Question 1:

Please provide your resume.

Answer:

With my background in art, mechanical design, and engineering, over the past 20 years I have been able to make Brodin Studios a turn-key provider of extremely high-quality sculptures with the help of my diverse team of 10 talented men and women. From the start of a statue in the 3D model to the final bronze we do everything in-house which makes the process completely unique to our studio.

Question 2:

Please provide a minimum of 3 and maximum of 5 bronze artwork examples. If you are supplying your examples below in the "Digital Images of portfolio / previous artwork" section, simply upload a statement in this section stating the images are located under work samples.

Answer:

images are located under work samples.docx [\(download\)](#)

Statement: Since Brodin Studios' inception 44 years ago we have created over 350 memorial statues in the United States and Canada most being public safety oriented (police, fire, military). Although a large portion of our portfolio is geared towards public safety, we have been producing more statues year-over-year of civic leaders, athletes/coaches, musicians, and authors. Along with our growth in this market our capabilities have exponentially increased; this has given us the ability to provide the highest detail, most true-to-appearance, and life-like qualities while still capturing the perceived movement and raw expression that artists strive for.
