided in **Appendix B**. The search distances were based on the search distance guidelines set forth in ASTM E1527-13, and are supplemented with lists beyond those listed by the ASTM guidelines. **Table 3-1** summarizes the relevant facilities that were identified in proximity of the Site.

TABLE 3-1 RELEVANT LISTED FACILITIES WITHIN 800 FEET			
FACILITY NAME LOCATION	ESTIMATED DISTANCE AND DIRECTION FROM SITE	DATABASE LISTINGS	COMMENTS
Car-Spa 2571 N Federal Highway	155 feet South	UST	This facility reportedly houses two USTs storing unleaded gasoline. No records of the size or contents USTs were identified in the databases reviewed. No records of discharges or contamination were identified in the regulatory records reviewed for this facility.
Smileys Glass Service/USA Transmission 2600 N Federal Highway	150 feet Southeast	EDR Historical Auto Broward Co. HM RCRA NonGen NLR FINDS ECHO	A hazardous material management facility license has been issued for this site. The hazardous waste stream listed under the license is petroleum products, solvents and batteries. No records of discharges or contamination were identified in the regulatory records reviewed for this facility.

TABLE 3-1 RELEVANT LISTED FACILITIES WITHIN 800 FEET			
FACILITY NAME LOCATION	ESTIMATED DISTANCE AND DIRECTION FROM SITE	DATABASE LISTINGS	COMMENTS
Broward County WWS RMPS 226 2600 NE 16th Avenue	215 feet Southwest	UST Financial Assurance Broward Co. HM	A hazardous material management facility license has been issued for this site. The hazardous waste stream listed under the license is lamps. A UST storing diesel fuel associated with the emergency generator was noted to operate at the site. No records of discharges or contamination were identified in the regulatory records reviewed for this facility.
Beacon Light Cities/ Union 76-Jimmys 2500 N Federal Highway	310 feet Southeast	EDR Hist Auto, LUST, UST, Financial Assurance, NPDES	A petroleum discharge was documented at this facility in August 1989. Upon completion of assessment activities, the discharge was granted no further action status in April 2009. No other records of discharges or contamination were identified in the records reviewed.
Pompano Ford Lincoln 2741 N Federal Highway	275 feet North	RCRA-CESQG, UST, US AIRS, FINDS, ECHO, Broward Co. HM	Two former USTs containing unleaded gasoline and waste oil have been removed from this facility. The facility currently holds a hazardous material management facility license. The hazardous waste stream listed under the license is petroleum products, solvents, paint thinner, paint and batteries. No regulated storage tanks are currently registered for this facility. No records of discharges or contamination were identified in the regulatory records reviewed for this facility.

TABLE 3-1 RELEVANT LISTED FACILITIES WITHIN 800 FEET			
FACILITY NAME LOCATION	ESTIMATED DISTANCE AND DIRECTION FROM SITE	DATABASE LISTINGS	COMMENTS
Ripkas Texaco Service Station 2761 N Federal Highway	275 feet Northeast	EDR Hist Auto	No records of discharges or contamination were identified in the records reviewed for this facility.
Direct Oil Company 2750 N Federal Highway	500 feet North	EDR Hist Auto	No records of discharges or contamination were identified in the records reviewed for this facility.
Bright Spic N Span/ Pompano One Price Drycleaners 1819 NE 25TH ST	550 feet Southeast	DRYCLEANERS, Broward Co. HM, EDR Hist Cleaner	The facility currently holds a hazardous material management facility license. The hazardous waste stream listed under the license is petroleum solvents and waste filters. No records of discharges or contamination were identified in the regulatory records reviewed for this facility.
Sheehan GMC Auto Body 2800 N Federal Highway	485 feet Northeast	RCRA-SQG, LUST, UST, US AIRS, Financial Assurance, Broward Co. EDIEAR, Broward Co. HM	Petroleum contamination has been documented within the property boundaries of this facility. The discharge was discovered in January 2015. The contamination is currently undergoing assessment. Based on the Site Assessment Report Addendum (SARA) dated July 9, 2018, natural attenuation monitoring has been recommended for this facility. The former USTs have been removed from this facility.

TABLE 3-1 RELEVANT LISTED FACILITIES WITHIN 800 FEET			
FACILITY NAME LOCATION	ESTIMATED DISTANCE AND DIRECTION FROM SITE	DATABASE LISTINGS	COMMENTS
Marathon Pompano #602/Amoco Service Station 2801 N Federal Highway	775 feet North	RCRA NonGen / NLR, FINDS, ECHO, LUST, UST, CLEANUP SITES, DWM CONTAM, Broward Co. HM	This facility is currently an active fuel service station housing three USTs containing unleaded gasoline. A petroleum discharge was recorded for this facility in December 1988. Active remediation for the contamination associated with this discharge is ongoing. Based on the latest Remedial Action Report dated July 2018, groundwater contamination remains onsite and within site boundaries.

The orphan list included in the database search report is a list of “unmappable” sites. The nature of the regulatory information for these sites identified on this list was reviewed. In addition, the potential proximity to the site was evaluated based upon area knowledge, partial addresses provided, and our off-site reconnaissance. We did not identify orphan sites to be of concern to the Site.

Please refer to **Appendix B** for a description of the individual databases, listed facilities, the search distances, and a listing of the facilities that were not considered relevant and therefore not included in the report.

3.2 Additional Environmental Record Sources

E Sciences reviewed the FDEP Contamination Locator Map and Map Direct Area of Interest Report. No additional facilities were identified in close proximity to the Site.

3.3 Physical Setting Source(s)

A consideration of surface drainage and geology are of interest because they provide an indication of the direction that contamination, if present, could be transported within the Site or to the Site from surrounding properties. It was not the purpose of this study to evaluate the geotechnical conditions of the Site or to assess engineering or geological concerns such as

foundation conditions, faulting, or subsidence. E Sciences reviewed the following information with regard to the development of the presumed local and regional geology and hydrogeology of the Site and surrounding area:

- Geologic Map of the State of Florida (2001)
- USGS topographic map, 7.5 minute series, Quadrangle 1801, Pompano Beach
- Geologic units in Broward County, Florida by USGS Mineral Resources Online Spatial Data, last modified November 2014

The Site is underlain by the Miami Limestone formation. The Miami Limestone consists of two facies, an oolitic facies and a bryozoan facies. The oolitic facies consists of white to orangish gray, poorly to moderately indurated, sandy, oolitic limestone (grainstone) with scattered concentrations of fossils. The bryozoan facies consist of white to orangish-gray, poorly to well indurated, sandy, fossiliferous limestone (grainstone and packstone). Beds of quartz sand are also present as unindurated sediments and indurated limey sandstones. Fossils present include mollusks, bryozoans, and corals. Molds and casts of fossils are common. The highly porous and permeable Miami Limestone forms much of the Biscayne Aquifer of the surficial aquifer system.

The USGS topographic map referenced above was reviewed for topographic information and surface drainage patterns. Topographic data indicates that the Site the area is generally flat and the Site is between five and ten feet above mean sea level (MSL). Topographic relief appears to gently slope toward the east. These topographic conditions suggest that stormwater collecting on the Site would either infiltrate into the soil, evaporate, or in the event of heavy rainfall, would sheet flow toward the adjacent properties.

Groundwater typically flows perpendicular to contour lines identified on the topographic map and, under the influence of gravity, toward points of discharge such as creeks, swamps, drainage swales, or pumped groundwater wells. Review of topographical data suggests that groundwater flow tends to be toward the east. The groundwater flow evaluation documented in assessment report reviewed for adjacent properties under Section 3.1, concludes that the groundwater flows east to northeast in this area. It should be noted, however, that the direction of groundwater flow could be altered locally by changes in surface topography and human-made modifications. If determining the actual groundwater flow direction is necessary, then piezometric measurements would be required.

3.4 Historical Use Information on the Site and Adjoining Properties

E Sciences reviewed reasonably ascertainable historical sources to develop a history of the previous uses of the property and the area within the vicinity of the Site, to help identify the

likelihood of past uses having led to RECs in connection with the Site. A description of each source reviewed, and the results of the review are provided within this section.

Historical aerial photographs were reviewed to obtain information concerning the history of development on and near the subject Site. Although generally flown at medium to high altitudes, they may be useful in visually comparing historic and current conditions. They may also be helpful in determining whether conditions of apparent environmental concern, such as landfills or dumping, existed on or near the Site at the time the photographs were taken. Evaluation of these aerial photographs may be limited by the quality and scale of the photograph.

City directories are listings of residences, businesses and professional entities organized both alphabetically by name and alphanumerically by street address. Both commercial and residential listings are prevalent in the vicinity of the Site.

In the late nineteenth century, the Sanborn Company began preparing maps of central business districts for use by fire insurance companies. These fire insurance maps were updated and expanded geographically periodically through the twentieth century. The Sanborn maps often indicate construction materials of specific building structures and locations of underground gasoline storage tanks. Historical fire insurance maps were reviewed to evaluate past land uses and relevant characteristics of the site and adjoining properties. Based upon inquiries to EDR, no Sanborn Fire Insurance Map were available for the Site area.

The Site was developed with two larger buildings located on the west portion of the Site as early as 1947. The eastern portion of the Site has been cleared at that time. The two buildings remained onsite through 1973 and were no longer present in 1976. A third building had been constructed on the center of the Site on 1958 and was no longer present on 1976. The current building and associated parking lot were observed in the 1976 aerial photograph. Based upon review of city directories between 1958 and 2014, the Site was occupied by Hillsboro Motel as early as 1958. Denny's Restaurant was listed at the site's address between 1980 and 2005. A facility named Just Rite Inc and KSP Restaurant were listed at this address in 2010 and 2014. A "Google Search" was conducted for Just Rite Inc. According to www.bloomberg.com, a company called Just Rite Supply, Inc. was based in Pompano Beach. This company was cited as a building material supplier to facilities within the Southeastern United States and the Caribbean. It was incorporated in 1999.

The vicinity of the Site remained mainly undeveloped in 1947 and increased development is observed in the 1958 aerial photograph with numerous commercial buildings along South Federal Highway and vicinity. The roadway for Federal Highway is unpaved in 1947. The area adjacent west of the Site presents unpaved pathways and multiple small structures in 1947. In 1958, the lot adjacent south of the Site has been developed with one building and storage of large

equipment is observed on the western portion of the property. Federal Highway was improved as a paved road followed by land developed with buildings to the east in 1958. Undeveloped land and small buildings are observed west of the Site in 1958 and residential development is apparent along NE 16th Avenue. In 1968, a building has been constructed on the northern adjacent property. Increased development in the area is observed through the years consistent with the historical trend of commercial facilities along N Federal Highway and residential development west of NE 16th Avenue. A new building on the southern adjacent property replaced the former building by 1992 and the new building was removed by 2007. Additional buildings and structures are observed on the northern adjacent lot in 1992. The buildings are generally consistent with their current layout and the parking area appears to have expanded to the north by that time. The area adjacent west of the Site is vacant and undeveloped in 1976 and is later occupied by a parking lot on the 2002 aerial photograph. No significant changes are apparent in the area. No relevant facilities were identified in the city directories that were not documented during the environmental records reviewed and discussed under Section 3.1.

4.0 SITE RECONNAISSANCE

4.1 Methodology and Limiting Conditions

E Sciences performed a site and vicinity reconnaissance to obtain information indicating the likelihood of RECs in connection with the Site. Ms. Maria Paituvi, Senior Engineer with E Sciences, who is experienced in environmental site assessments, conducted the site visit and area reconnaissance on October 22, 2018. Mr. Chris Brown, representative of the City, accompanied Ms. Paituvi during the site visit. We requested a copy of site plans that may indicate the presence of underground utilities. A copy of those plans was not provided for our review. The site reconnaissance was performed on foot. The property boundaries were walked, and interior portions were viewed by walking several transects. The area reconnaissance was accomplished by a driving tour of the vicinity of the Site. Photographs were taken of the Site and the surrounding properties during the site visit and select photographs are included in **Appendix C**.

4.2 General Site Setting

The Site is the developed with a vacant restaurant building and associated parking lot. The buildings' interior includes a kitchen, bathroom facilities and dining areas. In addition there are several smaller rooms used for storage. Outside of the building, there are paved parking areas along the north and west sides of the building. The Site is bordered on the east, west, and north with a fence. A fenced area outside of the back of the building is dedicated for a waste dumpster. Manholes associated with the sanitary sewer and a grease trap are located in the rear of the building. The area in the front of the building is landscaped. At the time of the site reconnaissance, we discovered that water had been left running in a kitchen sink and it had caused flooding that extended into the dining area.

Adjacent to the north of the Site is a car dealership with a large parking area, a car wash area and an office building. The dealership parking lot extends to the south of the Site. The lot adjacent south of the Site is currently under construction. Federal Highway runs along the eastern boundary of the Site followed by commercial buildings.

4.3 Site Reconnaissance Observations

During site reconnaissance activities effort was taken to identify on-site conditions that may be indicative of a REC. The following tables itemize typical potential concerns associated with the Site and pertinent comments for those identified as being present on the Site. Items identified during the site reconnaissance are discussed following the tables.

TABLE 4-1 ITEMS OF POTENTIAL CONCERN EXTERIOR OBSERVATIONS	
CATEGORY	ITEM OBSERVED
Pits, Ponds, or Lagoons	No
Stained Soil or Pavement	No
Stressed Vegetation	No
Solid Waste	No
Wastewater	No
Wells	No
Septic Systems	No
Other Notable Observations	Yes

Other Notable Observations

There was a pad-mounted transformer located in the rear of the property. There was no evidence of staining on the pavement located below the transformer. We note that these transformers are owned and operated by Florida Power & Light.

TABLE 4-2 ITEMS OF POTENTIAL CONCERN INTERIOR OBSERVATIONS	
CATEGORY	ITEM OBSERVED
Hazardous Substances and Petroleum Products in Connection with Identified Uses	No
Storage Tanks	No
Odors	No
Pools of Liquids	Yes
Drums	No
Hazardous Substances and Petroleum Products (Not Necessarily in Connection with Identified Uses)	No
Unidentified Substance Containers	No
Potential Polychlorinated Biphenyls (PCB) Containing Equipment	No
Interior Observations Identifying Releases or Material Threat of Future Releases	No
Heating/Cooling	No
Stains or Corrosion	No
Drains and Sumps	No
Other Notable Observations	Yes

Pools of Liquids

During the site visit we discovered that the water was left running in the kitchen sink and caused flooding in the kitchen that extended into the dining area.

Other Notable Observations

Grease traps associated with the kitchen were observed in the parking lot. It is presumed that the grease traps are either closed loop or over flow to the sanitary sewer.

5.0 INTERVIEWS

This section provides a summary of interviews conducted regarding the Site.

5.1 Interviews with Owner

Mr. David Reif with National Retail Properties (property owner) was contacted to provide information as it relates to potential environmental conditions. Mr. Reif had no knowledge of any potential environmental conditions, hazardous materials or storage tanks being present at the Site.

5.2 Interviews with Key Site Manager

The Site is currently vacant. No key site manager was available for interview.

5.3 Interviews with Occupants

The Site is currently vacant. No occupants were available for interview.

5.4 Interviews with Past Owners, Operators or Occupants

No past owners, operators, or occupants were identified for this assessment.

5.5 Interviews with Local Government Officials

The City of Pompano Beach Fire Department was contacted for information regarding hazardous material spills, permits, releases, fires, and underground storage tanks at the Site. No response was received at this time this report was issued.

5.6 Interviews with Others

No other interviews were conducted as part of this assessment.

6.0 VAPOR ENCROACHMENT

E Sciences conducted Tier 1 and non-invasive Tier 2 VES in general accordance with the *ASTM Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (Designation E2600-15). The purpose of the VES was to screen the Site for a VEC using the information collected during the course of conducting the Phase I ESA. A VEC is the presence or likely presence of vapors of COCs in the vadose zone of the Site caused by a release of vapors from contaminated soil and/or groundwater either on or near the Site. This is accomplished by reviewing governmental records, chemical use and historical records of prior uses on the Site and within the area of concern (AOC) surrounding the Site. Such information includes property data, soil, geological and contaminant characteristics, contaminated plume migration, identification of significant conduits that may provide preferential pathways for vapor migration, groundwater depth and groundwater flow direction. For the purposes of this VES, E Sciences used the default AOCs established within the ASTM standard. The AOC was measured from the property boundary.

6.1 Tier 1 Screening

The following information was considered during the Tier 1 Screening performed:

Existing Use of the Site

The Site is occupied by a vacant restaurant building. The building includes a kitchen, bathroom facilities, dining area and storage rooms.

Planned Use of the Site

We understand that the City is considering purchasing the Site for redevelopment and demolition of the building.

Type of Structures Planned for the Site

No details of proposed structures have been provided.

Surrounding Area Description

The surrounding area is mainly occupied by commercial properties. No industrial activities were observed in the vicinity of the Site.

General Physical Setting Information

The groundwater gradient in the area of the Site is relatively flat and presumed to flow to the east. The lithology is likely to consist of sand and limestone.

Preferential Pathways

There are multiple utilities traversing the Site. The exact locations are not known, but are expected to enter the Site from Federal Highway.

User-Specialized Knowledge, Experience and Commonly Known or Reasonably Ascertainable Information

User provided information did not identify additional relevant information beyond the information E Sciences independently compiled during the course of the Phase I ESA process.

Known or Suspected Potentially Contaminated Properties with COCs within the AOC or On-site

Several facilities with documented contamination or activities that handle hazardous wastes or petroleum products as well as a historic petroleum discharges onsite were identified during the Tier 1 screening. Based on this information, E Sciences concluded that a VEC exists based upon the results of the Tier 1 screening.

6.2 Tier 2 Screening

In order to conduct a more refined screening, E Sciences conducted a non-invasive Tier 2 screening. In order to further evaluate the VECs, a detailed regulatory file review was conducted on each contaminated or potentially contaminated site identified. Site assessment reports, tank closure assessment reports, source removal reports and regulatory inspection reports were reviewed in an attempt to locate contamination sources to evaluate their potential to cause a VEC at the Site. The following known or potentially contaminated properties were evaluated:

TABLE 6-1 POTENTIALLY CONTAMINATED SITES WITHIN AOC TIER 2 EVALUATION SUMMARY			
FACILITY NAME LOCATION	ESTIMATED DISTANCE AND DIRECTION FROM SITE	COCS	COMMENTS
Car-Spa 2571 N Federal Highway	155 feet South	Petroleum	No regulatory records associated with the presence of contamination were identified in our file review. This facility does not have a documented discharge of petroleum products to the soil or groundwater. We do not consider this property to be a VEC relative to the Site.

TABLE 6-1 POTENTIALLY CONTAMINATED SITES WITHIN AOC TIER 2 EVALUATION SUMMARY			
FACILITY NAME LOCATION	ESTIMATED DISTANCE AND DIRECTION FROM SITE	COCS	COMMENTS
Smileys Glass Service/USA Transmission 2600 N Federal Highway	150 feet Southeast	Petroleum	No regulatory records associated with the presence of contamination were identified in our file review. This facility does not have a documented discharge of petroleum products to the soil or groundwater. We do not consider this property to be a VEC relative to the Site.
Broward County WWS RMPS 226 2600 NE 16th Avenue	215 feet Southwest	Petroleum	No regulatory records associated with the presence of contamination were identified in our file review. This facility does not have a documented discharge of petroleum products to the soil or groundwater. We do not consider this property to be a VEC relative to the Site.
Beacon Light Cities/ Union 76-Jimmys 2500 N Federal Highway	310 feet Southeast	Petroleum	A petroleum discharge was documented at this facility in August 1989. Upon completion of assessment activities, the discharge was granted no further action status in April 2009. Based on the regulatory closure of petroleum discharges at this facility, we do not consider this property to be a VEC relative to the Site.
Pompano Ford Lincoln 2741 N Federal Highway	275 feet North	Petroleum	No regulatory records associated with the presence of contamination were identified in our file review. Former USTs have been removed from this facility. We do not consider this property to be a VEC relative to the Site.
Ripkas Texaco Service Station 2761 N Federal Highway	275 feet Northeast	Petroleum	These sites were not identified in regulatory listings reviewed. No regulatory records associated with the presence of contamination were identified in our file review. We do not consider this property to be a VEC relative to the Site.
Direct Oil Company 2750 N Federal Highway	500 feet North	Petroleum	These sites were not identified in regulatory listings reviewed. No regulatory records associated with the presence of contamination were identified in our file review. We do not consider this property to be a VEC relative to the Site.

TABLE 6-1 POTENTIALLY CONTAMINATED SITES WITHIN AOC TIER 2 EVALUATION SUMMARY			
FACILITY NAME LOCATION	ESTIMATED DISTANCE AND DIRECTION FROM SITE	COCS	COMMENTS
Bright Spic N Span/ Pompano One Price Drycleaners 1819 NE 25TH ST	550 feet Southeast	Petroleum solvents	The facility currently holds a hazardous material management facility license. The hazardous waste stream listed under the license is petroleum solvents and waste filters. This facility does not have a documented discharge of petroleum products to the soil or groundwater. We do not consider this property to be a VEC relative to the Site.

E Sciences concludes from the Tier 2 screening that no potential VEC exists associated with the Site.

7.0 EVALUATION

This section summarizes known or suspect RECs, controlled RECs, historical RECs and *de minimis* conditions.

7.1 Findings

The Site has an area of approximately 42,385 square feet and is developed with a restaurant building and parking lot that is currently vacant. The Site is being considered for purchase by the City of Pompano Beach for potential redevelopment.

The Site was developed with two larger buildings located on the west portion of the Site as early as 1947. The eastern portion of the Site was undeveloped at that time. The two buildings remained onsite through 1973 and were no longer present in the 1976 aerial photograph. A building had been constructed near the center of the Site in the 1958 historical aerial photograph and was no longer present in 1976. The current building and associated parking lot were observed in the 1976 aerial photograph. The Broward County property appraiser records indicate that the existing building was constructed circa 1975. Based upon review of city directories reviewed between 1958 and 2014, the Site was occupied by Hillsboro Motel as early as 1958. Denny's Restaurant was listed at the site's address between 1980 and 2005. A restaurant and building supply company were also listed at this address in 2010 and 2014.

The Site is located in an area historically occupied by commercial properties. Adjacent to the north of the Site is a car dealership with a large parking area, a car wash area and an office building. The dealership parking lot extends to the south of the Site. The lot adjacent south of the Site is currently under construction. North Federal Highway runs along the eastern boundary of the Site followed by commercial buildings.

Based on review of regulatory and historical records, several regulated facilities were identified within the vicinity of the Site. We did not identify indications of releases or discharges of petroleum or hazardous substances associated with the Site or adjacent facilities have affected the Site.

A Phase I ESA was previously performed for the Site by URS. The report recommended a Phase II investigation be performed to identify potential impacts to the Site based on a historic open discharge documented on the adjacent property located at 2800 N Federal Highway (Sheenan Pontiac GMC Trucks/Sheenan Autoplex). The report indicated that an incident was in "active status" with cleanup required for this facility. Based on the regulatory review conducted during this Phase I ESA, we determined that this site is currently under a groundwater monitoring program based on petroleum contamination identified onsite in 2015, associated with the historic

operation of a gasoline station at that location. Based on an assessment report dated July 2018, the groundwater contamination is delineated within that facility's boundaries. No records of reported discharges were identified during our assessment.

7.2 Opinions

This section provides an opinion of the impact to the Site of the conditions identified in the findings section.

It is our opinion that the current activities at the Site are not likely to have resulted in the release of hazardous or petroleum products at the Site. No evidence of the current operation of storage tanks or storage/use of hazardous materials was identified during this assessment.

We did identify historic discharges of contaminants at nearby facilities; however, E Sciences did not identify compelling evidence of the presence of environmental impacts to the Site associated with these facilities.

The 2006 Phase I ESA provided to us for review identified the auto dealership located at 2800 North Federal Highway as an REC and recommended further assessment. Upon review of the information contained herein, we conclude that the 2800 North Federal Highway property is located approximately 485 feet northeast of the Site across North Federal Highway. Based on regulatory records reviewed during this assessment, no historic discharges have been reported for this facility and the groundwater contamination is delineated within the facility boundaries. Based on this updated information, this facility is not considered to have impacted the Site.

7.3 Significant Data Gaps

This section summarizes significant data gaps and the relevance these data gaps have on the ability to identify RECs.

The Site's historical use could not be identified to 1940, and the earliest available aerial photograph from 1947 shows the property as being developed. The buildings observed to exist in 1947 remain onsite through 1958 when we identified the site being occupied by a hotel. E Sciences does not consider this data gap to be significant.

The previous property owner was not interviewed as part of this assessment. However, based on the known historical use of the Site, we do not consider this data gap to be significant.

Note: A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap.

7.4 Conclusions

E Sciences has performed this Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 of the Site located at 2671 N Federal Highway, Pompano Beach, Florida. Any deviations from this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of RECs in connection with the property.

Based on the VES documented herein, we conclude that no potential VEC associated with the above referenced historic petroleum discharge exists on the Site.

8.0 NON SCOPE SERVICES

This Phase I ESA did not include services outside of those outlined in the ASTM E1527-13 Standard except for a vapor encroachment screening.

An asbestos survey of the existing building was completed concurrently with this Phase I ESA and the report submitted under separate cover.

9.0 PROFESSIONAL QUALIFICATIONS

E Sciences provides initial and periodic training for professionals who conduct Phase I ESAs. A short summary of the main professionals who assisted in the completion of this Phase I ESA is provided below:

Nadia Locke, P.E., is an Associate with E Sciences. She has more than 28 years of experience in the environmental profession in South Florida. Ms. Locke has technical and management responsibilities for projects and clients and specializes in due diligence projects. Ms. Locke has conducted, supervised and reviewed hundreds of Phase I and II ESAs. She has worked for a variety of public and private clients, lenders and institutions. She has been a panel speaker at Due Diligence and Dawn, Florida's Growth Management Conference, and Miami-Dade County's Attorney Real Estate Council. Lenders she has worked for include Northwestern Mutual Life, Prudential, MetLife, Mutual of New York, GE Capital, NationsBank, FannieMae, and J.P. Morgan. She is a past president of the Florida Brownfields Association and South Florida Association of Environmental Professionals.

Maria. Paituvi, P.E. has over thirteen years of experience in environmental consulting experience. She has been conducting Phase I and II ESAs for many years. Her technical experience also includes environmental assessment and remediation of contaminated sites. Ms. Paituvi has actively collaborated on site investigation and environmental assessments, remedial action planning and design. She is experienced in data validation, interpretation and reporting, as well as regulatory compliance. From the various and numerous projects completed, she has gained practical experience in Phase I ESAs, environmental field investigation, monitoring and sampling tasks, construction planning and oversight, remediation system installation and operation, and regulatory compliance.

11.0 TERMINOLOGY

For the convenience of the User of this report, we are providing definitions of terminology commonly used in this document and may be of interest. These definitions can be identified in the ASTM E1527-13 standard. The definitions included herein are for convenience and are not construed to be a comprehensive list of all relevant terms. Additional definitions can be identified in the ASTM E1527-13 standard.

activity and use limitations - legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property.

all appropriate inquiry - all appropriate inquiries—that inquiry constituting all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial and customary practice as defined in CERCLA, 42 U.S.C §9601(35)(B), that will qualify a party to a commercial real estate transaction for one of the threshold criteria for satisfying the LLPs to CERCLA liability (42 U.S.C §9601(35)(A) & (B), §9607(b)(3), §9607(q); and §9607(r)), assuming compliance with other elements of the defense.

bona fide prospective purchaser liability protection - (42 U.S.C. §9607(r))—a person may qualify as a bona fide prospective purchaser if, among other requirements, such person made “all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices.” Knowledge of contamination resulting from all appropriate inquiries would not generally preclude this liability protection. A person must make all appropriate inquiries on or before the date of purchase. The facility must have been purchased after January 11, 2002.

business environmental risk - a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations.

controlled recognized environmental condition - a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

data failure - a failure to achieve the historical research objectives in 8.3.1 through 8.3.2.2 even after reviewing the standard historical sources in 8.3.4.1 through 8.3.4.8 that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

data gap - a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

de minimis condition – condition—a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

engineering controls - physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or groundwater on the property. Engineering controls are a type of activity and use limitation.

environmental lien - a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property, including (but not limited to) liens imposed pursuant to CERCLA 42 U.S.C. §§9607(1) & 9607(r) and similar state or local laws.

environmental professional - a person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). For the convenience of the reader, this section is reprinted in Appendix X2. The person may be an independent contractor or an employee of the user.

environmental site assessment (ESA) – the process by which a person or entity seeks to determine if a particular parcel of real property (including improvements) is subject to recognized environmental conditions. At the option of the user, an environmental site assessment may include more inquiry than that constituting all appropriate inquiries or, if the user is not concerned about qualifying for the LLPs, less inquiry than that constituting all appropriate inquiries. An environmental site assessment is both different from and often less rigorous than an environmental compliance audit.

hazardous substance - a substance defined as a hazardous substance pursuant to CERCLA 42 U.S.C. §9601(14), as interpreted by EPA regulations and the courts:“ (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §§6901 et seq.) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 U.S.C. §7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil

or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).”

hazardous waste - any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of RCRA, as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §§6901-6992k) has been suspended by Act of Congress). RCRA is sometimes also identified as the Solid Waste Disposal Act. RCRA defines a hazardous waste, at 42 U.S.C. §6903, as: “a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may—(A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”

historical recognized environmental condition - a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.

innocent landowner defense - (42 U.S.C. §§9601(35) & 9607(b)(3))—a person may qualify as one of three types of innocent landowners: (i) a person who “did not know and had no reason to know” that contamination existed on the property at the time the purchaser acquired the property; (ii) a government entity which acquired the property by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; and (iii) a person who “acquired the facility by inheritance or bequest.” To qualify for the innocent landowner defense, such person must have made all appropriate inquiries on or before the date of purchase. Furthermore, the all appropriate inquiries must not have resulted in knowledge of the contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the innocent landowner defense.

institutional controls - a legal or administrative restriction (for example, “deed restrictions,” restrictive covenants, easements, or zoning) on the use of, or access to, a site or facility to (1) reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. An institutional control is a type of Activity and Use Limitation (AUL).

Landowner Liability Protections - landowner liability protections under CERCLA; these protections include the bona fide prospective purchaser liability protection, contiguous property owner liability protection, and innocent landowner defense from CERCLA liability. See 42 U.S.C.

§§9601(35)(A), 9601(40), 9607(b), 9607(q), 9607(r). There are additional requirements beyond conducting a Phase I ESA.

material threat - a physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a hazardous substance and which shows evidence of damage. The damage would represent a material threat if it is deemed serious enough that it may cause or contribute to tank integrity failure with a release of contents to the environment.

petroleum products - those substances included within the meaning of the petroleum exclusion to CERCLA, 42 U.S.C. §9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of 42 U.S.C. §9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). (The word fraction refers to certain distillates of crude oil, including gasoline, kerosene, diesel oil, jet fuels, and fuel oil, pursuant to Standard Definitions of Petroleum Statistics.)

practically reviewable - information that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary analysis of irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the property or a geographic area in which the property is located are not generally practically reviewable. Most databases of public records are practically reviewable if they can be obtained from the source agency by the county, city, zip code, or other geographic area of the facilities listed in the record system. Records that are sorted, filed, organized, or maintained by the source agency only chronologically are not generally practically reviewable. Listings in publicly available records which do not have adequate address information to be located geographically are not generally considered practically reviewable. For large databases with numerous records (such as RCRA hazardous waste generators and registered underground storage tanks), the records are not practically reviewable unless they can be obtained from the source agency in the smaller geographic area of zip codes. Even when information is provided by zip code for some large databases, it is common for an unmanageable number of sites to be identified within a given zip code. In these cases, it is not necessary to review the impact of all of the sites that are likely to be listed in any given zip code because that information would not be practically reviewable. In other words, when so much data is generated that it cannot be feasibly reviewed for its impact on the property, it is not practically reviewable.

reasonably ascertainable - information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.

recognized environmental conditions - the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

Release - a release of any hazardous substance or petroleum product shall have the same meaning as the definition of "release" in CERCLA 42 U.S.C. § 9601(22).

User - the party seeking to use Practice E1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The user has specific obligations for completing a successful application of this practice

Reasonable Time and Cost - Information that is obtainable within reasonable time and cost constraints means that the information will be provided by the source within 20 calendar days of receiving a written, telephone, or in-person request at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information. Information that can only be reviewed by a visit to the source is reasonably ascertainable if the visit is permitted by the source within 20 days of request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

2671 N FEDERAL HIGHWAY
POMPANO BEACH, FL 33064

COORDINATES

Latitude (North):	26.2640010 - 26° 15' 50.40"
Longitude (West):	80.0997050 - 80° 5' 58.93"

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's PCTO1--Petroleum Contamination Detail Report.

A review of the LUST list, as provided by EDR, and dated 07/02/2018 has revealed that there are 7 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the UST list, as provided by EDR, has revealed that there are 8 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SMILEYS GLASS SERVIC	2600 N FEDERAL HIGHW	ESE 0 - 1/8 (0.074 mi.)	A2	8

DIRECT OIL CO	2750 N FEDERAL HWY	NE 0 - 1/8 (0.118 mi.)	13	33

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Historical Generators:

Date form received by agency: 04/03/1986

Site name: USA TRANSMISSION

Classification: Small Quantity Generator

. Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

- . Waste code: D001
- . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AIR MINOR

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D036
. Waste name: NITROBENZENE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Historical Generators:

Date form received by agency: 09/27/2010
Site name: AMOCO SERVICE STATION #2145
Classification: Not a generator, verified

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

1000501258

. Waste code: D018
. Waste name: BENZENE

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 10/08/2010
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State

FINDS:

Registry ID: 110005608324

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/17/2018	Source: EPA
Date Data Arrived at EDR: 08/09/2018	Telephone: N/A
Date Made Active in Reports: 09/07/2018	Last EDR Contact: 10/04/2018

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/17/2018

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/17/2018	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

BSRA: Brownfield Site Rehabilitation Agreements Listing

The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

Date of Government Version: 04/25/2018

BROWNFIELDS AREAS: Brownfields Areas Database

A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Department of Children & Families

Source: Provider Information

Telephone: 850-488-4900

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

UTM Y (Meters):	2905069.5
Elevation:	7 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5655836 BOCA RATON, FL
Version Date:	2012
Southeast Map:	5655884 POMPANO BEACH, FL
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
12011C0188H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

12011C0376H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BOCA RATON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

1G	1/8 - 1/4 Mile NNE	ESE
2G	1/8 - 1/4 Mile NNE	WNW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: Duette

Soil Surface Texture: sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	sand	Not reported	Not reported	Max: 42 Min: 14	Max: 6.5 Min: 4.5
2	3 inches	66 inches	sand	Not reported	Not reported	Max: 42 Min: 14	Max: 6.5 Min: 4.5
3	66 inches	79 inches	sand	Not reported	Not reported	Max: 42 Min: 14	Max: 6.5 Min: 4.5

Soil Map ID: 3

Soil Component Name: Immokalee

Soil Surface Texture: fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
2	5 inches	35 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
3	35 inches	53 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
4	53 inches	72 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Environmental Protection

Telephone: 850-245-8238

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Telephone: 850-245-4288
Zip Code Based Radon Data

Area Radon Information

Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
