Re: Sole Source Purchase of Stryker Patient Hydraulic  
Stretchers and Power Load Systems

---

On July 25, 2017, the City Commission approved the acceptance of the US Department of Homeland Security (DHS), Federal Emergency Management Agency (FEMA) Assistance to Firefighters Grant (AFG) grant (EMW-2016-FO-04135) award for hydraulic patient stretchers and power load systems (Resolution #2017-297). Each rescue/ambulance currently has a Stryker hydraulic patient stretcher. As part of the grant, four (4) Stryker hydraulic stretchers will be upgraded, three (3) will be replaced and seven (7) Stryker power load systems will be installed. This provides the equipment needed for seamlessly power raising/lowering the patient stretcher and loading/unloading the patient stretcher in and out of the rescue/ambulance.

Attached are the sole source letter and quote from Stryker for the purchase of the needed equipment in the amount of \$195,728.00, which includes a trade in credit for the three (3) stretchers that are being replaced. This item can now be presented to the City Commission on September 12, 2017 for their approval in order to complete the purchase order.
