**Abstract**

**Parallel Relationships - Architecture and Water: The Urban Spa**

by

**Tobi Aycock**

This thesis explores the relationship of architecture and water through the design of an urban spa that offers both a bodily and a poetic experience of water. Research included investigation of recent architectural projects that enhance and order the view, sound, and touch of water as well as projects that integrate fountains, showers and reflecting pools into the experience of a building.

In the design of the spa, the movement of water was based metaphorically on the natural water cycle: evaporation, condensation and collection of water in pools. The building presents fountains, rivulets, and pools in a descending sequence that represents the natural flow of water. The temperature of water and the activities of the spa follow the same descending sequence, progressing from a warm water bath at the top of the building to cool swimming pool at the plaza level in a contemporary interpretation of the experience of a Roman Bath.

**Date:** April 1, 2004

**Time:** 11:00 a.m.

**Place:** University Park, PCA 311

**Department:** School of Architecture

**Major Professor:** William McMinn

With all movement of the water, the outdoor spa, many of the air and the water.
