Re: Arboricultural Consulting Services for New Entry for 1200 Northwest 18th Street, Pompano Beach, Florida

To Whom It May Concern,

I visited the above-mentioned property on Thursday, August 17, 2023 to evaluate an estimated +/- 25 trees, verify condition and measurements, take photographs (Specimen trees only), calculate appraisal values (Rule 14-10 2020) perform relocation evaluations, and note any significant defects.

Overview

Please see attached within this document the tree table with data collected in the field including species, height, width, diameter at breast height (dbh), health condition, health condition percentage, relocation candidate (y/n), and pertinent notes.

Note all trees were evaluated from the ground only, no aerial inspections, soil excavation or penetrations were performed. The performed reviews were 360-degree visual assessments only. Health condition ratings are in accordance with the CTLA 10th Edition Guide for Plant Appraisal. While onsite I discovered an additional three trees and have added them accordingly to the attached markup of the tree survey showing the numbering of the trees reviewed for this portion of the property. A total of 25 trees were inspected.

Please see photographs and comments for Specimen sized trees only below.
