**MEMORANDUM NO. 17-87**

DATE: 7/5/2017

TO: Mark Berman, City Attorney

FROM: Anthony Alhashemi, Project Manager I

**SUBJECT: Request for Resolution – FDOT Construction Agreement  
Fire Station 11 Emergency Signal and Crosswalk.**

---

**Background:**

A Construction Agreement was entered into with FDOT and the City back in 2012. The Construction Agreement was for the installation of a crosswalk and emergency traffic signal for Fire Station 11 on AIA. Due to unforeseen circumstances, the construction of the activities listed above were never completed and the previous Construction Agreement has expired.

**Recommendation:**

The City will need to enter into a new Construction Agreement with FDOT in order to complete the above mentioned work.

Attached please find the new Construction Agreement between City of Pompano Beach and the Florida Department of Transportation, along with previous executed Construction Agreement form 2012 and the City's approved Insurance.

The current Construction Agreement has been reviewed by FDOT and has been provided to the City's Risk Department for review.

Please prepare the Resolution for Commission consideration of the attached Construction Agreement

We would like to please have this Agenda Item placed on the next available Commission meeting. Please do not hesitate to contact me if any additional information is required (4029).

Thank you
