OWNER'S CERTIFICATE

This is to certify that I am the owner of the subject lands described in this application and that I have authorized the filing of the aforesaid application.

By signing below, I agree that if the proposed development is found not in compliance with the applicable standards and minimum requirements of this Code then no building permit will be issued until those conditions the Development Services Director finds reasonably necessary to ensure compliance are met.

By signing below, I acknowledge that development applications must have a determination by the governing municipality of approved, approved with conditions, or denied within 120 days from a complete submittal for projects that do not require final action through a quasi-judicial hearing or a public meeting and within 180 days from a complete submittal for projects that do require final action through a quasi-judicial hearing or a public meeting per FL Stat § 166.033 and the Pompano Beach Code Section 155.2303.F.3. It is the responsibility of the applicant to receive all final Development Orders and receive this determination within the allotted timeframe. If the applicant fails to resubmit an application within 30 calendar days after being first notified of deficiencies of the submittal, the application shall be considered withdrawn and a \$100 non-refundable administrative fee will apply (155.2303.F.2.b). Additionally, if all required approvals are not received within the allotted timeframe the application will automatically be denied unless both the City and the applicant agree to an extension of time (155.2303.I).

**CPTED PRINCIPLES**

***Crime Prevention Through Environmental Design***

**CPTED Principle #1 - Natural Surveillance**

"See and be seen" is the overall goal when it comes to CPTED and natural surveillance. A person is less likely to commit a crime if they think someone will see them do it. Lighting and landscape play an important role in Crime Prevention Through Environmental Design.

**CPTED Principle #2 - Natural Access Control**

Natural Access Control is more than a high block wall topped with barbed wire. Crime Prevention Through Environmental Design or CPTED utilizes the use of walkways, fences, lighting, signage and landscape to clearly guide people and vehicles to and from the proper entrances. The goal with this CPTED principle is not necessarily to keep intruders out, but to direct the flow of people while decreasing the opportunity for crime.

**CPTED Principle #3 - Territorial Reinforcement**

Creating or extending a "sphere of influence" by utilizing physical designs such as pavement treatments, landscaping and signage that enable users of an area to develop a sense of proprietorship over it is the goal of this CPTED principle. Public areas are clearly distinguished from private ones. Potential trespassers perceive this control and are thereby discouraged.

**CPTED Principle #4 - Maintenance**

CPTED and the "Broken Window Theory" suggests that one "broken window" or nuisance, if allowed to exist, will lead to others and ultimately to the decline of an entire neighborhood. Neglected and poorly maintained properties are breeding grounds for criminal activity. A formal CPTED based maintenance plan will help you preserve your property value and make it a safer place.

**CPTED Principle #5 – Activity Support**

Increase the use of a built environment for safe activities with the intent of increasing the risk of detection of criminal and undesirable activities. Natural Surveillance by the intended users is casual and there is no specific plan for people to watch out for criminal activity.
