

## Tim Hodgins –ISA Certified Arborist FL-6128A

To whom it may concern,

I, Tim Hodgins, (ISA certified arborist) was contracted, on 6/10/23 to make an Arborist Report at 3225 NE 6st Pompano Beach Fl 33062.

- 1- Norfolk Pine (*Araucaria heterophylla*) 24" DBH, 50' HT, 15' SPR Is nuisance specie.
- 2- Roebelenii Palm (*Phoenix roebelini*) Double 4"-4" DBH, 4'-3' HT, 6' SPR and is in fair.
- 3- Christmas Palm (*Adonidia merrillii*) Double 5"-5" DBH, 8'-8' HT, 6' SPR and is in good condition.
- 4- Christmas Palm (*Adonidia merrillii*) Double 5"-5" DBH, 8'-8' HT, 6' SPR and is in good condition.
- 5- Roebelenii Palm (*Phoenix roebelini*) Double 4"-4" DBH, 4'-8' HT, 8' SPR and is in fair.
- 6- Coconut Tree (*Coco nucifera*) 12" DBH 20' HT, 20' SPR good condition.
- 7- Roebelenii Palm (*Phoenix roebelini*) Double 5"-6" DBH, 3'-3' HT, 5' SPR and is in fair.
- 8- Solitaire Palm (*Ptychosperma elegans*) 5" DBH, 30' HT, 5' SPR and is in good condition.
- 9- Frangi Pani (*Plumeria rubra*) 6" DBH, 10' HT, 15' SPR and is in good condition.
- 10- Queen Palm (*Syagrus romanzoffiana*) 8" DBH, 12' HT, 3' SPR and is in poor condition.
- 11- Norfolk Pine (*Araucaria heterophylla*) Double 24" -24" DBH, 50'-50' HT, 20' SPR Is nuisance specie.
- 12- Ficus Tree (*Ficus benjamina*) 16" DBH, 30' HT, 20' SPR and is in good condition.
- 13- Solitaire Palm (*Ptychosperma elegans*) Double 2" DBH, 10' HT, 4' SPR and is in fair condition.
- 14- Strangler Fig (*Ficus aurea*) 11", DBH, 25' HT, 20' SPR and is in good condition. Native
- 15- Cabbage Palm (*Sabal Palmetto*) 15", DBH, 8' HT, 14' SPR and is in fair condition. Native
- 16- Carrot Wood Tree (*Cupaniopsis anacardioides*) 16", DBH, 25' HT, 30' SPR. Invasive Should be remove causes other native species of plants to die out. (<https://plants.ifas.ufl.edu/plant-directory/cupaniopsis-anacardioides/>)

Per Chapter 17, ANSI A-300 standards recommendations, the Tree Protection Zone (TPZ) shall consist of installation of a temporary fencing where possible (based on the constraints of the areas and locations) to protect the root zone of any tree or palm within the construction area. Consideration should be taken as to the age of the tree and trunk diameter, with emphasis on the species and its ability to tolerate disturbances associated with development and construction.

### General recommendations for establishing a Tree Protection Zone are as follows:

- Tree Protection Zone (TPZ) shall be determined by a Certified Arborist.
- If Root pruning is necessary should be performed with hand tools using sharp cuts to avoid damaging or "ripping" the roots.
- Any root pruning performed within the TPZ should incorporate an irrigation plan following ANSI A-300 (Part 8) Root management Standard.
- In the area where root pruning is performed, irrigation should be monitored in a way that maintains adequate moisture to the soil.
- During demolition or development, there should be no mechanical injury, storage or soil compaction within the TPZ.

# Tim Hodgins –ISA Certified Arborist FL-6128A

- There should be no change in the grade within the designated TPZ.
- All necessary pruning or trimming operations should follow ANSI A-300 (Part 1) Standard.
- TPZ barriers shall remain in place and intact until approved landscape operations begin. Barriers may be removed temporarily to accommodate construction needs provided that the manner purpose for such temporary removal will not harm the trees.

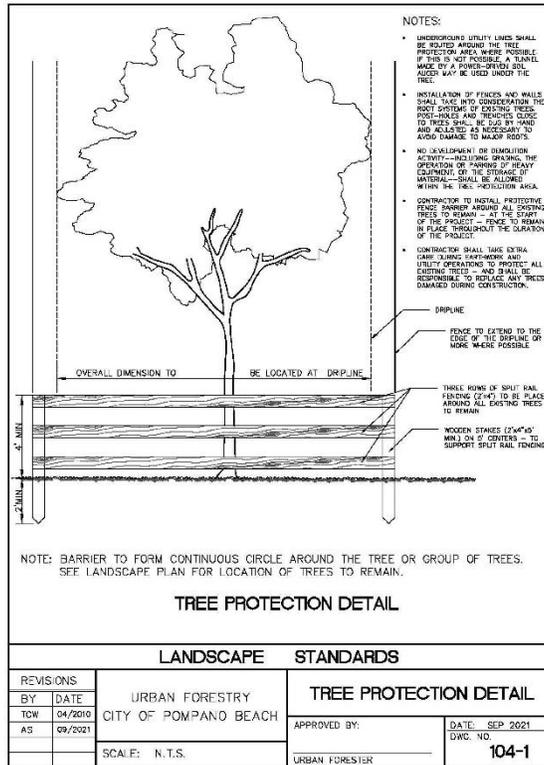

Should any additional information be required, please contact me directly.

Sincerely,

Timothy Hodgins
