The design of the proposed signage is part of the national branding program to promote a unified brand identity for all Prologis facilities.

The freestanding signage design identifies Prologis as the anchor tenant of the business park leaving spaces for the other tenants. The sign is double sided with site specific copy that can be replaced as tenants are updated. The design of the sign will assist in the navigation of the business park and create a unified brand identity for the park.

The Address Logo Panels and tenant wall sign include information to help drivers identify the correct locations. The size and location of our proposed signage is essential for the safe and effective use of Prologis facilities as drivers are navigating their way to the appropriate facilities. Including the Prologis logos on the Address Logo Panels helps impact drivers from a greater distance as they navigate towards the facilities and the address numbers ensure that they are in the correct location.

Thank you,
