

CITY OF POMPANO BEACH
Broward County, Florida

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF POMPANO BEACH, FLORIDA, SUPPORTING THE COMBINED EFFORTS OF THE UNITED STATES CENTER FOR DISEASE CONTROL AND PREVENTION (“CDC”) AND THE DEPARTMENT OF JUSTICE (“DOJ”) TO CURTAIL THE OVERPRESCRIBING OF OPIOIDS BY PHYSICIANS THROUGH MORE PHYSICIAN EDUCATION AS WELL AS BETTER RISK ASSESSMENT OF PATIENTS; STRENGTHENING OF PRESCRIPTION DRUG MONITORING PROGRAMS IN EVERY STATE; AND ENSURING SAFE DRUG DISPOSAL; SUPPORTING THE EFFORTS OF THE CITY-COUNTY NATIONAL TASK FORCE ON THE OPIOID EPIDEMIC TO PROVIDE EDUCATIONAL OPPORTUNITIES AND INFORMATION SHARING FOR CITIES AND COUNTIES; DIRECTING THE APPROPRIATE CITY OFFICIALS TO FULLY SUPPORT THE GOALS AND OBJECTIVES OF THE ABOVE-DESCRIBED EFFORTS; DIRECTING THE CITY CLERK TO TRANSMIT A COPY OF THIS RESOLUTION TO EVERY CITY IN BROWARD COUNTY, TO THE BROWARD COUNTY BOARD OF COMMISSIONERS, THE BROWARD COUNTY LEAGUE OF CITIES, THE FLORIDA LEAGUE OF CITIES, GOVERNOR RICK SCOTT, STATE SENATORS, STATE REPRESENTATIVES, THE NATIONAL LEAGUE OF CITIES, U.S. SENATORS, AND U.S. REPRESENTATIVES; PROVIDING FOR SEVERABILITY; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City Commission of the City of Pompano Beach, Florida, recognizes that the heroin and prescription opioid epidemic is one of the most urgent law enforcement and public health challenges facing our country; and

WHEREAS, opioids are a class of drugs that includes the illegal drug heroin as well as powerful pain relievers available by prescription, such as oxycodone (oxycontin), hydrocodone (vicodin), codeine, morphine, fentanyl, methadone, and many others; and

WHEREAS, the Department of Health and Human Services recently announced that 3.8 million people ages 12 and older are currently misusing prescription pain relievers in our country; and

WHEREAS, in 2014, more than 60% of the 47,000 drug overdose deaths in America involved opioids, reflecting a dramatic increase over the past two decades; and

WHEREAS, according to the “CDC,” opioids are commonly prescribed for pain. In fact, an estimated 20% of patients presenting to physician offices with non-cancer pain symptoms or pain-related diagnoses receive an opioid prescription. In 2012 alone, health care providers wrote 259 million prescriptions for opioid pain medication, enough for every adult in the United States to have a bottle of pills; and

WHEREAS, opioid pain medication use presents serious risks, including overdose and opioid use disorder. From 1999 to 2014, more than 165,000 persons died from overdose related to opioid pain medication in the United States, and

WHEREAS, in the past decade while death rates for the top leading causes of death such as heart disease and cancer have decreased substantially, the death rate associated with opioid pain medication has increased markedly; and

WHEREAS, the sales of opioid pain medication have increased in parallel with opioid-related overdose deaths; and

WHEREAS, the Drug Abuse Warning Network estimated that greater than 420,000 emergency department visits were related to the misuse or abuse of narcotic pain relievers in 2011, the most recent year for which data is available; and

WHEREAS, scientific research has identified high-risk prescribing practices that have contributed to the overdose epidemic; and

WHEREAS, observational research showed significant increases in opioid prescriptions for pediatric populations from 2001 to 2010 and a large proportion of adolescents are commonly prescribed opioid pain medications for conditions such as headache and sports injuries; and

WHEREAS, use of prescribed opioid pain medication before high school graduation is associated with a 33% increase in the risk of later opioid misuse and misuse of opioid pain medications in adolescence strongly predicts later onset of heroin use. Thus, risk of opioid medication use in pediatric populations is of great concern; and

WHEREAS, on the average day at least 78 people will die from an opioid-related overdose, 3,900 people will use a prescription opioid outside of legitimate medical purposes and supervision, and 580 people will try heroin for the first time; now, therefore,
