Representative Project Experience

Aviation and Transportation

- **Azerbaijan Airlines, International Terminal, Baku, AZE.** * Concept design of a new terminal building at the Heydar Aliyev International Airport. The project has a triangular plan with sides approximately 300 meters. The roof design is a complex diagrid steel structure supported by internal columns and regularly spaced columns on the building's perimeter. *(Project Engineer, 2014)*
- **King Abdulaziz International Airport, Passenger Terminal Building, Jeddah, KSA.** * Structural design of a passenger terminal at an airport. Scope included design of the foundation of the concourses, each of which is approximately 40 meters wide and 550 meters long. Each concourse is essentially an independent structure for the transfer of gravity and lateral loads, however the foundations are continuous with no joints in order to minimize differential displacements and control joint widths. *(Project Engineer, 2014)*
- **King Abdulaziz International Airport, Automated People Mover and Maintenance Facilities Canopy, Jeddah, KSA.** * Structural engineering services for an automated people mover and a maintenance facilities canopy. *(Project Engineer, 2014)*
- **SAVE, Marco Polo Airport, Venice, ITA.** * Feasibility study of the expansion of a terminal at an airport and the creation of a link from the terminal to a high-speed railway station and water port. Scope included the baggage handling system addressing the short distance between the airport and the sea. *(Engineer, 2011)*
- **Dongdaegu Mixed-Use Transportation Hub, Daegu, KOR.** * Structural design of a mixed-use transportation hub that includes a shopping mall, bus terminal, water park and cinemas. Scope included vibration analysis and integration of the building with the subway system. The site constraints and integration with the subway station and tunnel require complex analysis of the portions of the building with 90-meter spans. *(Engineer, 2012)*

- **Nuova Stazione per l'Alta Velocità**, Florence, ITA.* Structural validation of concrete elements of a high-speed train station. Validation of the project mainly focused on the diagonal concrete slab structural design to provide future users with access to the platform level.

Mixed-Use

- **Le Varesine**, Milan, ITA.* Structural design of a mixed-use development consisting of offices, retail space and apartments. The development totals 13 buildings and four basement levels. There is continuous slab among the three main high-rise buildings and the raft foundation of a 25-story building. Project scope included an onsite presence and continuous collaboration with the contractors and validators. (*Site Engineer and Construction Administration Reviewer, 2009*)
- **Ex Mercati Generali**, Roma, ITA.* Structural design of a major urban redevelopment project at the location of a former marketplace. The project included an auditorium building, fitness center, shopping and parking. The project is located in a highly seismic zone, which required seismic analyses for all the reinforced concrete structures. (*Engineer, 2008*)
- **Island Garden**, Miami, FL.* Structural schematic design of an approximately 1.5-million-square-foot development. Project includes a 44-story luxury residential tower, a 28-story hotel tower and a one-story basement plus four-story podium, which hosts parking, retail and amenities serving the hotel and the adjacent yacht marina. (*Project Engineer, 2015*)
- **Structural Assessment, CAT-90 Sandy**, New York, NY.* Structural assessment of single- or two-story dwellings for the New York City Departments of Buildings after CAT-90 Sandy. (*Engineer, 2012*)

Municipal

- **City of Coral Springs, City Hall**, Coral Springs, FL. Structural design of a five-story, 65,000-square-foot municipal office building, which will house also a council chamber and community-educational meeting rooms, and an 4-story parking garage will accommodate 600 cars. The building features a structural steel grand stair and exterior canopy. The four-story, parking garage will accommodate 600 cars. Connecting the two structures is a seventy foot long structural steel pedestrian bridge. The project construction to be completed by 2017. (*Senior Project Engineer, 2016*)

Commercial

- **WPB office building**, West Palm Beach, FL. Structural schematic design of a 27-story office building with seven-story podium which host parking and amenities as gym and landscaped terraces serving the office tenants. The total gross area is approximately 515,000 square feet and building height is approx. 330ft. (*Senior Project Engineer, 2016*)
- **Maridence**, Nassau, BHS.* Structural design of a 10-story concrete building featuring office space and a parking garage. (*Project Engineer, 2015*)

- **Penny Lane**, Miami, FL.* Structural schematic design and design development of a three-story retail building. *(Project Engineer, 2015)*
- **Morocco Mall**, Casablanca, MAR.* Structural preliminary design and design development of a new shopping mall. The overall footprint of the building is approximately 500 meters long by 120 meters wide. The structure has two basement levels underneath two levels of retail. The roof structures covering the shopping mall are a series of glazed domes and large skylights with a steel structure. The design took into account local code and European requirements. *(Engineer, 2010)*

- **Sweetbird Boutique Hotel**, Miami, FL.* Structural schematic design of an eight-story boutique hotel with two levels of retail space below and amenities and pool deck on the roof. Project includes design of a one-story basement and thoughtful coordination between the hotel and retail functions and requirements to achieve maximum structural efficiency and respect for the architectural boutique concept. *(Project Engineer, 2015)*

Healthcare

- **Greater Accra Regional Hospital at Ridge**, Accra, Ghana. Structural design services for the 500,000-square-foot expansion of an existing hospital. Built in 1928 in a high seismic region, the original medical facility had to be modernized and expanded to accommodate the growing population's healthcare needs. The new complex will include a new 420-bed building, several ancillary buildings, a treatment block and a state-of-the-art maternity ward. Once complete, it will become one of the most advanced medical facilities in West Africa. The project has been designed on a fast-track schedule with multiple early procurement packages delivered in overlapping phases to complete construction by 2016. *(Project Engineer, 2015)*

Higher Education

- **Cornell Tech, Bloomberg Center**, Roosevelt Island, NY.* Structural design of a five-story steel building with an iconic, photovoltaic canopy roof structure and complex geometry access stair.
