NOTES

General specifications as specified.
After installing larger decals on to metal panels, Vendor will affix "Trim" decal(s) to metal panel edges so as to replicate Window Mullions. Take **SPECIAL NOTICE** to insure that the proper Trim is installed so that when all metal panels are installed on site, the "Trim" decals will visually represent equal width Mullions as shown. Vendor should install "Trim" decal(s) in the following order: 1. Bottom Trim 2. Side(s) Trim 3. Top Trim

Vendor to use enough decal material so that the material will wrap-around the edge of the metal panel and on to the back of the panel for best visual appearance.

AMERCODE PN in Pictorial Item(s) may not be actual PN for this item. Use AMERCODE PN stated on this BP and Art File Provided.

"ON SITE INSTALLER"

Install Sign Panels per Local Codes and Safety procedures, etc.
All Sign mounting hardware used should be Black in nature so as to visually hide mounting hardware. Mounting Hardware should be of "non-rusting" material so that in time there will be no discoloration by rust, etc.
