1.0 EXECUTIVE SUMMARY

EnviroDesign Associates, Inc. (EDA) has conducted a Phase I Environmental Site Assessment (ESA) in general accordance with the ASTM E1527-13 and industry accepted standards. The subject of this investigation "Raul Quintana TR Property" (Site) is a commercial property located at 2000 Hammondville Road, in Pompano Beach, Broward County, Florida 33066 and identified by (Broward County Tax ID# 484234270010). On December 13, 2018, the City of Pompano Beach (Client) provided EDA with written authorization to proceed with this investigation. This report is prepared for the sole use of the Client (user) and cannot be relied upon by other third parties without the express written consent of the Client and EDA. This reports completes EDA's contract for service in accordance with EDA Proposal No. 18156. The purpose of this assessment is to evaluate the general likelihood of "Recognized Environmental Conditions" being present on the Site (as defined by ASTM and Section 2.2 of this report) by means of the scope of work listed below.

<u>Phase I Scope-of-Work:</u> EDA conducted project research in accordance with industry accepted methods, investigating including; a physical inspection of the property, examination of the historical background and operating history of the Site, the review of relevant and reasonably ascertainable environmental, historical, and physical setting record sources in accordance with ASTM, and interviews with present owners, operators, and local government officials (as available).

Historical Adjoining Property Uses	NO	7.6		
Historical Adjoining Property Uses	NO	7.6		

Recognized Environmental Condition:

Based on information in historical City Directories available at the Broward County Public Library, the Site was occupied by Southern Oil Service in 1958, 1959, and 1961. No additional historical records or environmental record sources were available to determine what this historical uses included and whether oil storage and distribution occurred on the Site. This use predates regulatory registration, tracking and testing requirements originating in part from the 1980 Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This historical land use is considered a Recognized Environmental Condition. EDA recommends the performance of a Phase II ESA, consisting of a geophysical survey and soil and groundwater assessment activities, be completed to develop additional information regarding this concern.

2.0 INTRODUCTION

EnviroDesign Associates, Inc. (EDA) has conducted a Phase I Environmental Site Assessment on the commercial properties "Raul Quintana TR Property" located at 2000 Hammondville Road, Pompano Beach, Broward County, Florida. This report was completed in accordance with the American Society for Testing and Materials (ASTM) Standard E1527-13, that guidance document being consistent and compliant with the *All Appropriate Inquiries (AAI)* final rule of the United States Environmental Protection Agency (EPA) effective November 1, 2006. This practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the "landowner liability protections," or "LLPs"): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B).

2.1 Purpose

The purpose of this assessment is to evaluate the general likelihood of "Recognized Environmental Conditions" being present on the Site, as defined by ASTM.

2.2 Definitions

A Recognized Environmental Condition (REC) is defined in ASTM E1527-13 as: "The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not Recognized Environmental Conditions."

A Historical Recognized Environmental Condition (HREC) is defined in ASTM E1527-13 as: "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

A Controlled Recognized Environmental Condition (CREC) is defined in ASTM E1527-13 as: "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

A Business Environmental Risk (BER) is defined by the ASTM E1527-13 Standard as: "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations."

A de minimis condition is defined by ASTM as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

2.3 Detailed Scope of Services

The following scope of work was performed to fulfill the project purpose:

- <u>Visual and Physical Inspection</u> A visual and physical inspection of the property was completed by or under the direct supervision of an Environmental Professional meeting the requirements of 40 CFR §312.10. EDA systematically traversed accessible interior and exterior areas of the Site in an effort to obtain information indicating the likelihood of identifying Recognized Environmental Conditions (REC's) in connection with the property.
- <u>Historical Background</u> EDA completed a historical background and operating history evaluation of the Site. Former site uses were identified through the components of the ASTM Phase I ESA process including site inspection, interviewing key personnel, and the review of historical record sources.
- <u>Records Review</u> A records review was conducted to include environmental, historical, and physical setting record sources in accordance with ASTM E1527-13. EDA retained Environmental Data Resources, Inc. (EDR) to conduct a database search of the applicable local, tribal, State, and Federal databases. Other record sources that may include information on environmental conditions and historical use were also searched by EDA, as needed or required by the ASTM standard.
- <u>Interviews</u> Interviews were conducted to obtain information indicating the likelihood of identifying Recognized Environmental Conditions (REC's) in connection with the property. Parties interviewed included individuals familiar with the Site such as the current and past owners, operators of the Site (as available), and state or local government officials.

2.4 Significant Assumptions

It is assumed that this investigation is being conducted to identify Recognized Environmental Conditions concerning the Site, and to permit the user to qualify for one of the LLPs to CERCLA liability. However, the completion of this assessment alone may not be sufficient to qualify the user for an LLP. For such a determination, legal counsel may be needed.

We have not tried to independently verify the information provided by the parties interviewed or information gathered from other sources in the process of this assessment. Unless we had reasons to suspect the accuracy of information gathered, we have relied on the information as true, accurate, and complete.

Uncertainty Not Eliminated - No environmental site assessment can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions in connection with a property, and this practice recognizes reasonable limits of time and cost.

Not Exhaustive - All appropriate inquiries does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and the reduction of uncertainty about unknown conditions resulting from additional information.

2.5 Limitations and Exceptions

This report was prepared in accordance with the scope and limitations set forth in various sections of the ASTM E 1527-13. This Phase I Environmental Assessment is based upon a visual inspection of the Site, a windshield survey of the neighboring areas, and a review of relevant and available documentation. The activities described, and the results, findings, and recommendations included herein are based on information gathered during an investigation which was limited in accordance with ASTM E1527-13 "Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessments" and contains all of the limitations inherent in these methodologies.

A more comprehensive investigation, which may be done later, may produce different results. The information contained herein was prepared for the Client's exclusive use, solely in conjunction with the subject investigation. The findings and recommendations set forth herein are based on the conditions encountered at the Site and the evidence which was available at the time the Site investigation was conducted. Future investigations and findings could change the contents of this report. This Phase I Environmental Assessment and the report preparation were conducted in accordance with generally-accepted environmental consulting practices. No other expressed or

implied warranty is made. This report is not a legal opinion which can only be provided by individuals licensed to practice law.

ASTM E 1527-13 Non-scope considerations as specified in ASTM including Radon, Wetlands, Regulatory Compliance, Endangered Species, and Indoor Air Quality are excluded from the scope of this investigation. In addition, the evaluation of Vapor Encroachment is excluded, as it is not required by ASTM to achieve compliance with all appropriate inquiries. These additional services can be completed at the request of the client.

2.6 Special Terms and Conditions

No special terms and conditions apply to this Phase I ESA.

2.7 User Reliance

This Phase I Environmental Site Assessment was prepared exclusively for and may be relied upon by the City of Pompano Beach (client) its successors and/or assigns. Reliance on the information and conclusions in this report by any other person or entity is not authorized without the written consent of EnviroDesign Associates, Inc.

3.0 SITE DESCRIPTION

3.1 **Property Location and Legal Description**

Location: The Site is located at 2000 Hammondville Road in the City of Pompano Beach, Broward County, Florida. The Site is positioned within Section 34, Township 48 South, and Range 42 East and at Latitude 26° 14' 28.50" N, Longitude 80° 8' 59.51" W.

Legal Description:

RENTERIA INC PLAT 166-33 B PARCEL A & B; LESS POR PAR A DESC AS THE W 15 OF W 124.9 OF NE 1/4 OF SW 1/4 OF NW 1/4 LYING SW OF COUNTY ROAD LESS S 215;& LESS POR PAR A DESC AS E 109.9 OF S 295

Broward County Property IDs#: 484234270010. Broward County Property Appraiser parcel information is included in Appendix IV.

Please refer to Appendix I for Site map illustrations including Figure 1 (Site Location Map), Figure 2 (Site Map), Figures 3-1 through 3-11 current and historical aerial photographs, and in Figure 4 (Wellfield Protection Zones). These figures are useful for the following Site observations.

3.2 Site and Vicinity General Characteristics

The Site totals 4.14-acres of 10-39 Commercial General Business Zoned property owned by Raul Quintana TR Property. The Site is located in between Hammondville Road (Martin Luther King Blvd.) and Northwest 9th Street and approximately 560-feet east of N Powerline Road, in Pompano Beach, Broward County, Florida. Property uses in the

immediate vicinity include Commercial zoned, vacant property, multi-family apartments, stores, and roadways. Commercial uses dominate the general vicinity of the Site.

3.3 Current Use of the Property

The Site is currently used as a restaurant/nightclub and outdoor athletic sports field (soccer, volleyball, and cricket).

3.4 Descriptions of Structures, Roads, Other Improvements

One structure is located near the northeastern property corner of the Site comprising a single-story $\pm 5,206$ square foot concrete block, wood and steel structure constructed on a monolithic concrete slab foundation. In addition, an outdoor kitchen and concession stand measuring approximately 10-feet by 20-feet is located central to the Site. This area is used for a concession and taco stand during outdoor sporting events. A soccer field is located immediately west of the concession stand and a volleyball field is located near the southeastern corner of the Site. The main access to the Site is located on the north side of the Site, bordering Hammondville Road, and extending into the asphalt paved parking area. Gated Site access is located to the south. The Site is bordered by a fourfoot in-height chain-link fence on north, east, west, and part of the south side, part of the south side is bordered by a concrete block wall. Groundcover at the Site comprises maintained grasses, asphalt paved parking and driveway, several trees, natural vegetation, and the restaurant building footprint. The subject property is bounded to the south by NW 9th Street.

The Site configuration, layout and boundaries are depicted in (Figure 2) and recent aerial photograph (Figure 3-1) included in Appendix IV.

3.5 Current Uses of Adjoining/Surrounding Properties

The north and west sides of the Site are bordered by vacant land. The areas to the north and west of these vacant parcels are occupied by a convenience store (northwest) and Powerline Road. An FPL Electrical substation and gas station are located approximately 450-feet and 600-feet northwest of the Site respectively. The Site setting includes commercial uses primiarly bordering Hammonville Road and Powerline Road with residential land uses dominating interior areas. The table below provides a summary of current uses of adjoining properties, which are based on observations during our site reconnaissance and a review of aerial photographs:

Adjoining/Surrounding Property Use Description				
Direction	Comments			
North	Vacant commercial property followed by Hammondville Road.			
South	Multi-unit residential apartments followed by NW 9th St., followed by vacant commercial property.			
East	Multi-family apartments and vacant commercial property.			
West	est Vacant commercial property followed by, Powerline Road.			

3.6 Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions

The State of Florida is located within the Coastal Plain physiographic region. The hydrogeology of Florida consists of three major hydrogeologic units including the surficial aquifer system, the intermediate confining unit, and the Floridian aquifer system. Specific details concerning topography, primary soil type, hydrogeology, hydrology, and topography are detailed in Section 7.6 (Physical Setting Sources) and the EDR Geo check Physical Setting Sources Addendum.

4.0 USER PROVIDED INFORMATION

Summary: User Provided Information DID NOT IDENTIFY Recognized Environmental Conditions.

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete. A summary of the information provided by the client is presented below.

4.1 Title Records

A Commitment of Title was not provided by the client as part of this investigation.

4.2 Environmental Liens or Activity and Use Limitations

No environmental liens or activity and use limitations in connection with the Site were identified by the Client.

4.3 Specialized Knowledge

The Client reported that they have no specialized knowledge or experience that is material to Recognized Environmental Conditions in connection with the property.

4.4 Owner, Property Manager, and Occupant Information

The Client provided EDA with the following:

• Site address.

4.5 **Proposed Site Drawings and Structure Information**

Site drawings and structure information was obtained on the Broward County Property Appraiser website at <u>http://www.bcpa.net/</u>

4.6 Valuation Reduction for Environmental Issues

EDA was not informed of a valuation reduction for environmental issues.

4.7 Commonly Known or Reasonably Ascertainable Information

The client provided general information related to the project including:

• Site address.

4.8 Historical Phase I Investigations

No historical Phase I investigations were provided by the client during our assessment.

5.0 SITE RECONNAISSANCE

Summary: Site Reconnaissance DID NOT IDENTIFY Recognized Environmental Conditions.

The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying Recognized Environmental Conditions in connection with the property.

5.1 Methodology and Limiting Conditions

EDA completed site reconnaissance on December 20, 2018. Site reconnaissance methods included observing the features and uses of accessible interior and exterior areas of the property. The physical reconnaissance was generally limited to areas that potentially could have an impact on the Site based on location, improvement, or potential concern.

5.2 General Site Setting

The Site is located in an urban area that includes surrounding residential and commercial uses. The general setting is three residential properties, situated in an area occupied by residential uses. The following table details site setting information documented during this investigation:

General Site Setting				
Feature	Description			
Current Site Uses	Restaurant and outdoor sporting field.			
Past Site Uses	None observed during site reconnaissance.			
Current uses of adjoining properties	 North: Vacant commercial property followed by Hammondville Road. South: Multi-unit residential apartments followed by NW 9th St., followed by vacant commercial property. East: Multi-family apartments and vacant commercial property. West: Vacant commercial property followed by, Powerline Road. 			
Past uses of adjoining properties	None observed during site reconnaissance.			

General Site Setting				
Feature	Description			
Current or past uses	None observed during site reconnaissance.			
in the surrounding				
area				
Geologic Conditions	Urban land.			
Hydrogeologic	Surficial Aquifer, estimated depth to water 9-feet below ground			
Conditions	surface.			
Topographic	The topography of the Site is relatively flat.			
Conditions				
General Description	Single Story restaurant building consists of a ceramic tile floor,			
of Structures	drywall and, an acoustic drop ceiling			
Roads	Hammondville Road (north-bounding).			
	NW 9 th Street (south-bounding)			

5.3 Contaminant Sources (Interior/Exterior Observations)

Exterior Observations			
Feature	Description		
Hazardous Substances	None observed.		
Petroleum Products	Not a REC.		
A tank containing propane for cooking v	was observed near the west side of the		
restaurant building. No evidence of a leak v	vas observed.		
Odors	None observed.		
Pools of liquid	None observed.		
Drums	None observed.		
Unidentified Substance Containers	None observed.		
PCB's	Not a REC.		
A pole mounted transformer was observed near the north side of the restaurant. No			
evidence of a leak was observed.			
Discharge features: None observed.			
Pits, ponds, lagoons used for waste disposal. None observed.			
Stained soils/pavement greater than 2ft ²	None observed.		
Stressed Vegetation	None observed.		
On-site Solid Waste Disposal	None observed.		
Wastewater discharge features	None observed.		
Railroad tracks	None observed.		
Wells	Not a REC.		
Irrigation well was observed near the center to the west side of the property.			
Septic systems	None observed.		

5.4 Interior Observations

EDA inspected accessible areas of the interior of the \pm 5,206 square-foot restaurant building. Inaccessible areas included the walk in coolers and several closets where keys were not available. The restaurant building comprises a ceramic tile floor, drywall and, an acoustic drop ceiling. In addition, EDA inspected the approximate 10-foot by 20-foot concession kitchen. This outdoor cafeteria consists of concrete floor and metal sheet roofing.

5.5 Asbestos

The assessment of Asbestos was not included in the scope of work.

5.6 Lead-based Paint

The assessment of Lead-Based Paint (LBP) was not included in the scope of work.

5.7 Mold

The assessment of Mold or Microbial growth was not included in the scope of work.

6.0 INTERVIEWS

Summary: Interviews DID NOT IDENTIFY Recognized Environmental Conditions.

6.1 Interview with Owner

The owner representatives Raul Quintana and Eva Renteria completed a standard owner interview questionnaire, which did not identify any Recognized Environmental Conditions. The owner provided the following information:

- The structure in property is used as a restaurant/bar, the rest of the Site is used as a soccer and volleyball field.
- The cars parked at the Site belong to tenants who live in the bordering apartment buildings to the south.
- The City of Pompano provides water and sewer to the property.
- The property has one irrigation well located on the west side of the soccer field.
- A Phase 1 ESA was conducted at site in 2002, a copy of the report is not available however, the site owner representative did not recall any RECs.

6.2 Interview with Site Manager

The Site Manager is the Raul Quintana. Mr. Quintana provided site access and answered interview owner questions as described in section 6.1 above.

6.3 Interview with Occupants

No occupants were present.

6.4 Interviews with Local Government Officials

In place of an interview with the State of Florida Department of Environmental Protection (FDEP), EDA reviewed FDEP storage tank compliance files available online at <u>https://depedms.dep.state.fl.us/Oculus/servlet/login</u>. In addition, EDA reviewed State environmental record sources available on FDEP Map Direct <u>https://ca.dep.state.fl.us/mapdirect/</u>.

The review of State and local government environmental record sources available online constitutes a government interview response in accordance with the All Appropriate Inquiry rule.

6.5 Interviews with Others

No other interviews were conducted

7.0 RECORDS REVIEW

Summary: Records review IDENTIFIED Recognized Environmental Conditions, including the following:

• The site was occupied by Southern Oil Service in 1958, 1959, and 1961.

The purpose of the records review is to obtain and review records that will help identify Recognized Environmental Conditions in connection with the property.

7.1 Environmental Records Sources per Scope of Work

A search of Environmental Record Sources was completed by Environmental Data Resources (EDR) using the Approximate Minimum Search Distances (AMSD) of ASTM E-1527-13. A copy of the EDR Radius Map Report is included in Appendix III, which includes plotted facility information and database definitions. Please refer to the EDR Report for a complete description of database listings and plotted facilities.

Standard Environmental Record Sources - Discussion of Findings:

EDA reviewed Standard Environmental Record Sources. The facilities identified pose no significant risk to the soil and groundwater quality at the Site.

Additional Environmental Record Sources - Discussion of Findings:

EDA reviewed Additional Environmental Record Sources. The facilities identified pose no significant risk to the soil and groundwater quality at the Site.

High-Risk Historical Records – Discussion of Findings:

EDA reviewed High-Risk Historical Environmental Record Sources. The facilities identified pose no significant risk to the soil and groundwater quality at the Site.

Recovered Government Archives – Discussion of Findings:

EDA reviewed Recovered Government Archives Environmental Record Sources. The facilities identified pose no significant risk to the soil and groundwater quality at the Site.

Orphan Summary

The EDR Report identified two unmappable 'orphan' facilities. The facilities were reviewed and do not pose a significant environmental concern to the Site.

7.2 **Deviations**

No deviations are noted.

7.3 Additional Environmental Record Sources

File Review

In accordance with ASTM E1527-13, if the property or any of the adjoining properties is identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing should be reviewed. The purpose of the regulatory file review is to obtain sufficient information to assist the environmental professional in determining if a recognized environmental condition, historical recognized environmental condition exists at the property in connection with the environmental database listing. Select file review documents are included in Appendix IV. Facilities with No Reported Discharge, No Violations Reported, Violations Corrected, No Further Action Recommended, Site Rehabilitation Completion Order issued, and No Cleanup Required are not included in the File review section. Similarly, facilities that are licensed waste haulers with no reported discharges are omitted from the file review section. Please refer to text in EDR radius map report in Appendix III for additional facility information.

EDA completed a review of environmental record sources maintained on the FDEP's OCULUS file management system and Map Direct GIS database. The following information was obtained through the file review process:

- Detail Summary Facility	EDR Map ID Direction Distance Distance ft Elevation Elevation ft	Database	Findings
POMPANO BEACH NORTHWEST AREA POMPANO BEACH, FL S105590756	Region < 1/8 1 ft.	BROWNFIELDS	Not a REC
BROWNFIELDS: A contiguous area of one or more brownfield sites, some of which may not be contaminated, and which has been designated by a local government by resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency-designated brownfield pilot projects. 376.79(4), F.S. Inclusion in a Brownfield area is not an indicator of contamination, only that economic incentives are present within the brownfield program to clean up and redevelop properties within the area. The most recent document on file is a resolution map dated December 21, 1999.			
SUNSHINE #512 1231 N POWERLINE RD POMPANO BEACH, FL 33069 U003993960	C9 NW 1/8-1/4 785 ft. Higher 13 ft.	UST Financial Assurance	Not a REC
UST: The facility has two 12,000-gallon Underground Storage Tank (UST) for unleaded gas and one 12,000-gallon UST for vehicular diesel. According to the inspection report by Broward County Environmental Protection and Growth Management Department, dated July 30, 2018, the facility is in compliance. This facility is located approximately 785-feet northwest and hydraulically down-gradient to the Site, and therefore does not pose a significant environmental concern to the Site.			
TRI COUNTY TRUCK & EQUIPMENT 1440 N POWERLINE RD POMPANO BEACH, FL 33069 1000151184	B11 NNW 1/8-1/4 820 ft. Lower 9 ft.	RCRA-SQG FINDS ECHO BROWARD CO. HM	Not a REC
RCRA-SQG: Small Quantity Generator - Handler generates more than 100 and less than 1000 kg of hazardous waste during any calendar month. No violations found. This facility is located approximately 823-feet north-northwest and hydraulically down-gradient to the Site, and therefore does not pose a significant environmental concern to the Site. FINDS ECHO: The Facility Index System/Facility Registry System (FINDS) is an FDEP listing that contains both facility information and 'pointers' to other sources that contain more detail. Inclusion on this database only indicates that the facility has the potential for impact and is not an indicator of a discharge of petroleum or hazardous materials. No violations found.			
HEAVY DUTY SERVICES, INC. 1967 HAMMONDVILLE RD POMPANO BEACH, FL 33069 S111696883	A2 North < 1/8 309 ft. Lower 8 ft.	RCRA-CESQG	Not a REC
RCRA-CESQG: (Resource Conservation and Recovery Act-Conditionally Exempt Small Quantity Generator): Facility generated 100kg or less of hazardous waste per month. According to the EDR report, no violations were found. This facility does not pose a significant environmental concern to the Site. This facility is located approximately 309-feet north and hydraulically cross-gradient to the Site, and therefore does not pose a significant environmental concern to the Site.

STEPHANIE & ANDRA DISCOUNT TIRES LLC 601 N. POWERLINE ROAD POMPANO BEACH, FL 33069 S113898358	16 SW 1/4-1/2 1611 ft. Lower 9 ft.	SWF/LF	Not a REC
SWF/LF: According to the FDEP record the facility had a license to function as waste tire collector facility until April 1, 2016. No violations found. This facility is located approximately 1,611-feet southwest and hydraulically cross-gradient to the Site, and therefore does not pose a significant environmental concern to the Site.			
DINA & EMAN INC 1511 HAMMONDVILLE RD POMPANO BEACH, FL 33069 U001377187	E20 ESE 1/4-1/2 2026 ft. Higher 12 ft.	LUST UST	Not a REC
LUST: This facility is Eligible for cleanup in the FDEP State-funded ATRP cleanup program with Priority Cleanup Score of 29. The most recent technical report on-file is a "Task 1 – Groundwater Sampling Letter Report", which was completed on December 1, 2017. According to the report benzene, naphthalene, 1-methylnaphthalene, and 2-methylnaphthalene were found in concentrations above Groundwater Cleanup Target Level in some of the monitoring wells. The report included a contaminant plume map which indicated that the groundwater impacts are confined to the property boundaries and immediate area to the northwest. This facility is located approximately 2,026-feet east-southeast and hydraulically cross-gradient to the Site, and therefore does not pose a significant environmental concern to the Site.			
COASTAL TRUCK STOP 2095 HAMMONDVILLE RD POMPANO BEACH, FL 33069 U001342329	B6 NNW < 1/8 605 ft. Higher 11 ft.	UST	Not a REC
UST: According to the Site Rehabilitation Completion Order dated April 1, 2010, this facility meets the criteria set forth in Rule 62-770.680(1), Florida Administrative Code, and is released from any further obligation to conduct site rehabilitation. This facility is located approximately 605-feet north-northwest and hydraulically down-gradient to the Site, and therefore does not pose a significant environmental concern to the Site.

7.5 Historical Use Information on the Property

7.5.1 Historical Summary

The Site comprised of two commercial structures from approximately 1950s to 1980s. One of the buildings was removed in the 1980s. One single story building near northeast corner has occupied the Site since the 1980s to present.

7.5.2 Aerial Photography Review

Available and reasonably ascertainable aerial photographs were reviewed to allow identification of development and activities of areas encompassing the property. The following table summarizes our observations of historical aerial photographs:

Year	Observations
1949	The Site appears vacant. Scattered residential uses are present in the surrounding area. Hammondville Road is paved and borders the Site to the north. Powerline Road is present to the west and exists as an unimproved dirt road.
1958	Two buildings are present on the Site including the northern portion of the existing restaurant building and a north/south oriented rectangular warehouse measuring approximately 50-feet by 200-feet and located in the footprint of the existing parking area lying between the restaurant building and sports filed. Hammondville Road remains a major thoroughfare and Powerline Road is now paved to the west. Commercial warehouse buildings are positioned south of the Site and scattered residential units are present.
1968	Land use conditions around the immediate area of the Site are similar to what was observed in the 1958 aerial photograph. Powerline Road now jogs to the southwest beginning at NW 9 th Street, a borrow pit has been excavated to the west of Powerline Road and a residential community is under construction in this area.
1973	Residential uses have accumulated in the surrounding area. No other major changes are noted.
1981	The rectangular warehouse building described in the 1958 aerial has been demolished. The demolished building's footprint now appears as a paved parking area. The remaining building currently occupies the Site. No other major changes are noted.
1988,	A commercial building has been built near the northwest corner of the Site.
1992, 1995	Residential and commercial uses have accumulated in the surrounding area. No other major changes are noted.
2017	No other major changes are noted. The Site and surrounding land use appear similar to the current conditions.

7.5.3 Property Ownership Records

The client did not provide a chain of title. According to the Broward County Property Appraiser, the current property owners of the Site are Lyndall Lane LLC and KBHS REO.

7.5.4 Sanborn Fire Insurance Map Review

A Sanborn Fire Insurance Map search was performed as part of this investigation. Sanborn Maps were not available for this area.

7.5.5 City Directory Review

Local street directories were not reasonably ascertainable or available for review during the time allotted for this investigation. The review of ASTM standard historical sources including aerial photographs and environmental record sources meets the general intent of the ASTM E1527-13 Standard.

EDA reviewed historical city directory listings, as available in the Broward County Public Library. A summary is presented below.

Date(s)	Property Address: 2000 Hammondville Road Comments	Adjoining Property Address: Comments North: 2050 Hammondville Rd. South: 2005, 1899 NW 9 th St. East: 2002 Hammondville Rd.
1958	Friendly Café restaurant, grocery, Myrics Surplus Store, Southern Oil Co.	North: Not listed South: - East: Not listed
1959	Friendly Café restaurant, grocery, Myrics Surplus Store, Southern Oil Co	North: Not listed South: - East: Not listed
1961	Willie PI restaurant, Shop Eze grocery, Broward Machinery & Sup Co, Southern Oil.	North: Not listed South: - East: Not listed
1965	Willie PI restaurant, Shop Eze Grocery	North: Not listed South: - East: Not listed
1970	Vacant	North: Not listed South: Not listed East: Not listed
1976	Campbell's Auto Parts, Wesley's TV & AppInc	North: Not listed South: Not listed East: Not listed
1979	Campbell's farm supplies, Murray's radio & TV	North: Not listed South: Not listed East: My lady motel and residential.
1986	Chuco Grocery and Starlight Restaurant	North: Not listed South: Residential East: My lady motel, Williams plumbing
1989	Chuco Grocery and Starlight Restaurant	North: Not listed South: Residential East: My lady motel and residential.
1993	Starlight Restaurant	North: Freeze food market South: - East: Not listed
1998	Starlight Restaurant	North: Freeze food market South: - East: residential

2009	Cornelius Barbara	North: Freeze food market South: - East: Not listed
2015	Starlight Restaurant	North: Freeze food market South: - East: Not listed

Finding: The Site was occupied by Southern Oil Service in 1958, 1959, and 1961. No additional historical records or environmental record sources were available to determine what this historical uses included and whether oil storage and distribution occurred on the Site. This historical land use is considered a Recognized Environmental Condition. Limited Phase II soil and groundwater testing should be completed in the vicinity of the on-site structure to determine if this historical use resulted in an undocumented petroleum discharge to the soil and groundwater of the Site.

7.5.6 Land Use Records

According to information obtained from the Broward County Property Appraisers Office, the Site is zoned B-3 General Business.

7.5.7 Other Historical Resources

No other historical sources were reviewed.

7.6 Historical Use Information on Adjoining Properties

	Past Use	Recommendations
North:	Vacant and Hammondville Road	None
South:	NW 9 th Street then vacant and residential	None
East:	Residential.	None
West:	Vacant then Powerline road.	None

7.7 Data Gaps

Data gaps are deviations in the ASTM recommended guidelines for records review, site reconnaissance, and interview processes. Significant data gaps can affect the ability of the environmental professional to identify Recognized Environmental Conditions associated with the current and past uses of the Site. Data gaps encountered during this investigation include the inability to identify historical uses back to 1940. However, based on other information sources cited in this report and our professional experience, it is our opinion that the identified data gaps are not significant, and did not limit our ability to identify Recognized Environmental Conditions.

8.0 FINDINGS

Findings: Based on information in historical City Directories available at the Broward County Public Library, the Site was occupied by Southern Oil Service in 1958, 1959, and 1961. No additional historical records or environmental record sources were available to

determine what this historical uses included and whether oil storage and distribution occurred on the Site.

9.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 on the "Raul Quintana TR Property "Site" located at 2000 Hammondville Road, Pompano Beach, Broward County, Florida. Any exceptions to, or deletions from, this practice are described in Sections 2.3 and 2.4 of this report. This assessment has revealed evidence of Recognized Environmental Conditions in connection with the Site.

The Site was occupied by Southern Oil Service in 1958, 1959, and 1961. No additional historical records or environmental record sources were available to determine what this historical uses included and whether oil storage and distribution occurred on the Site.

10.0 OPINIONS AND RECOMMENDATIONS

It is EnviroDesign Associates, Inc. (EDA's) opinion that this inquiry has identified conditions indicative of releases or threatened releases. Based on information in historical City Directories available at the Broward County Public Library, the Site was occupied by Southern Oil Service in 1958, 1959, and 1961. EDA recommends the performance of a Phase II ESA, consisting of a geophysical survey and soil and groundwater assessment activities, be completed to develop additional information regarding this concern.

11.0 CERTIFICATION STATEMENT

January 10, 2019

Attn: Vincent Wooten City of Pompano Beach 100 West Atlantic Boulevard, Suite 220 Pompano Beach, FL 33060 (954) 786-4658

RE: Phase I Environmental Site Assessment of:

Raul Quintana TR Property 2000 Hammondville Road Pompano Beach, Broward County, Florida 33066

Dear Mr. Wooten:

EnviroDesign Associates, Inc. (EDA) has completed a Phase I Environmental Site Assessment (ESA) for the above-referenced property. This investigation was conducted in accordance with ASTM Practice E 1527-13 entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM Standard), and the EPA Rule entitled, "Standards and Practices for All Appropriate Inquiries; Final Rule" (AAI Rule), 40 CFR Part 312 and EDA's professional judgment. We certify the contents of this report to be complete and accurate to the above-referenced standards.

We appreciate the opportunity to offer our professional services. Please do not hesitate to contact us if you have any questions or if we can be of further assistance.

Sincerely,

EnviroDesign Associates, Inc.

Parvathy Menon Project Manager

Scot E. Wehmeyer, MBA, P.G. Senior Project Manager

12.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 11/14/2018 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly

known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 11/14/2018 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the SWF/LF list, as provided by EDR, has revealed that there are 5 SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

FI Sites: This summary status report is a compilation and revision of other existing lists. It was developed from a number of lists including the Eckhardt list, the Moffit list, the EPA Hazardous Waste Sites list, EPA's Emergency and Remedial Response Information System list (RCRA Section 3012), and existing department lists such as the Obsolete Uncontrolled Hazardous Waste Sites list. The purpose of this list is to track the progress of activities within and outside the department as they relate to the listed sites. It is not a list of uncontrolled sites or sources causing environmental contamination. The Sites List comes from the Department of Environmental Protection.

A review of the FI Sites list, as provided by EDR, and dated 12/31/1989 has revealed that there are 2 FI Sites sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

- . Waste name:

IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 11/14/2018 Date Data Arrived at EDR: 11/27/2018 Date Made Active in Reports: 12/07/2018 Number of Days to Update: 10 Source: EPA Telephone: N/A Last EDR Contact: 11/27/2018 Next Scheduled EDR Contact: 01/14/2019 Data Release Frequency: Quarterly

NPL Site Boundaries

EPA Region 8 Telephone: 303-312-6774

EPA Region 9 Telephone: 415-947-4246

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 11/14/2018 Date Data Arrived at EDR: 11/27/2018 Date Made Active in Reports: 12/07/2018 Number of Days to Update: 10 Source: EPA Telephone: N/A Last EDR Contact: 11/27/2018 Next Scheduled EDR Contact: 01/14/2019 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 11/14/2018 Date Data Arrived at EDR: 11/27/2018 Date Made Active in Reports: 12/07/2018 Number of Days to Update: 10 Source: EPA Telephone: N/A Last EDR Contact: 11/27/2018 Next Scheduled EDR Contact: 01/14/2019 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016 Date Data Arrived at EDR: 01/05/2017 Date Made Active in Reports: 04/07/2017 Number of Days to Update: 92 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 07/06/2018 Next Scheduled EDR Contact: 10/15/2018 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/14/2018 Date Data Arrived at EDR: 11/27/2018 Date Made Active in Reports: 12/07/2018 Number of Days to Update: 10 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 11/27/2018 Next Scheduled EDR Contact: 01/28/2019 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 11/14/2018 Date Data Arrived at EDR: 11/28/2018 Date Made Active in Reports: 12/07/2018 Number of Days to Update: 9 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 11/28/2018 Next Scheduled EDR Contact: 01/28/2019 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/01/2018	Source: EPA
Date Data Arrived at EDR: 03/28/2018	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (404) 562-8651 Last EDR Contact: 12/03/2018 Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (404) 562-8651 Last EDR Contact: 12/03/2018 Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (404) 562-8651 Last EDR Contact: 12/03/2018 Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/31/2018 Date Data Arrived at EDR: 08/28/2018 Date Made Active in Reports: 09/14/2018 Number of Days to Update: 17 Source: Environmental Protection Agency Telephone: 703-603-0695 Last EDR Contact: 11/28/2018 Next Scheduled EDR Contact: 03/11/2019 Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/24/2018 Date Data Arrived at EDR: 09/25/2018 Date Made Active in Reports: 11/09/2018 Number of Days to Update: 45 Source: National Response Center, United States Coast Guard Telephone: 202-267-2180 Last EDR Contact: 12/21/2018 Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

SHWS: Florida's State-Funded Action Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal institutional control / engineering control registries

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

State and tribal Brownfields sites

BROWNFIELDS AREAS: Brownfields Areas Database

A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

Date of Government Version: 09/11/2018 Date Data Arrived at EDR: 10/02/2018 Date Made Active in Reports: 12/19/2018 Number of Days to Update: 78 Source: Department of Environmental Protection Telephone: 850-245-8934 Last EDR Contact: 10/02/2018 Next Scheduled EDR Contact: 01/14/2019 Data Release Frequency: Quarterly

BROWNFIELDS: Brownfields Sites Database

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination.

Date of Government Version: 09/27/2018 Date Data Arrived at EDR: 10/02/2018 Date Made Active in Reports: 12/19/2018 Number of Days to Update: 78 Source: Department of Environmental Protection Telephone: 850-245-8927 Last EDR Contact: 10/02/2018 Next Scheduled EDR Contact: 01/14/2019 Data Release Frequency: Semi-Annually

BSRA: Brownfield Site Rehabilitation Agreements Listing

The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

Date of Government Version: 08/23/2018 Date Data Arrived at EDR: 10/02/2018 Date Made Active in Reports: 12/19/2018 Number of Days to Update: 78 Source: Department of Environmental Protection Telephone: 850-245-8934 Last EDR Contact: 10/02/2018 Next Scheduled EDR Contact: 01/14/2019 Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 08/31/2018 Date Data Arrived at EDR: 09/25/2018 Date Made Active in Reports: 11/09/2018 Number of Days to Update: 45 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 12/21/2018 Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 11/05/2018 Next Scheduled EDR Contact: 02/18/2019 Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 11/09/2018 Next Scheduled EDR Contact: 02/18/2019 Data Release Frequency: Varies

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2016 Date Data Arrived at EDR: 06/21/2017 Date Made Active in Reports: 01/05/2018 Number of Days to Update: 198 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 12/21/2018 Next Scheduled EDR Contact: 04/01/2019 Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2016 Date Data Arrived at EDR: 01/10/2018 Date Made Active in Reports: 01/12/2018 Number of Days to Update: 2 Source: EPA Telephone: 202-566-0250 Last EDR Contact: 11/16/2018 Next Scheduled EDR Contact: 03/04/2019 Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- Groundwater flow direction, and
 Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

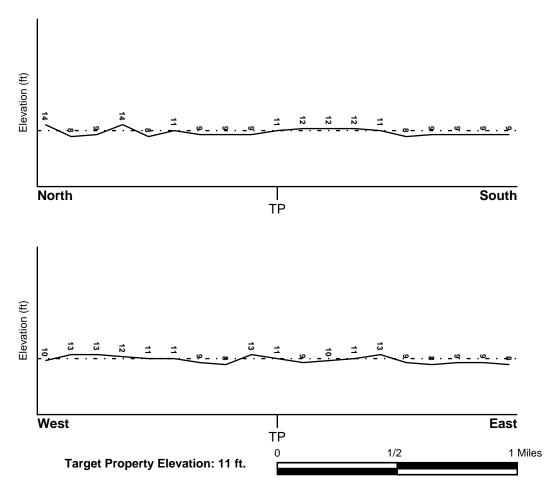

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
12011C0357H	FEMA FIRM Flood data
Additional Panels in search area:	FEMA Source Type

NATIONAL WETLAND INVENTORY	
NWI Quad at Target Property FORT LAUDERDALE NORTH	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:			
Search Radius:	1.25 miles		
Status:	Not found		

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

	LOCATION	GENERAL DIRECTION

MAP ID	FROM TP	GROUNDWATER FLOW
3G	1/2 - 1 Mile West	SW
4G	1/2 - 1 Mile SSW	SSE
5G	1/2 - 1 Mile SW	SW

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	Immokalee
Soil Surface Texture:	fine sand
Hydrologic Group:	Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.
Soil Drainage Class:	Poorly drained
Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 31 inches

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Raul Quintama. - purchased popery 25 years EnviroDesign **OWNER INTÉRVIEW** Associates inc. www.envdesign.com

Is the property currently used, or has it previously been used, as any of the following: an industrial or manufacturing operation, a gasoline station, a motor repair facility, a commercial printing facility, a dry cleaners, a photo-developing laboratory, a junkyard or a landfill, or as a waste treatment, storage, disposal, processing or recycling facility?

() Yes Soccer , Volly Lull **D**HNO () Unknown

Are any adjoining properties currently used, or have they previously been used as any of the following: an industrial or manufacturing operation, a gas station, a motor repair facility, a commercial printing facility, a dry cleaners, a photo developing laboratory, a junk yard or a landfill, or as a waste treatment storage, disposal processing, or recycling facility?

() Yes)) () Unknown

Are there currently, or have there been previously, any damaged or discarded automotive or industrial batteries, pesticides, paints or other chemicals in individual containers of greater than five gallons in yolume or fifty gallons in aggregate, stored on or used at the property?

Aves abundaned cars from Lenores () No () Unknown

Are there currently, or have there been previously, any industrial drums (typically 55 gallons) or sacks of chemicals located on the property?

() Yes No No () Unknown

Are there currently, or have there been previously, any pits, ponds or lagoons on the property connected with waste treatment or waste disposal?

() Yes XNo () Unknown

Are there currently, or have there been previously, any underground storage tanks on the property?

Are there currently, or have there been previously, any above ground storage tanks on the property?

()_AYes **WKN**o () Unknown

Owner Interview

100 Fracks of Fill, clean fill

Are there currently, or have there been previously, any flooring, drains, or walls located within the facility that are, or have been, stained by substances other than water or which are emanating foul odors?

() Yes 5KN0 ີ () ບົnknown

is there currently, or has there been previously, any stained soil on the property?

() Yes **X**No () Unknown

Has groundwater under the property been tested? Test back-flow preventer () Yes listed water for us tawn to Test back-flow preventer VINO - ---

XXN0 2002

Have any contaminants been identified which exceed State or Federal standards?

() Yes SA NO

Has the water been designated as contaminated by any governmental agency?

() Yes ¥XN0

Is the property served, or has the property been served, by a private well? XYes [well C Wigahim) () No

Are there any groundwater monitoring wells on the property?

() Yes XN0

Are you aware of any environmental liens or governmental notification relating to past or current violations of environmental laws with respect to the property, to any facility located on the property, or to any properties in the vicinity?

() Yes (XNo

Has an environmental assessment ever been performed on the property?

phase 1 no copy (XYes () No

If above is answered "Yes":

Did the environmental assessment indicate the presence of any potential contamination?

(XNo

Was the contamination cleaned up?

V () Yes () No

> Are you aware of any environmental litigation or administrative action related to a release or threatened release of any hazardous substance or petroleum product involving the property or an abutting property? () Yes

> Other than storm water or water discharged into a sanitary sewer system, does the property discharge waste water onto the subject property or onto any adjacent property? () Yes

≱≰No ()Unknown

Are there any septic systems, dry wells or leach fields on the property? () Yes () Unknown

If above is answered "Yes":

Have hazardous substances or petroleum products ever been discharged to these systems?

() Yes XNo () Unknown

Have any demolition debris, hazardous substances, petroleum products, unidentified waste materials, automotive or industrial batteries, tires, trash or refuse been dumped, buried and/or burned on the property?

() Yes X No () Unknown

Is there a transformer, capacitor or any hydraulic equipment on the property?

() Yes

If above is answered "Yes":

Do labels or records indicate the presence of PCBs?

() Yes

() No

() Unknown

Has the presence of radon been reported on the property? A Yes during Phase I for the property? () No Nothing Wasford. () Unknown

Owner Information:

Project Name:	Eva Renteriu
Name (print):	
Title (print):

Introduction: In order to qualify for one of the Landowner Liability Protections (LLPs)187 offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"),188 the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

 Environmental Cleanup Liens - Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

 Yes
 No

2. Activity and Land Use Limitations -Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

() Yes (X) No

(X) No

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28) - Do you have any specialized knowledge or experiences related to the property, nearby properties, or are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

() Yes

(X) No

4. Purchase Price vs. Fair Market Value if it were not contaminated (40 CFR 312.29) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? (X) Yes

() No

5. Commonly known or reasonably ascertainable information about the property (40 CFR **312.30**) Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

() Yes

(X) No

AAI User Questionnaire

5a. Do you know the past uses of the property?() Yes(X) No

5b. Do you know of specific chemicals that are present or were once were present at the property?

() Yes (X) No

5c. Do you know of spills or other chemical releases that have taken place at the property? () Yes

(X) No

5d. Do you know of any environmental cleanups that have taken place at the property? () Yes

(X) No

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate. - Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

()Yes

(X) No
