

We are a team with **over 20 years of experience** in marine exhibitions, public aquariums, and educational installations. Throughout this time, we have successfully created and operated two public aquariums and Europe’s first Jellyfish Museum, which opened in 2018.

Our projects combine human creativity with the magic of nature — a symbiosis that allows people to explore, marvel, and truly enjoy the natural world.

The project we are proposing here in Pompano Beach proudly continues that vision.

2012

OCEANARIUM «MORSKA KAZKA»

2018

JELLYFISH MUSEUM, KYIV

2020

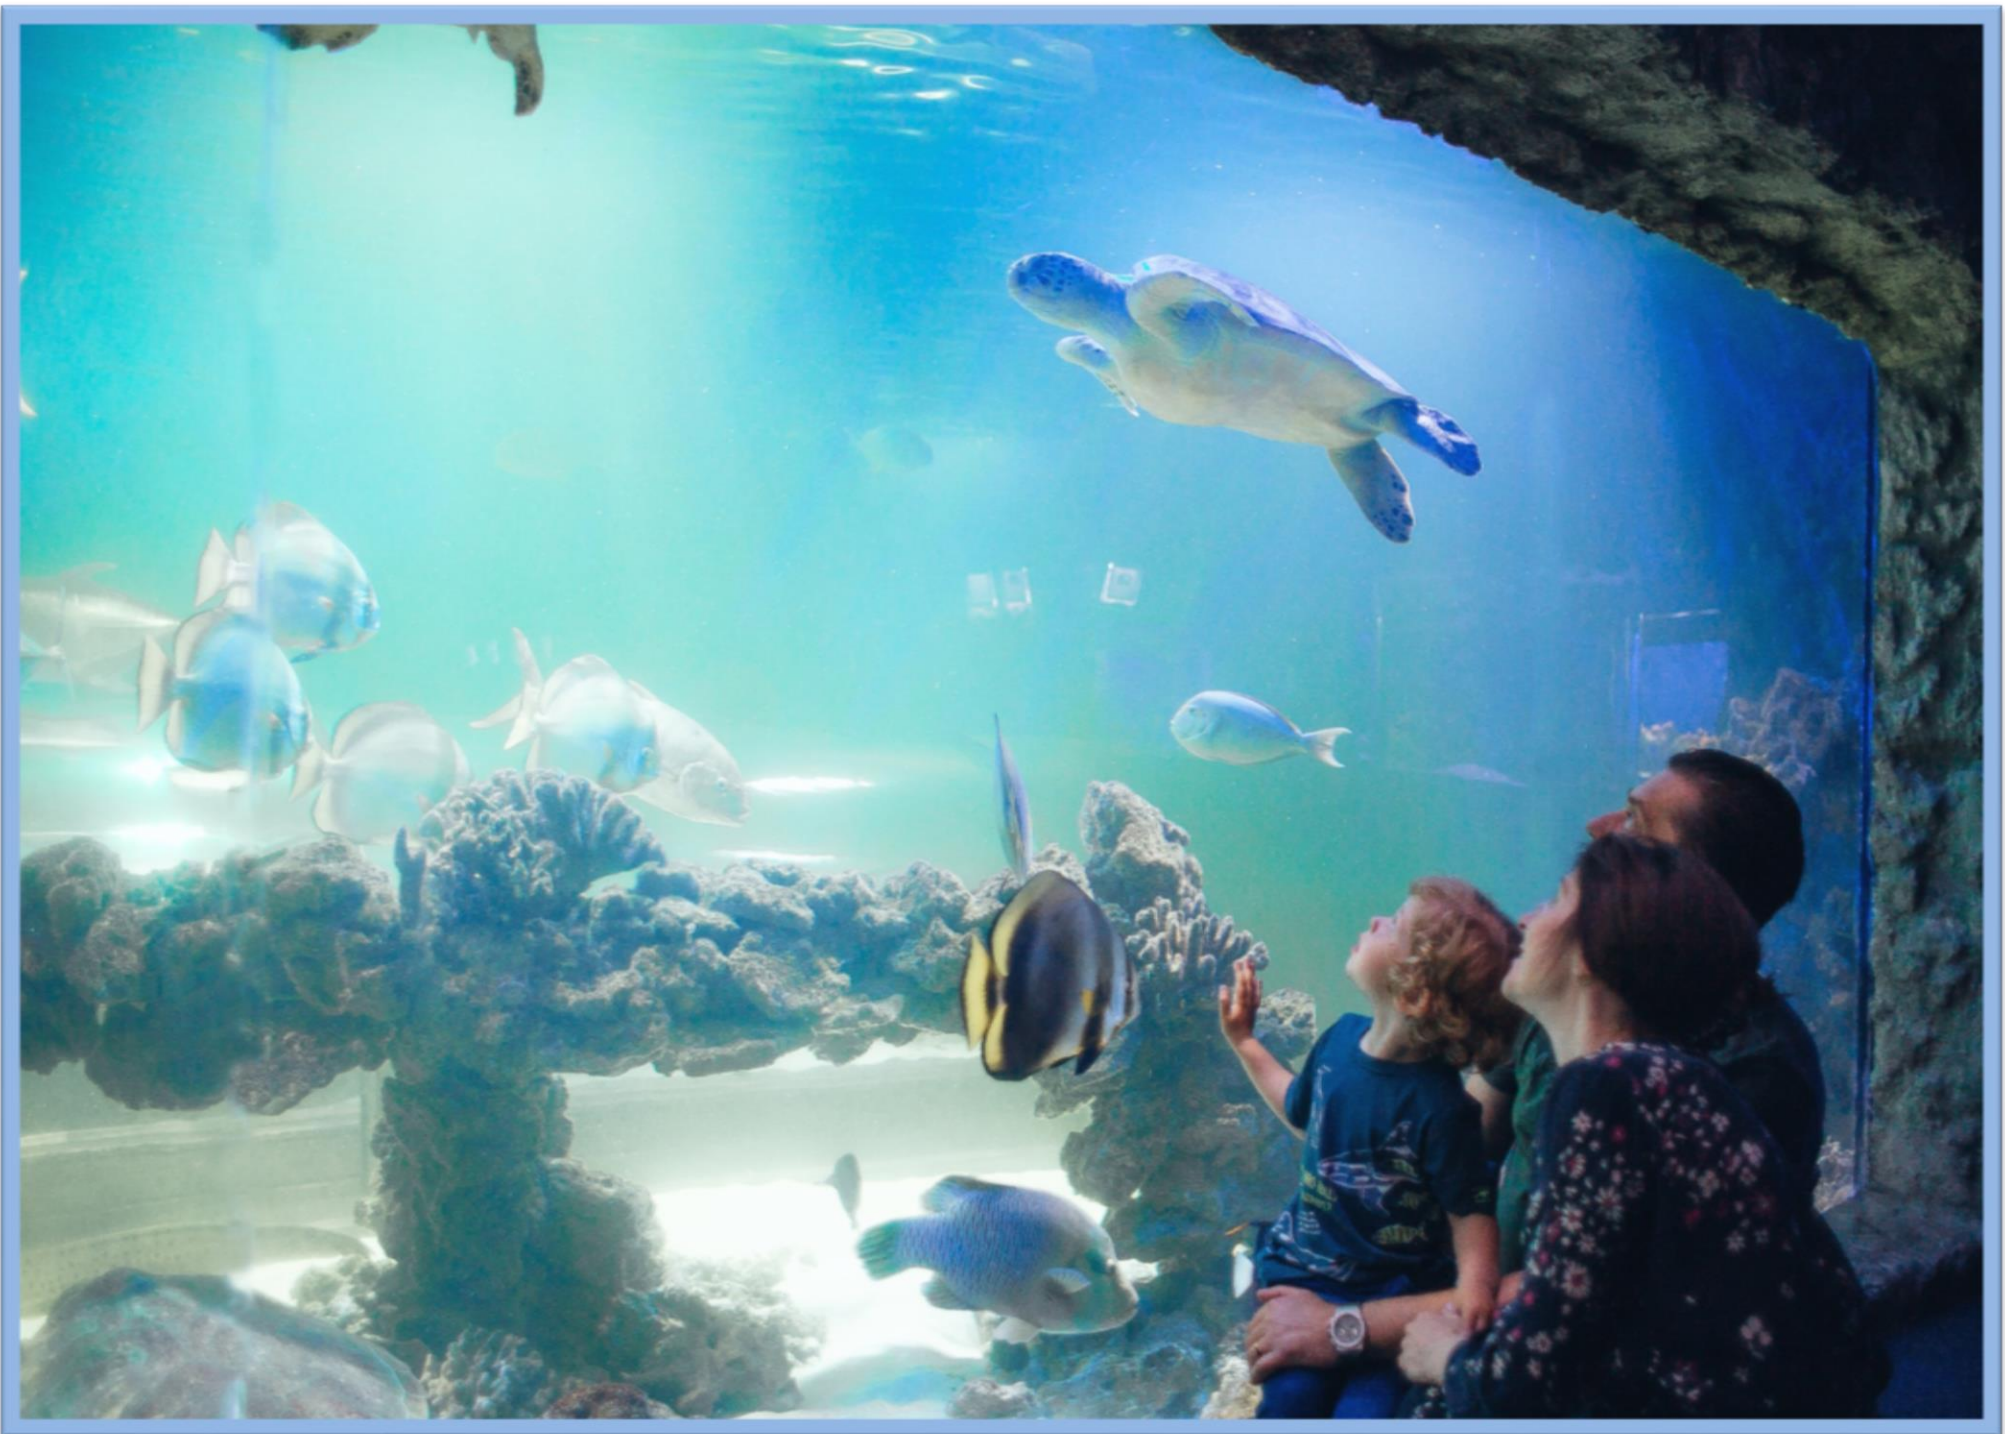

OCEANARIUM LVIV

Our first oceanarium " Morska kazka" was opened in 2012

In 2012, we opened the "Morska kazka Oceanarium.

While it may not have been our most extensive project, our commitment and passion were poured into it sincerely

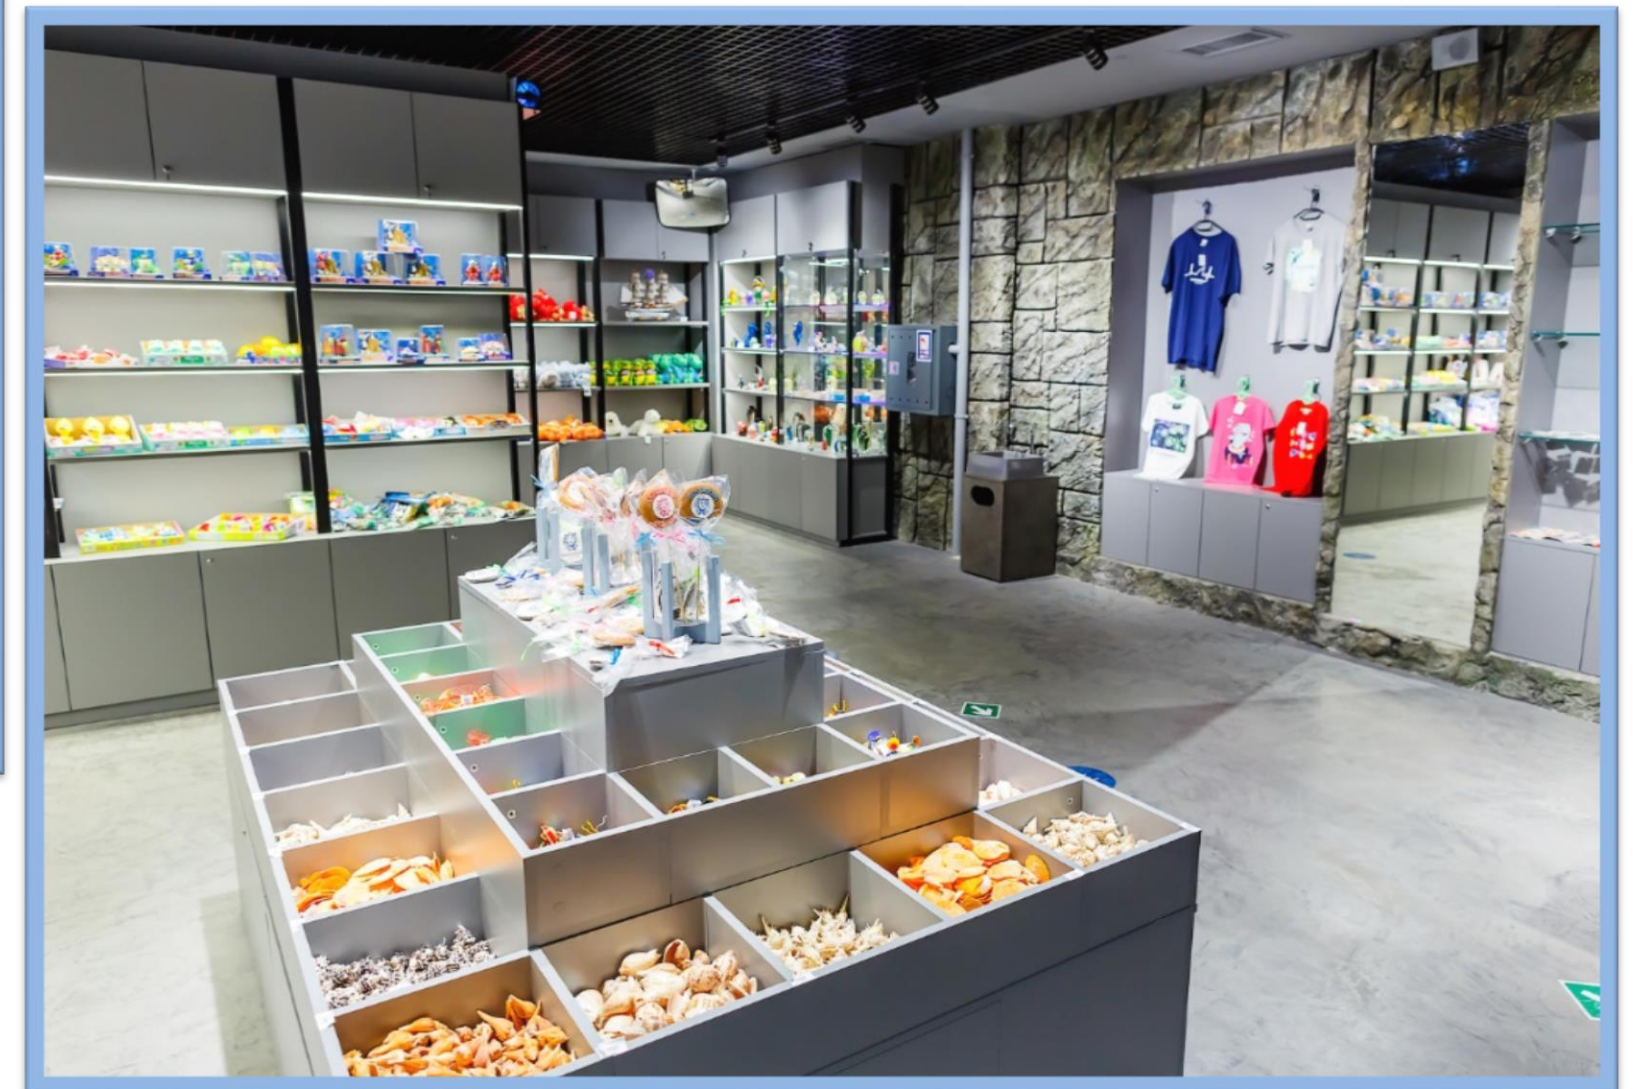

Our second public aquarium was opened in 2020

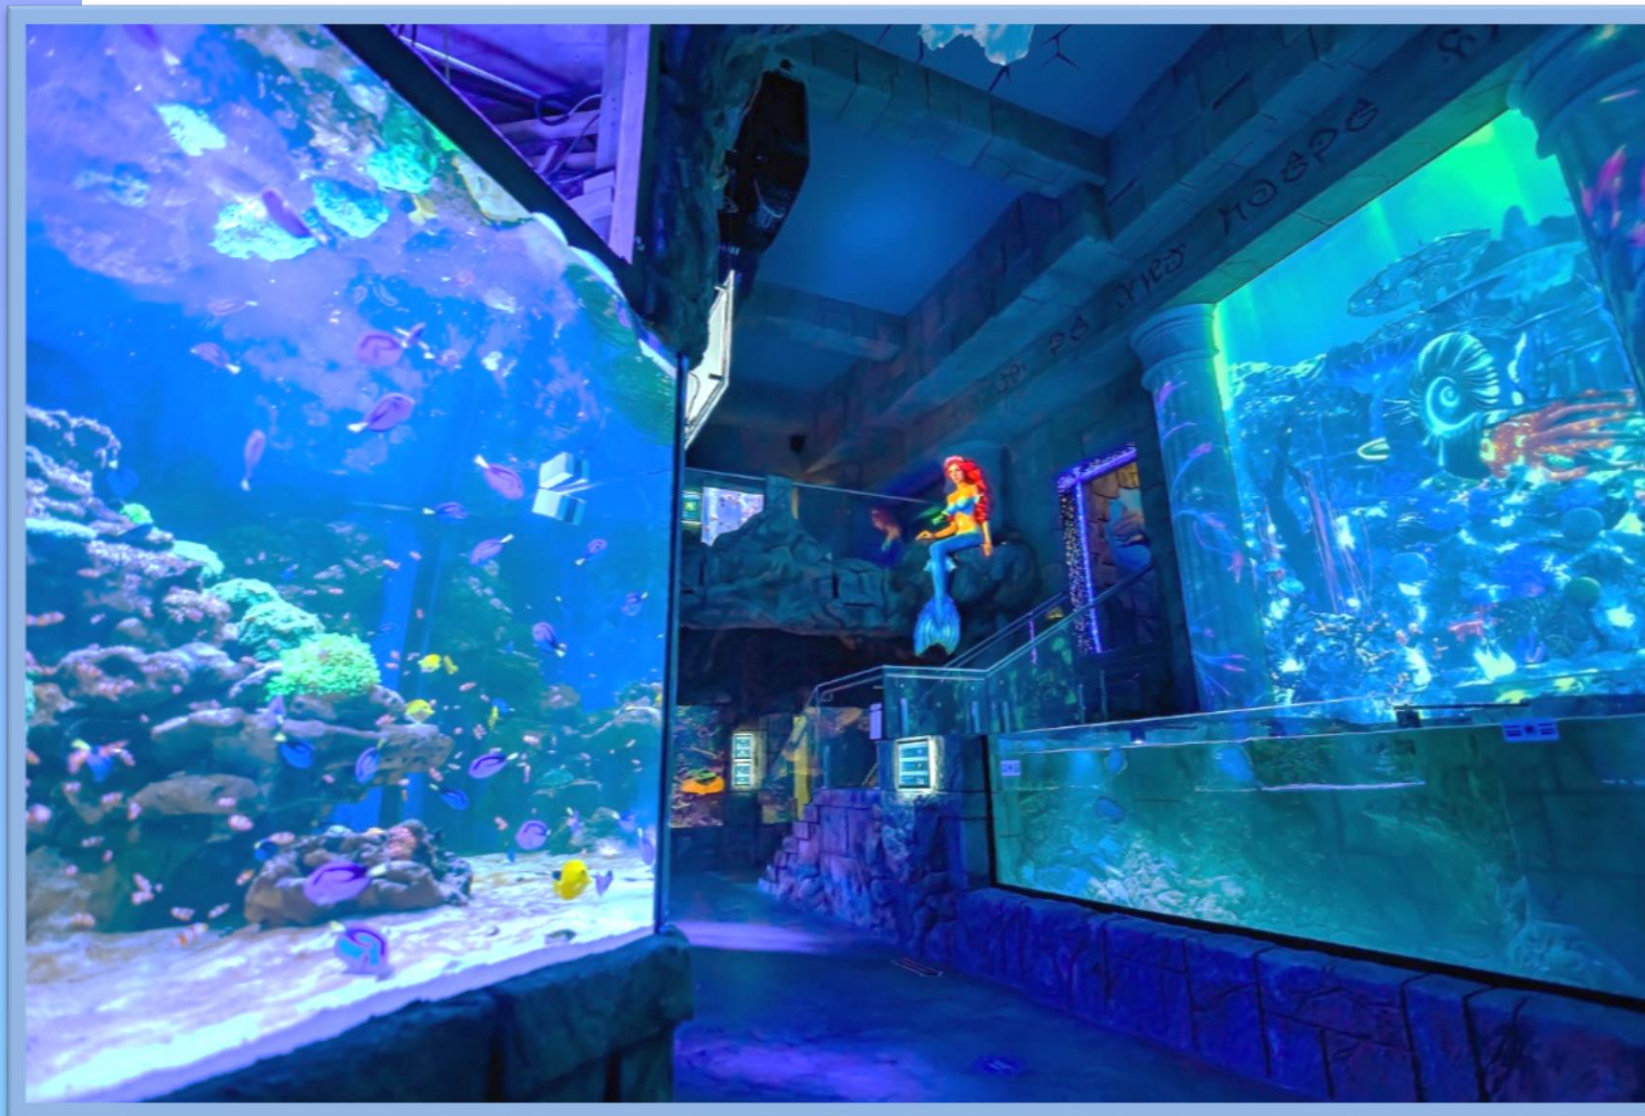

Interior Design

Gift Shop

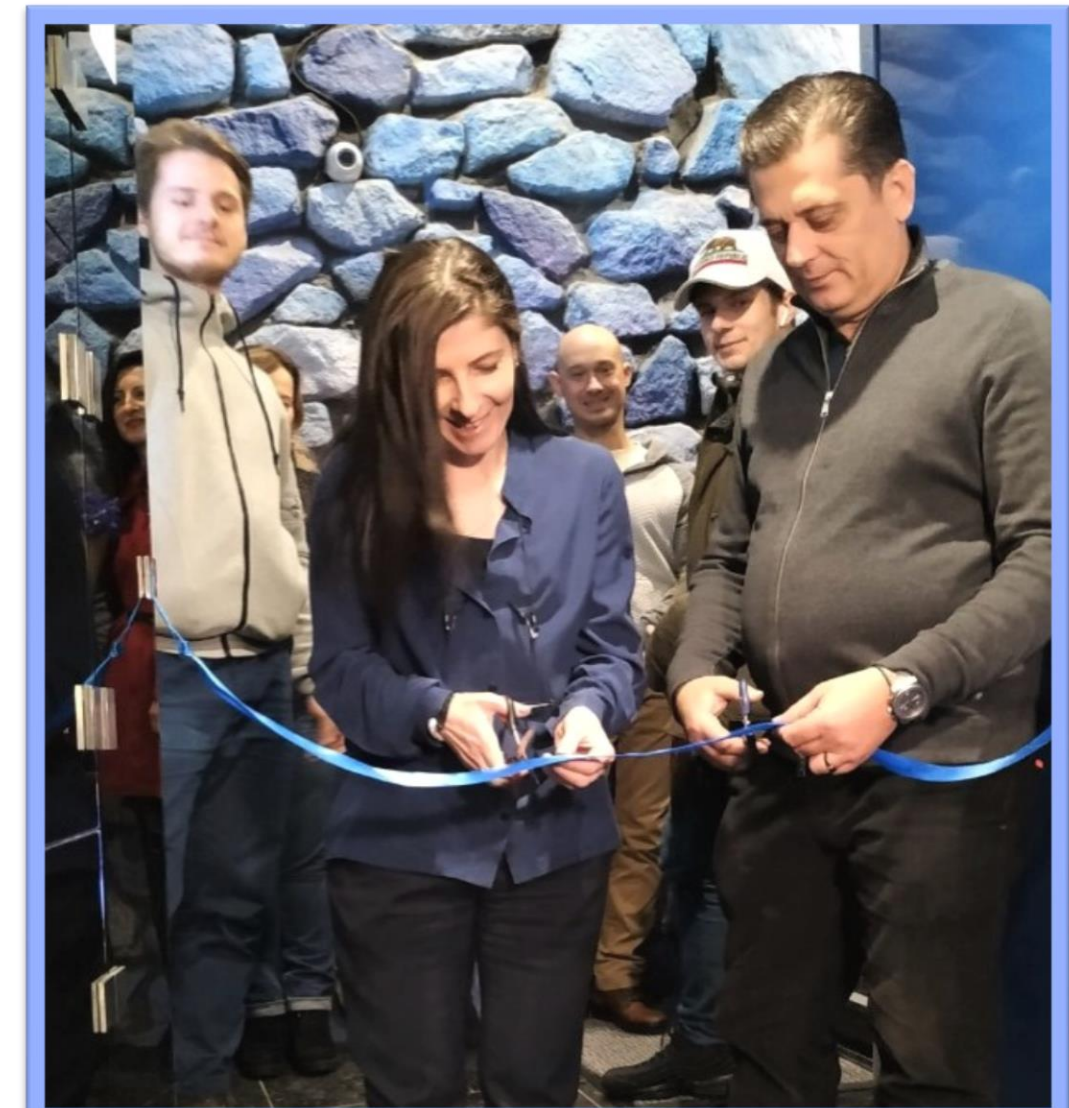

One of our key projects is the Oceanarium in Lviv — a large-scale public space dedicated to marine life education, family recreation, and immersive experiences with the underwater world.

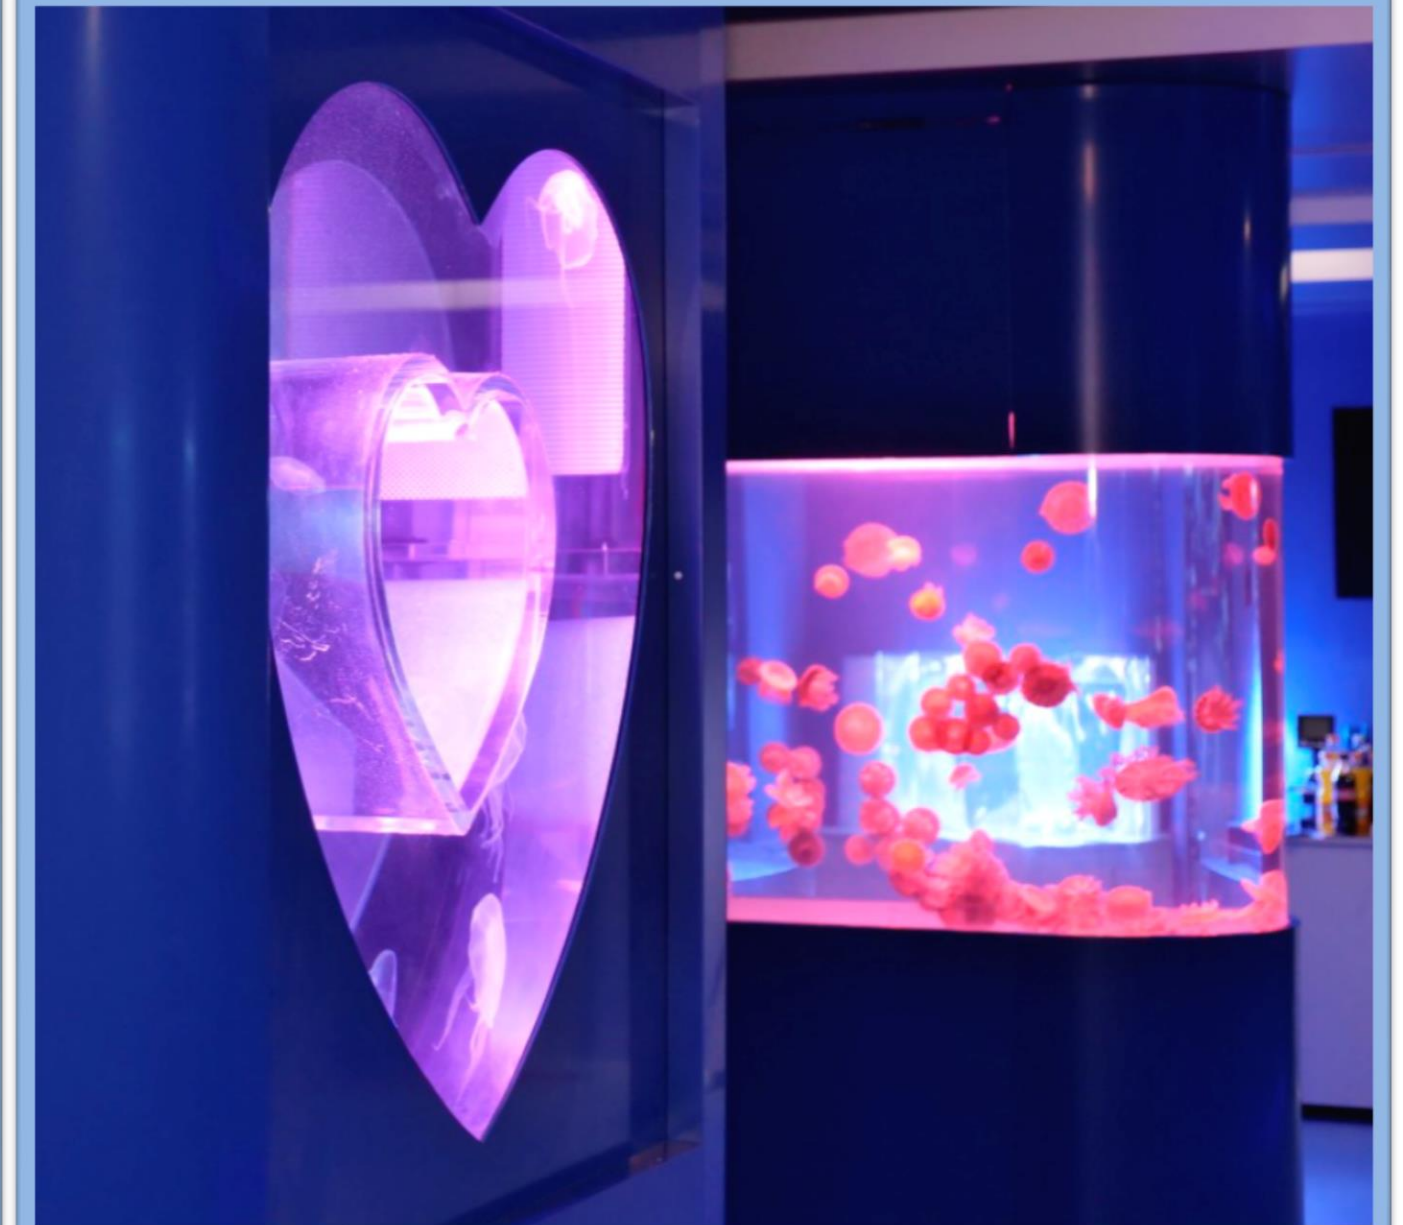

THE FIRST JELLYFISH MUSEUM WAS OPENED IN 2018, KYIV CITY

Our unique achievement is the opening of the first Jellyfish Museum in Europe.

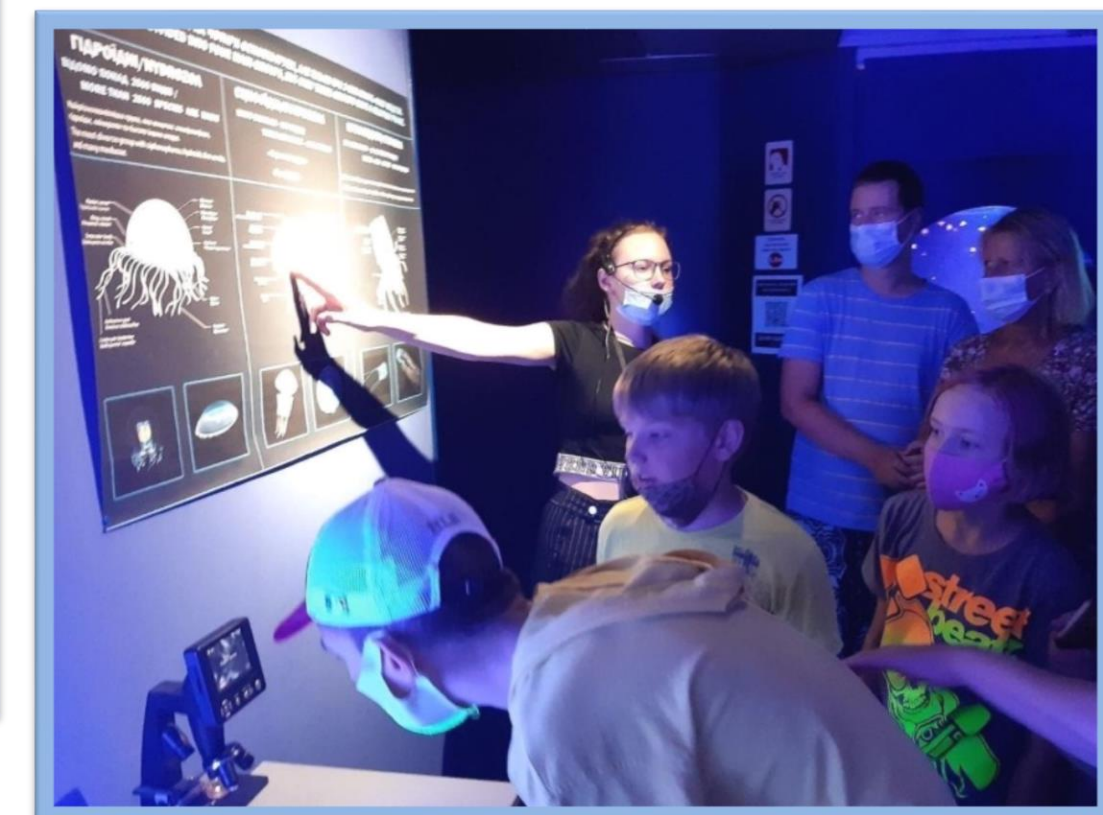

EDUCATIONAL EXCURSIONS AND SOCIAL PROGRAMS

We take a responsible approach to social impact.

In all of our projects, we provide free admission for orphans and children with disabilities, along with significant discounts for adults with disabilities, veterans, and seniors.

Our new project will fully reflect those same values.

REAL ART WITH REAL JELLYFISH

Flexible Concept Options

Depending on the preferences of the City and the local community, the project can be developed under one of two core concepts:

Living Jellyfish Museum

Focus on marine biology, science education, and public programs.

Jellyfish Art Gallery

Emphasis on artistic interpretation, immersive installations, and collaboration with artists and sculptors.

Both concepts share the same foundation — the difference lies only in the balance between art and science.

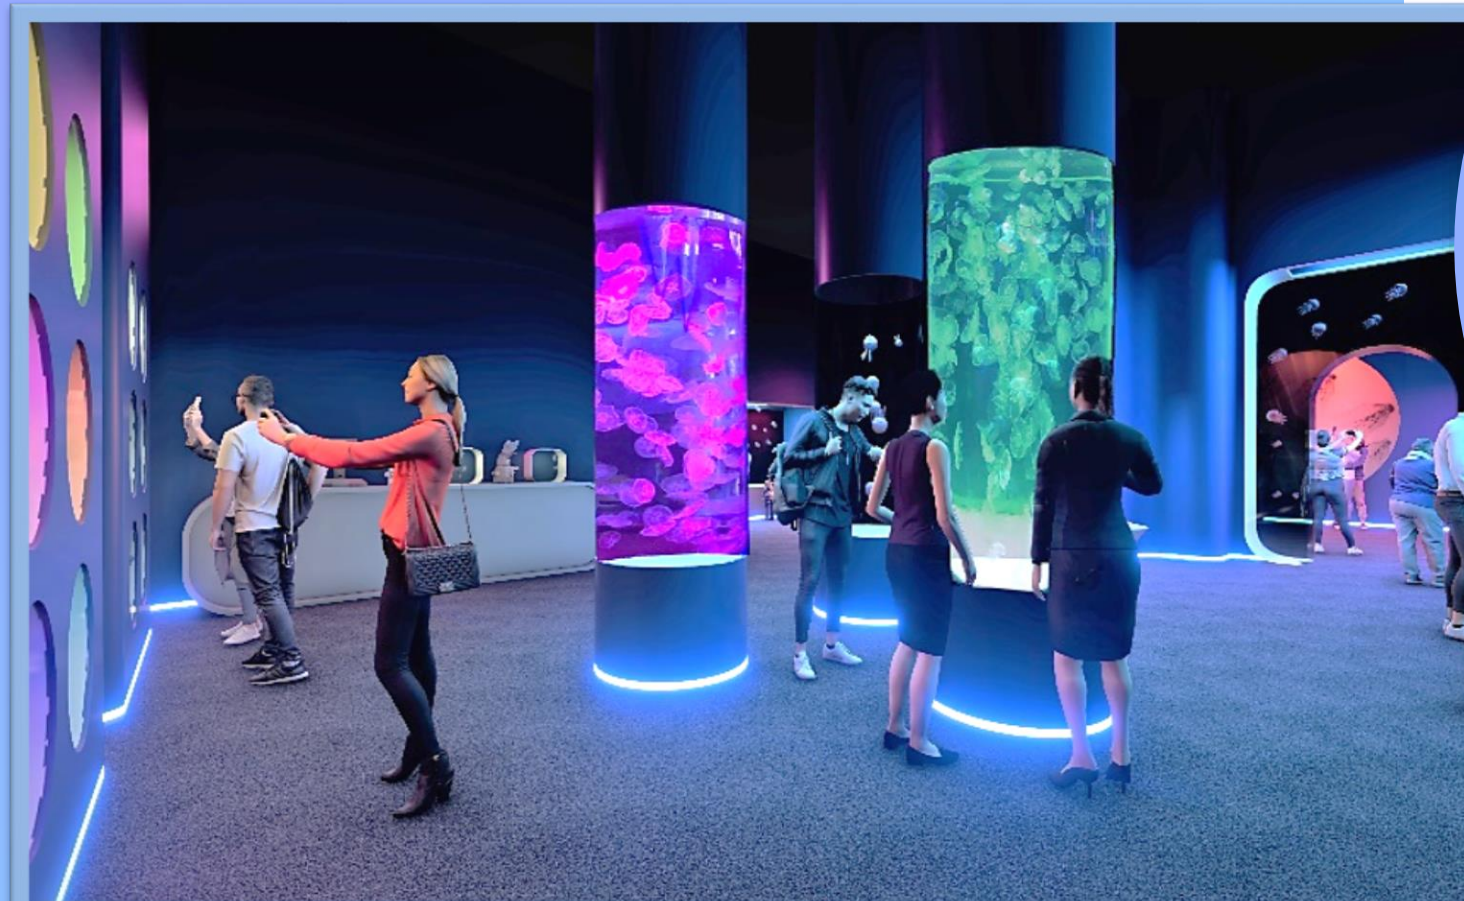

This fusion of marine biology and artistic expression is designed to educate, inspire and create a one-of-a-kind cultural attraction for Pompano Beach.

Art installations

Photo zones

Incredible lighting

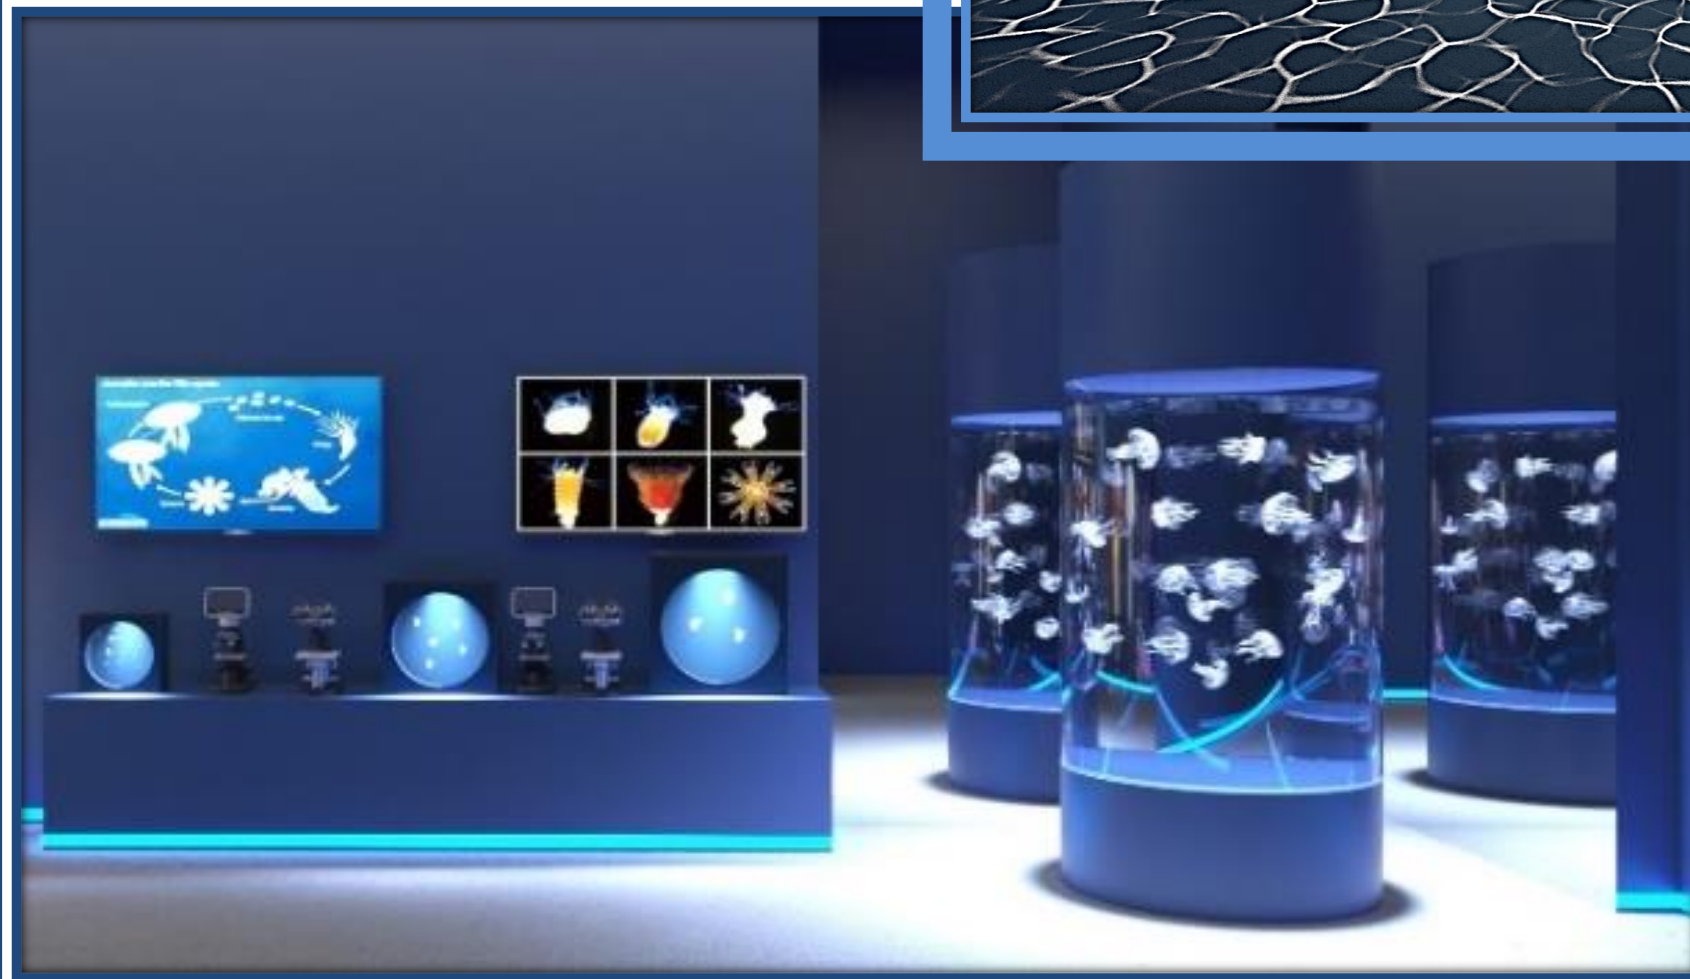

Educational panels on marine biology

As part of our social commitment, we plan to annually allocate a dedicated budget to support local educational initiatives, directing it from the museum's net profit.

Jellyfish as food and medicines

What risks do jellyfish pose to the world's oceans, and how do they impact them?

How should one respond when faced with jellyfish stings?

- Family Cafe

- Souvenir store

Thank you for your time and attention!

**We appreciate the opportunity to share our vision
with you and look forward to the possibility of
bringing it to life in Pompano Beach.**
