### Summary Explanation/Background:

The City uses the Genetec video security system which includes video security cameras and ALPR (Automatic License Plate Recognition) cameras throughout the City. This ALPR system is operated and monitored by BSO. This three-year agreement will provide labor only service for our system. This will cost \$70,000 per year and it is budgeted out of the IT Department. This contract will greatly improve the time it takes to service these cameras and provide software maintenance as needed.
