Subject: SR A1A and NE 2 Street, New Signal in Pompano Beach  
Mast-Arm Painting Maintenance by City of Pompano Beach

Dear Mark,

Broward County has no objection to the City of Pompano Beach painting and/or maintaining the paint finish on the traffic signal mast-arms and related structures at the intersection of SR A1A and NE 2 Street. The County does not object to the City of Pompano Beach and the Department entering into a maintenance agreement to perform and/or maintain the mast-arm painting in accordance with the District's mast-arm painting procedures and any other applicable paint-over-galvanized steel structure standards and specifications. County staff would appreciate at least seven (7) calendar days notification of any scheduled paint finish maintenance work to avoid any conflicts with any signal equipment maintenance to be performed by our agency.

If you have any questions, please feel free to contact me at (954) 847-2600.

Sincerely,

- 1 If an entry appears in column F&A, a shorter arm is required. This is obtained by removing length from the arm tip and the arm length shortened from FA to F&A. *SMA Standard*

2 If an entry appears in column U&A, a shorter pole is required. This is obtained by removing length from the pole tip and the pole length shortened from U to U&A.

3 Arm mounting height must be between 19-22 feet.

4 Pole items P2 and longer require a minimum 4.5 foot diameter drilled staff. Pole items P5 and larger require a minimum 5.0 foot diameter drilled staff.

5 Check this sheet with the Signal Designer's "Mast Arm Tabulation". See "Mast Arm Tabulation" for special instructions that include non-standard handle location, point edge, forwarder conformation, forwarder compatibility, and protection features.

Welded with Thread 17248 over 17255.
