

DATE: July 15th, 2020

TO: City Commission

THRU: Greg Harrison, City Manager

FROM: John Sfiropoulos, PE, City Engineer

In 2017, Florida enacted the "Advanced Wireless Infrastructure Deployment Act", codified in Subsection 337.401(7), Florida Statutes, creating new requirements and allowances for installation of small wireless facilities in City right-of-way. As a result, we amended our Code of Ordinances to be in compliance with the Statute and it was approved by City Commission on June 26th, 2018.

More recently in 2019, Florida Legislature amended Section 337.401 ("SB 1000"). Consequently, City retained services from outside counsel to assist in the attached, proposed code amendment to be in compliance with this recent amended Statute.

These are predominately "housekeeping" items and have no substantive effect on our code as it currently reads.
