**Subject: Avondale Stormwater Improvements Project (Bid E-27-17)
Contractor Licensing Requirements**

Dear Mr. Taylor:

As requested, Chen Moore and Associates (CMA) has reviewed the contractor licensing requirements defined in the Bid/Contract Documents for the Avondale Stormwater Improvements Project (Bid #E-27-17). According to the Bid/Contract Documents for this project, the successful bidder must *“hold or obtain such contractor and business licenses as required by State Statutes”*. According to the State of Florida DBPR database, ENCO LLC who are the low bidders on the Avondale Stormwater Improvements Project are a Certified General Contractor (License #CGC060832 – Expires 08/31/2018). According to the Chapter 489.113(3)(d) within the Florida State Statutes, *“a general contractor shall not be required to subcontract the construction of a main sanitary sewer collection system, storm collection system, or water distribution system, not including the continuation of utility lines from the mains to the buildings, and may perform any of the services, on public or private property, for which a license as an underground utility and excavation contractor is required under this part”*. Based on this information, ENCO LLC currently holds the appropriate contracting licensing from the State of Florida required to complete the construction of this project.

Should you have any questions or need additional information, please do not hesitate to contact me at our office at (954) 730-0707 x1003 or at jmcclair@chenmoore.com via email.

Respectfully submitted,

A handwritten signature in blue ink that reads "Jason McClair".
