

Charlotte Burrie Community Center Mosaic Team Project Statement

I propose to use ceramic circle shape elements as mosaic elements. Each piece is made individually by hand and symbolically represents each community member as unique and authentic individual. All circles (members of the community) are formed and organized in bigger circles by creating ripples. Ripple effect is known as subtle but powerful phenomena- it causes changes, movements, brings and spreads new ideas (actions).

Since we need hundreds of circular shape pieces for the mosaic, I would like to offer to conduct several workshops for the community members, where each person (of all ages) would have the opportunity to create an individual piece and become part of this process of enriching and beautifying Charlotte J. Burrie Civic Center.
