PLANNING

Status: Authorized With Conditions

Comment:

1) A small portion of the NW 33 Dr. Right of Way is zoned B-4 with the balance and majority of the site being B-3 Zoning.

RESPONSE: Without the benefit of GIS the zoning map shows the entire property as B-3 except for the area on the west where the drainage retention is located as B-4.

2) This rezoning request to I-1 may be considered spot Zoning since there is no I-1 Zoning contiguous. There is B-3 to the East and B-4 on all other sides. Therefore I-1 Zoning does not appear to be compatible.

RESPONSE: This request is based on future redevelopment potential of the immediate area. Access to the turnpike and FDOT plans make this area attractive for transportation uses other than B-3 or residential. The existing uses in the area that are B-4 could be considered industrial. The redevelopment of the immediate area could upgrade the existing deteriorating structures and unwanted uses. There needs to be an initial application to start the redevelopment process which this project provides.

3) Since the Land Use designation for this property is currently Commercial, this rezoning must follow a Land Use Plan Amendment.

RESPONSE: The LUPA is requesting Industrial which would make the request compatible.

4) Applicant should state gross & net acreage in application & Narrative.

RESPONSE: acreage has been added.

5) A Conceptual Site Plan must be submitted.

RESPONSE: This is a straight rezoning request and site plan submittal not a code requirement.

6) When uploading for P&Z, please place the documents & drawings in their respective folders.

RESPONSE: understand
